*Abraham* - Bruce Feiler 2009-10-13  
In this timely, provocative, and uplifting journey, the bestselling author of *Walking the Bible* searches for the man at the heart

of the world's three monotheistic religions—and today's deadliest conflicts. At a moment when the world is asking "can the religions get along?" one figure stands out

as the shared ancestor of Jews, Muslims, and Christians. One man holds the key to our deepest fears—and our possible reconciliation. Abraham is that man. Bruce Feiler set out on a personal quest to better understand our common patriarch. Traveling in war zones, climbing through caves and ancient shrines, and sitting down with the world's leading religious minds, Feiler uncovers fascinating, little known details of the man who defines faith for half the world. Both immediate and timeless, Abraham is a powerful, universal story, the first-ever interfaith portrait of the man God chose to be his partner. Thoughtful and inspiring, it offers a rare vision of hope that will redefine what we think about our neighbors, our future, and ourselves.

**SME Policy Index: ASEAN 2018** - Collectif  
2018-09-21

The SME Policy Index is a benchmarking tool for emerging economies to monitor and

evaluate progress in policies that support small and medium-sized enterprises. The ASEAN SME Policy Index 2018 is a joint effort between the Economic Research Institute for ASEAN and East-Asia (ERIA), the Organisation for Economic Co-operation and Development (OECD) and the ASEAN Coordinating Committee on Micro, Small and Medium Enterprises (ACCMSME). The report is the outcome of work conducted by the ten ASEAN Member States (Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Viet Nam). Divided into eight policy dimensions, it builds on the previous edition of the ASEAN SME Policy Index 2014. The current edition presents an updated methodology which makes this document a powerful tool to assess the strengths and weaknesses that exist in policy design, implementation, and monitoring and evaluation for SMEs, and allows for a

benchmarking of the level to which the ASEAN Strategic Action Plan for SME Development (SAP SMED) 2016-2025 has been implemented. Its objective is to enhance the capacity of policy makers to identify policy areas for future reform, as well as implement reforms in accordance with international good practices. The report provides a regional perspective on recent developments in SME-related policies in Southeast Asia as well as in individual ASEAN Member States. Based on this analysis the report provides a menu of concrete policy options for the region and for the individual countries.

The business case for acting sustainably is becoming increasingly compelling - reducing our global footprint to sustainable levels is the defining issue of our times and it is one that can only be addressed with the active participation of the private sector. However, persuading well-established organizations to act in new ways is never easy. This book is designed to support business leaders and organizational scholars who are grappling with this challenge by pulling together leading edge insights from some of the world's best researchers as to how organizational change in general - and sustainable change in particular - can be most effectively managed. The book begins by laying out the economic case for change, while subsequent chapters describe how leaders at firms such as Du Pont, IBM and Cemex have transformed their organizations, exploring issues such as the role of the senior team and the ways in

which firms shift their identities, build innovative cultures and processes, and begin to change the world around them. Business leaders will find the book a source of both powerful examples and immediately actionable ideas, while scholars will be deeply intrigued by the insights that emerge from the cross-cutting exploration of one of the toughest challenges our society has ever faced.

*The Online Advertising Playbook* - Joe Plummer 2007-07-20

Praise for The Online Advertising Playbook "Finally, someone has documented all we know about online advertising and how to

do it right. As much as this confirms that online advertising really works, we know that marketers don't always get it right. The ARF's The Online Advertising Playbook provides critical insight on what sticks and what doesn't in online advertising and marketing." —Greg Stuart, CEO and President, Interactive Advertising Bureau and coauthor of What Sticks "The Online Advertising Playbook's principles, case studies, and strategic insights equip marketers with the best knowledge available. It will help your online advertising achieve the full range of marketing objectives, from lead generation and customer acquisition to driving trial and loyalty." —Tim Kopp, Vice President, Global Interactive Marketing, The Coca-Cola Company "To grow interactive marketing from here we need to institutionalize our wisdom and experience about what works. This book explains, in a disciplined way,

what marketers have learned from a decade of massive change." —Ted McConnell, Interactive Innovation Director, Procter & Gamble "The Online Advertising Playbook is a milestone in the maturation of interactive advertising, but also an invaluable go-to guide for managers trying to make smart decisions with their advertising budgets." —Van Riley, Vice President of Research, AOL "The best marketing communication is spawned from what I call 'informed intuition.' After reading The Online Advertising Playbook, I am far better informed on how to optimize the online channel in our advertising and promotional programs. It's a perfect blend of case studies and research-backed learning." —Rod DeVar, Manager, Advertising and Promotion, United States Postal Service "Savvy marketers should take advantage of The Online Advertising Playbook's findings and principles to get real results." —Chris

