Undeclared Work, Deterrence and Social Norms - Lars P. Feld 2012-05-08

For a long time, it has been the declared aim in many countries to fight tax evasion in all its different manifestations, from undeclared work by cleaners and gardeners in private households to tax evasion in the international capital markets. This study focuses on the phenomenon of undeclared work and the case of Germany, presenting the most comprehensive analysis of tax non-compliance for Germany to date, based on surveys conducted by the Rockwool Foundation.

Theoretically, the analysis starts from the standard model of tax evasion as being influenced by the subjectively perceived extent of deterrence, the perceived marginal tax burden and social norms. Evidence is provided on the impact of deterrence and other factors on tax non-compliance, and several descriptive statistics are presented to better illustrate the nature of undeclared work with regard to industry, region, education and other socio-economic characteristics.

International Insolvency - 2001

"This monograph summarizes the statutory and case-law authority on international insolvency."--Preface.

Europe 2030 - Daniel Benjamin 2010-04-01

The European Union is the most successful supranational organization in history. It has reconciled former enemies, established a single market and a common currency, and reintegrated Central and Eastern Europe into the West. Yet the EU remains unsatisfying to its members and its partners. An economic giant but a

political pygmy, it seems hamstrung by bureaucracy and a lack of connection to European publics. In Europe 2030, distinguished authors predict what the European Union will look like twenty years from now. A range of views is presented, foreseeing everything from slower growth and diminished power to actions that would make the EU a more vigorous, influential world player. Contributors include Oksana Antonenko (International Institute for Strategic Studies), José Manuel Durão Barroso (European Commission), José Cutileiro (former secretary general, Western European Union), Joschka Fischer (former minister of foreign affairs, Germany), Charles Grant (Center for European Reform), Andrew Hilton (Centre for the Study of Financial Innovation), Jonathan Laurence (German Marshall Fund, Boston College and Brookings Institution), Rui Chancerelle de Machete (constitutional and administrative attorney), Hubert Védrine (former minister of foreign affairs, France), and Joseph H.H. Weiler (New York University).

Disability Rights and Wrongs - Tom Shakespeare 2006-12-05

Over the last thirty years, the field of disability studies has emerged from the political activism of disabled people. In this challenging review of the field, leading disability academic and activist Tom Shakespeare argues that the social model theory has reached a dead end. Drawing on a critical realist perspective, Shakespeare promotes a pluralist, engaged and nuanced approach to disability. Key topics discussed include: dichotomies - the dangerous polarizations of medical model versus social model, impairment versus disability and disabled people versus non-disabled people identity - the drawbacks of the disability movement's emphasis on identity politics bioethics in disability - choices at the beginning and end of life and in the field of genetic and stem cell therapies care and social relationships - questions of intimacy and friendship. This stimulating and accessible book challenges orthodoxies in British disability studies, promoting a new conceptualization of disability and fresh research agenda. It is an invaluable resource for researchers and students in disability studies and sociology, as well as professionals, policy makers and activists.

Economic Implications of Chronic Illness and Disability in Eastern Europe and the Former Soviet Union - Cem Mete 2008-01-01

A significant portion of the population in the Eastern Europe and Central Asia region are either in poor health or disabled. This research shows that the linkages between disability and economic and social outcomes of interest tend to be stronger in transition countries when compared with industrialized countries.

Reasons for this trend include the prevalence of a large informal sector in many developing countries, relatively weak targeting performance of social assistance programs (especially in poor transition countries), and unavailability of broad based insurance mechanisms to protect individuals against loss of income due to unexpected illness.

Competency Management in the Public Sector - European Group of Public Administration 2002

Designed for both practitioners and academics, this work seeks to inform the reader about the practice of competency management services in the public sector. It throws light on the origins and meanings of the concept and traces the competency movement from the 1980s in the UK and USA.