Theodoros, Director of Industry Relations, Google "A work of wisdom and rigor in the digital space that is as relevant for the newbie as it is for the digerati." —Mike Donahue, Executive Vice President, American Association of Advertising Agencies "This is a must-read for any marketing executive involved in online advertising. It's high time that a book looks at online advertising in the context of an integrative promotional strategy, one meant to set objectives, establish creative strategies, and measure results. The book nicely ties the various components of online advertising to relevant case studies, and the emphasis on measurement and results is refreshing. Not only is it relevant for marketing executives, it would also be a good basic text for any Internet advertising course and a good adjunct to any Internet marketing course." —Henry Assael, Professor of Marketing, Stern School of

The book begins with the development of IP technologies by focusing on the problems encountered during MPLS and IPv6 network development, giving readers insights into the problems tackled by SRv6 and the value of SRv6. It then goes on to explain SRv6 fundamentals, including SRv6 packet header design, the packet forwarding process, protocol extensions such as Interior Gateway Protocol (IGP), Border Gateway Protocol (BGP), and Path Computation Element Protocol (PCEP)

extensions, and how SRv6 supports existing traffic engineering (TE), virtual private networks (VPN), and reliability requirements. Next, SRv6 network deployment is introduced, covering the evolution paths from existing networks to SRv6 networks, SRv6 network deployment processes, involved O&M technologies, and emerging 5G and cloud services supported by SRv6. Bit Index Explicit Replication IPv6 encapsulation (BIERv6), an SRv6 multicast technology, is then introduced as an important supplement to SRv6 unicast technology. **Project Business Management** - Oliver F. Lehmann 2018-07-17

Roughly half of all project managers have to lead customer projects as profit centers on

contractor side with two big objectives: making the customer happy and bringing money home. Customer projects are a high-risk business on both sides, customers and contractors, but the dynamics of this business have so far been mostly ignored in literature. The book is intended to fill this gap. The book helps project managers better understand the dynamics of customer projects under contract from business development through handover and find solutions for common problems. A central aspect is international contract laws, an often underestimated factor in projects. Foreign Direct Investment and the Multinational Enterprise - Steven Brakman 2008

The multinational firm and its main vehicle, foreign direct investment, are key forces in economic globalization. Their importance to the world economy can be seen in the fact that since 1990 foreign direct investment

has grown more rapidly than the world GDP and world trade. Despite this, the causes and consequences of multinational firm activity are little understood and until recently relatively unexamined in the theoretical literature. This CESifo volume fills this gap, examining the multinational enterprise (MNE) and foreign direct investment (FDI) from both theoretical and empirical perspectives. In the theoretical chapters, leading scholars take a wide range of modern analytical approaches--from new growth and trade theories to new economic geography, industrial organization, and game theory. Taking current theoretical work on MNE and FDI as a starting point and aiming to extend the existing theoretical framework, the contributors consider such topics as investment liberalization and firm location, tax competition, and welfare consequences of FDI and outsourcing. The empirical chapters test several of the key

hypotheses of recent theoretical work on MNE and FDI, examining topics that include productivity effects on Italian MNEs, the different effects of outsourcing in Austria and Poland, location decisions of MNEs in the European Union, and other topics. **Bringing E-money to the Poor** - Thyra A. Riley 2017-09-11

Moving toward universal access to financial services is within reach, thanks to new technologies, transformative business models, and ambitious reforms. Instruments such as e-money accounts and mobile accounts, along with debit cards and low-cost traditional bank accounts, can significantly increase financial access for those who are excluded. *Bringing e-Money to the Poor: Successes and Failures* examines the lessons of success from four country case studies of “gazelle” Kenya, South Africa, Sri Lanka, and Thailand that leapt from limitation to innovation by successfully enabling the deployment of e-money technology. These countries have thereby transformed the landscape of financial access to their poor. In addition, two country case studies (Maldives and the Philippines) yield lessons learned from

constraints that stalled e-money deployments. Because technology is not a silver bullet, the case studies also explore other strategic elements that need to be in place for a country to expand access to financial services through digital technology.