Universities in Imperial Austria, 1848-1918 - Jan Surman 2019

Combining history of science and a history of universities with the new imperial history, *Universities in Imperial Austria 1848-1918: A Social History of a Multilingual Space* by Jan Surman analyzes the practice of scholarly migration and its lasting influence on the intellectual output in the Austrian part of the Habsburg Empire. The Habsburg Empire and its successor states were home to developments that shaped Central Europe's scholarship well into the twentieth century. Universities became centers of both state- and nation-building, as well as of confessional resistance, placing scholars if not in conflict, then certainly at odds with the neutral international orientation of academe. By going beyond national narratives, Surman reveals the Empire as a state with institutions divided by language but united by legislation, practices, and other influences. Such an approach allows readers a better view to how scholars turned gradually away from state-centric discourse to form distinct language communities after 1867; these influences affected scholarship, and by examining the scholarly record, Surman tracks the turn. Drawing on archives in Austria, the Czech Republic, Poland, and Ukraine, Surman analyzes the careers of several thousand scholars from the faculties of philosophy and medicine of a number of Habsburg universities, thus covering various moments in the history of the Empire for the widest view. *Universities in Imperial Austria 1848-1918* focuses on the tension between the political and linguistic spaces scholars occupied and shows that this tension did not lead to a gradual dissolution of the monarchy's academia, but rather to an ongoing development of new strategies to cope with the cultural and linguistic multitude.

Common European Sales Law (CESL) - Reiner Schulze 2012

The emergence of European Contract Law as a field of enquiry has been matched by a burgeoning literature. This includes textbooks, casebooks, monographs and commentaries as well as at least one journal and huge number of journal articles. As the field has matured, so has its elaboration and analysis by scholars, though it remains a field replete with contested viewpoints and many controversies. This new work by one of Germany's most well-known and respected private law scholars, seeks to present a complete and coherent view of the subject from the perspective of the jurisdiction which has arguably had more responsibility than any other for influencing the shape and content of European contract law

The Modern VAT - Mr.Liam P. Ebrill 2001-11-05

Value-added tax, or VAT, first introduced less than 50 years ago, is now a pivotal component of tax systems around the world. The rapid and seemingly irresistible rise of the VAT is probably the most important tax development of the latter twentieth century, and certainly the most breathtaking. Written by a team of experts from the IMF, this book examines the remarkable spread and current reach of the innovative tax and draws lessons about the design and implementation of the VAT, as experienced by different countries around the world. How efficient is it as a tax, is it fair, and is it suitable for all countries? These are among the questions raised. This highly informative and well-researched book also looks at the likely future of the tax.

The Life and Opinions of Zacharias Lichter - Matei Calinescu 2018-03-20

A new translation of the only novel by lauded Romanian literary critic Matei Călinescu. An NYRB Classics Original. Ugly, unkempt, a haunter of low dives who begs for a living and lives on the street, Zacharias Lichter exists for all that in a state of unlikely rapture. After being engulfed by a divine flame as a teenager, Zacharias has devoted his days to doing nothing at all—apart, that is, from composing the odd poem he immediately throws away and consorting with a handful of stray friends: Poldy, for example, the catatonic alcoholic whom Zacharias considers a brilliant philosopher, or another more vigorous barfly whose prolific output of pornographic verses has won him the nickname of the Poet. Zacharias is a kind of holy fool, but one whose foolery calls in question both social convention and conventional wisdom. He is as much skeptic as ecstatic, affirming above all the truth of perplexity. This of course is what makes him a permanent outrage to the powers that be, be they reactionary or revolutionary, and to all other self-appointed champions of morality who are blind to their own absurdity. The only thing that scares Zacharias is that all-purpose servant of conformity, the psychiatrist. This Romanian classic, originally published under the brutally dictatorial Ceaușescu regime, whose censors initially let it pass because they couldn't make head or tail of it, is as delicious and telling an assault on the modern world order as ever.

World Population Prospects 2019: Highlights - United Nations Publications 2019-07-23

The United Nations population estimates and projections form a comprehensive set of demographic data to assess population trends at the global, regional and national levels. They are used in the calculation of many of the key development indicators commonly used by the United Nations system, including for more than one third of the indicators used to monitor progress towards the achievement of the Sustainable Development Goals. The 2019 revision of the World Population Prospects is the twenty-sixth edition of the official United Nations population estimates and projections, which have been prepared since 1951 by the Population Division of the Department of Economic and Social Affairs. The 2019 revision presents population estimates from 1950 until the present for 235 countries or areas, which have been developed through country-specific analyses of historical demographic trends. It builds on previous revisions by incorporating additional results from the 2010 and 2020 rounds of national population censuses as well as information from vital registration and recent nationally representative household sample surveys. The 2019 revision also presents population projections to the year 2100 that reflect a range of plausible outcomes at the global, regional and country levels. These Highlights summarise key population trends described by the estimates and projections presented in World Population Prospects 2019.

Arm's Length Transaction Structures -

World Report on Disability - World Health Organization 2011

The World Report on Disability suggests more than a billion people totally experience disability. They generally have poorer health, lower education and fewer economic opportunities and higher rates of poverty than people without disabilities. This report provides the best available evidence about what works to overcome barriers to better care and services.

Business in Romania - Bogdan Nastase 2021-04-12

Amazon Best Seller, #1 New Arrival in International Taxes ♦♦♦ From the readers: "This book will save the reader time and money, combining practicality with a bit more than just mere vision: the ingredients of a successful business in Romania." Andrei T. ♦♦♦ Business Case 1: Starting a business in Romania? I like the idea, but I am temporarily outside Romania, so I begin to look for more details online. First impression: frequent and unexpected legislative changes, underdeveloped infrastructure, most documents are in a language I don't quite understand, information is not always up to date, bureaucracy seems intimidating and long waiting times seem to be the norm at all levels. On the other hand, I have heard good things about the attractive tax rates, the business opportunities, the banking sector and the educated human capital, so I want to give the idea a chance, for when the economic environment will return to normal after the crisis. Business Case 2: I already have a business in Romania that I want to grow. But, even before the pandemic, my business had gone flat and was not growing anymore. I do not understand why; I look for solutions online and cannot find them. Although the volume of information is high, I find it difficult to select what is relevant; or, on certain topics, I cannot find what I am looking for. Business Case 3: I made a decision and simply want to close my business in Romania. I am looking for details on how to do it in the easiest way. I would like to start over, either in a new field or in a new country. But, also to close my business in Romania, bureaucracy seems daunting. My feeling of disorientation amplifies... ♦♦♦ Book benefits: This book is here to help me exactly with these cases. Through the numerous practical examples, I can easily understand some of the most important rules for business success in Romania, during and after the crisis. The book gives me a clear structure, from the beginning of a business, going through its development stage, and even as far as closing the company. From the moment I decide for Romania, it becomes very important for me to understand the practical details presented in this book, starting with the first visits to the notary or the bank. Choosing a good lawyer, accountant and tax advisor will make the difference between the success or failure of my business in Romania. The same will apply to the choice of team members. Having a good tax advisor, I will be able to keep my attention on the two levers described in the book that will ensure my stability: equity and cash. As additional benefits from reading this book, I will find practical solutions for tax optimisation and the list of the most common mistakes once the company is up and running which may lead to a tax inspection or even a suspension. This book is also relevant for business students, lawyers, consultants, owners of IT companies, real estate owners, high-net worth individuals, multinational companies interested in expanding their presence to Romania. ♦♦♦ Main benefit and hot topics: by reading this book, I will be able to save on advisory costs because I will get to understand the following practical details: - how to start a business in Romania; - what is a micro company and what are its advantages over the traditional profit-tax paying company; - how to get the VAT number - the regular one, the special one for EU transactions, or the e-commerce one; - the most frequent mistakes in the beginning, like losing my newly-obtained VAT code and getting my company suspended at both the Trade Registry and at the Tax Agency (ANAF); - what is a PFA and its benefits; - what are the rules for the beneficial owner form; - when do I need to start filing tax returns; - how can I file tax returns online; - what is the Virtual Private Space (SPV) and how do I access it; - about the Environment Fund; - about Intrastat; - how to hire my first employee and the mandatory payroll documentation; - how to motivate the

employees - including with tax-deductible vouchers; - why I need to constantly check my accounting; - where do I see my revenue and profit in a Romanian trial balance; - which expenses are tax deductible - services, protocol, transport, sponsorships etc. - and which support documents are needed; - what is the legal reserve; - what is equity and why is it so important; - how can I optimise tax; - what are the rules for drafting annual financial statements (including the informative data and the administrator's report); - how to read a Romanian balance sheet - both mine as well as that of my suppliers and clients, for due diligence; - details about NIF; - details about "declarația unică"; - how can I withdraw interim dividends throughout the year and what is the dividend tax; - how can I obtain a tax record online; - how to file a VAT refund request; - tax inspection: what to expect; - how to reduce the tax risk profile of my business in Romania.