Brand Equity & Advertising - David A. Aaker 2013-10-31

The tenth annual Advertising and Consumer Psychology Conference held in San Francisco focused on branding -- a subject generating intense interest both in academia and in the "real world." The principle theory behind these conferences is that much can be gained by joining advertising and marketing professionals with academic researchers in advertising. Professionals can gain insight into the new theories, measurement tools and empirical findings that are emerging, while academics are stimulated by the insights and

experience that professionals describe and the research questions that they pose. This book consists of papers delivered by experts from academia and industry discussing issues regarding the role of advertising in the establishment and maintenance of brand equity -- making this volume of interest to advertising and marketing specialists, as well as consumer and social psychologists.

Laughing at Wall Street - Chris Camillo  
2011-11-08

\$20,000 to \$2 million in only three years—the greatest stock-picker you never heard of tells you how you can do it too Chris Camillo is not a stockbroker, financial analyst, or hedge fund manager. He is an ordinary person with a knack for identifying trends and discovering great investments hidden in everyday life. In early 2007, he invested \$20,000 in the stock market, and in three years it grew to just over \$2 million. With

Laughing at Wall Street, you'll see: •How Facebook friends helped a young parent invest in the wildly successful children's show, Chuggington—and saw her stock values climb 50% •How an everyday trip to 7-Eleven alerted a teenager to short Snapple stock—and tripled his money in seven days •How \$1000 invested consecutively in Uggs, True Religion jeans, and Crocs over five years grew to \$750,000 •How Michelle Obama caused J. Crew's stock to soar 186%, and Wall Street only caught up four months later! Engaging, narratively-driven, and without complicated financial analysis, Camillo's stock picking methodology proves that you do not need large sums of money or fancy market data to become a successful investor.

Oversight Issues in Mobile Payments - Tanai

Khiaonarong 2014-07-15

This paper examines oversight issues that underlie the potential growth and risks in mobile payments. International experience suggests that financial authorities can develop effective oversight frameworks for new payment methods to safeguard public confidence and financial stability by establishing: (i) a clear legal regime; (ii) proportionate AML/CFT measures to prevent financial integrity risks; (iii) fund safeguarding measures such as insurance, similar guarantee schemes, or “pass through” deposit insurance; (iv) contingency plans for operational disruptions; and (v) risk controls and access criteria in payment systems. Such measures are particularly important for low-income countries where diffusion is becoming more widespread.

**Access Contested** - Ronald Deibert  
2011-09-30

Experts examine censorship, surveillance, and resistance across Asia, from China and India to Malaysia and the Philippines. A daily battle for rights and freedoms in cyberspace is being waged in Asia. At the epicenter of this contest is China—home to the world's largest Internet population and what is perhaps the world's most advanced Internet censorship and surveillance regime in cyberspace. Resistance to China's Internet controls comes from both grassroots activists and corporate giants such as Google. Meanwhile, similar struggles play

out across the rest of the region, from India and Singapore to Thailand and Burma, although each national dynamic is unique. *Access Contested*, the third volume from the OpenNet Initiative (a collaborative partnership of the Citizen Lab at the University of Toronto's Munk School of Global Affairs, the Berkman Center for Internet and Society at Harvard University, and the SecDev Group in Ottawa), examines the interplay of national security, social and ethnic identity, and resistance in Asian cyberspace, offering in-depth accounts of national struggles against Internet controls as well as updated country reports by ONI researchers. The contributors examine such topics as Internet censorship in Thailand, the Malaysian blogosphere, surveillance and censorship around gender and sexuality in Malaysia, Internet governance in China, corporate social responsibility and freedom of expression in South Korea and India,

cyber attacks on independent Burmese media, and distributed-denial-of-service attacks and other digital control measures across Asia.

**Big Money Thinks Small** - Joel Tillinghast  
2017-08-15

Market mistakes to avoid: “Written for investors at all levels...[a] practical, no-nonsense guide.”—Publishers Weekly One of Money Week’s Five Best Books of the Year Investors are tempted daily by misleading or incomplete information. They may make a lucky bet, realize a sizable profit, and find themselves full of confidence. Their next high-stakes gamble might backfire, not only hitting them in the balance sheet but also taking a mental and emotional toll. Even veteran investors can be caught off guard: a news item may suddenly cause havoc for an industry they’ve invested in; crowd mentality among fellow investors may skew the market; a CEO may turn out to be

unprepared to effectively guide a company. How can one stay focused in such a volatile world? If you can't trust your past successes to plan and predict, how can you avoid risky situations in the future? Patience and methodical planning will pay far greater dividends than flashy investments. In *Big Money Thinks Small*, veteran fund manager Joel Tillinghast shows investors how to avoid making these mistakes. He offers a set of simple but crucial steps to successful investing, including:

- Know yourself, how you arrive at decisions, and how you might be susceptible to self-deception
- Make decisions based on your own expertise, and do not invest in what you don't understand
- Select only trustworthy and capable colleagues and collaborators
- Learn how to identify and avoid investments with inherent flaws
- Always search for bargains, and never forget that the first responsibility of an investor is to identify mispriced stocks

*Public-Private Partnership Monitor - Asian Development Bank* 2021-07-01  
The Government of Pakistan strongly supports public-private partnership (PPP) initiatives. From 1990 to 2019, Pakistan witnessed 108 financially closed PPP projects, with a total investment of approximately \$28.4 billion. About 88% of these projects are in the energy sector, attracting more than \$24.7 billion, followed by investments in the port sector. In early 2021, Parliament approved the amendments to the 2017 PPP Law, enacting the Public Private Partnership Authority (Amendment) Act 2021. This further strengthens the enabling legal and regulatory framework for developing and implementing PPPs, thereby promoting private sector investment in public infrastructure and related services.

The Age of Unpeace - Mark Leonard  
2021-09-02

A FINANCIAL TIMES ECONOMICS BOOK OF THE YEAR 'Compulsively readable... An essential course in geopolitical self-help' - Adam Tooze 'Full of fresh - and often surprising - ideas' - Niall Ferguson 'Extraordinary... One of those rare books that defines the terms of our conversation about our times' - Michael Ignatieff We thought connecting the world would bring lasting peace. Instead, it is driving us apart. In the three decades since the end of the Cold War, global leaders have been integrating the world's economy, transport and communications, breaking down borders in the hope of making war impossible. In doing so, they have unwittingly created a formidable arsenal of weapons for new kinds of conflict and the

motivation to keep fighting. Rising tensions in global politics are not a bump in the road - they are part of the paving. Troublingly, we are now seeing rising conflict at every level, from individuals on social media all the way up to nation-states in entrenched stand-offs. The past decade has seen a new antagonism between the US and China; an inability to co-operate on global issues such as climate change or pandemic response; and a breakdown in the distinction between war and peace, as overseas troops are replaced by sanctions, cyberwar, and the threat of large migrant flows. As a leading authority on international relations, Mark Leonard has been inside many of the rooms where our futures, at every level of society, are being decided - from the Facebook HQ and facial recognition labs in China to meetings in presidential palaces and at remote military installations. In seeking to understand the ways that globalisation has

broken its fundamental promise to make our world safer and more prosperous, Leonard explores how we might wrest a more hopeful future from an age of unpeace.

## **Digital Indonesia** - Edwin Jurriens

2017-05-09

span, SPAN { background-color:inherit; text-decoration:inherit; white-space:pre-wrap }This book places Indonesia at the forefront of the global debate about the impact of 'disruptive' digital technologies. Digital technology is fast becoming the core of life, work, culture and identity. Yet, while the number of Indonesians using the Internet has followed the upward global trend, some groups — the poor, the elderly, women, the less well-educated, people living in remote communities — are disadvantaged. This interdisciplinary collection of essays by leading researchers and scholars, as well as e-governance and e-commerce insiders, examines the impact of digitalisation on the media industry, governance, commerce, informal sector employment, education, cybercrime, terrorism, religion, artistic and cultural expression, and much more. It

presents groundbreaking analysis of the impact of digitalisation in one of the world's most diverse, geographically vast nations. In weighing arguments about the opportunities and challenges presented by digitalisation, it puts the very idea of a technological 'revolution' into critical perspective.

**Portfolios of the Poor** - Daryl Collins

2009-04-20

Nearly forty percent of humanity lives on an average of two dollars a day or less. If you've never had to survive on an income so small, it is hard to imagine. How would you put food on the table, afford a home, and educate your children? How would you handle emergencies and old age? Every day, more than a billion people around the world must answer these questions.

Portfolios of the Poor is the first book to systematically explain how the poor find solutions to their everyday financial problems. The authors conducted year-long interviews with impoverished villagers and slum dwellers in Bangladesh, India, and South Africa--records that track penny by

penny how specific households manage their money. The stories of these families are often surprising and inspiring. Most poor households do not live hand to mouth, spending what they earn in a desperate bid to keep afloat. Instead, they employ financial tools, many linked to informal networks and family ties. They push money into savings for reserves, squeeze money out of creditors whenever possible, run sophisticated savings clubs, and use microfinancing wherever available. Their experiences reveal new methods to fight poverty and ways to envision the next generation of banks for the "bottom billion." Indispensable for those in development studies, economics, and microfinance, Portfolios of the Poor will appeal to anyone interested in knowing more about poverty and what can be done about it.