◆◆ From the authors: "Throughout our collaborations, many of the local and foreign business owners which have built their dreams in Romania have repeated to us that without our help and guidance they would not have succeeded - and have encouraged us to put all our knowledge into a book. We have always told them, smiling, that a book would not be enough. And they always replied, smiling, that they could hardly wait to read all of them. Well, this is the first one." Maria Piroi, Bogdan Nastase ◆◆ From the readers: "Skipping the legalese, straight to the point, every question that comes to mind is answered. Excellent material!" I. Urem

Tax Law Design and Drafting, Volume 1 - Mr. Victor Thuronyi 1996-08-23

Edited by Victor Thuronyi, this book offers an introduction to a broad range of issues in comparative tax law and is based on comparative discussion of the tax laws of developed countries. It presents practical models and guidelines for drafting tax legislation that can be used by officials of developing and transition countries. Volume I covers general issues, some special topics, and major taxes other than income tax.

Handbook of Disability Studies - Gary L. Albrecht 2001-05-24

This path-breaking Handbook of Disability Studies signals the emergence of a vital new area of scholarship, social policy and activism. Drawing on the insights of disability scholars around the world and the creative advice of an international editorial board, the book engages the reader in the critical issues and debates framing disability studies and places them in an historical and cultural context. Five years in the making, this one volume summarizes the ongoing discourse ranging across continents and traditional academic disciplines. The Handbook answers the need expressed by the disability community for a thought provoking, interdisciplinary, international examination of the vibrant field of disability

Human rights and criminal procedure - Jeremy McBride 2018-06-18

A practical tool for legal professionals who wish to strengthen their skills in applying the European Convention on Human Rights and the case law of the European Court of Human Rights in their daily work This is the second and expanded edition of a handbook intended to assist judges, lawyers and prosecutors in taking account of the requirements of the European Convention on Human Rights and its Protocols ("the European Convention") - and more particularly of the case law of the European Court of Human Rights - when interpreting and applying codes of criminal procedure and comparable or related legislation. It does so by providing extracts from key rulings of the European Court and the former European Commission of Human Rights that have determined applications complaining about one or more violations

of the European Convention in the course of the investigation, prosecution and trial of alleged offences, as well as in the course of appellate and various other proceedings linked to the criminal process.

Philosophical Foundations of Property Law - James Penner 2013-11-28

Property has long played a central role in political and moral philosophy. Philosophers dealing with property have tended to follow the consensus that property has no special content but is a protean construct - a mere placeholder for theories aimed at questions of distributive justice and efficiency. Until recently there has been a relative absence of serious philosophical attention paid to the various doctrines that shape the actual law of property. If the philosophy of property is to be more attentive to concepts lying between broad considerations of political philosophy and distributive justice on the one hand and individual rules on the other, what in this broad space needs explaining, and how might we justify what we find? The papers in this volume are a first step towards filling this gap in the philosophical analysis of private law. This is achieved here by revisiting the contributions of philosophers such as Hume, Locke, Kant, and Grotius and revealing how particular doctrines illuminate the way in which property law respects the equality and autonomy of its subjects. Secondly, by exploring the central notions of possession, ownership, and title and finally by considering the very foundations of conceptualism in property.

UN Urbanism - Regina Bittner 2010

Cities often become the key battlefields in modern warfare, resulting of course in human casualty, and also in the wholesale destruction of urban structures. Afterwards, when reconstruction commences, it appears that the process follows strikingly similar patterns, across the world. Using the examples of Mostar (in Bosnia and Herzegovina) and Kabul in Afghanistan, this volume asks: is there a U.N. urbanism?

Global Intellectual Property Rights - P. Drahos 2002-10-31

Intellectual property rights such as patents can reduce access to knowledge in genetics, health, agriculture, education and information technology, particularly for people in developing countries. Global Intellectual Property Rights shows how the new global rules of intellectual property have been the product of the strategic behaviour of multinationals, rather than democratic dialogue. The final section of the book suggests strategies aimed at developing more flexible standard for poor countries, and for keeping knowledge in the intellectual commons.
