Advanced Practice in Mental Health Nursing - Agnes Higgins 2022-11-06

This textbook explores issues central to the provision of recovery-orientated care based on ethical principles and human rights perspectives. Written by academics and nurse practitioners, this comprehensive text draws together theory, research and practice to map the landscape of Advanced Practice in Mental Health Nursing (APMHN) in Europe. Underpinned by a rights- and relational- based approach to care, the textbook is organized around six themes: theoretical and historical perspectives; foundations for collaborative working; therapeutic engagement in different contexts; beyond the clinical dimension of the APMHN role; advancing the evidence-based practice agenda and emerging issues and challenges. Each theme consists of a number of chapters that are designed to address different aspects of APMHN. With a focus on illuminating the collaborating aspect of their role and advancing nurses' competencies, debates and guidance are provided in areas such as therapeutic alliance, assessment, care-planning, mental health promotion, family work, trauma, diversity and culture, spirituality, risk and uncertainty, and prescribing. In addition to addressing the leadership, education and advocacy role, specific chapters explore the APMHN role in linking evidence to practice, in the participatory generation of evidence and maintaining professional competence. With a focus on future challenges and opportunities the textbook concludes with discussion on issues, such as eMental Health and future challenges and possibilities facing APMHNs, including challenges in informing policy, democratizing services, working across service and disciplinary boundaries, collaboratively shaping the evidence agenda, as well sustaining their role into the future. Within the book theoretical debate is grounded in case studies and/or examples from across Europe. This textbook is especially relevant to Mental Health Nurses undertaking studies at the Advanced Practice level. It is also suited to all Mental Health Nurses studying at post-graduate level who wish to advance their practice irrespective of the country. Educators, researchers and policy-makers involved in the area of Mental Health and Advanced Nursing Practice along with people with lived experiences will find the text of relevance.

The Essentials of Clinical Reasoning for Nurses: Using the Outcome-Present State Test Model for Reflective Practice - RuthAnne Kuiper 2017-05-24

In today's healthcare environment of scarce resources and challenges related to safety and quality, nurses must make

decision after decision to ensure timely, accurate, and efficient provision of care. Solid decision-making, or lack thereof, can significantly affect patient care and outcomes. Clinical reasoning – how a nurse processes information and chooses what action to take – is a skill vital to nursing practice and split-second decisions. And yet, developing the clinical reasoning to make good decisions takes time, education, experience, patience, and reflection. Along the way, nurses can benefit from a successful, practical model that demystifies and advances clinical reasoning skills. In *The Essentials of Clinical Reasoning for Nurses*, authors RuthAnne Kuiper, Sandra O'Donnell, Daniel Pesut, and Stephanie Turrisse provide a model that supports learning and teaching clinical reasoning, development of reflective and complex thinking, clinical supervision, and care planning through scenarios, diagnostic cues, case webs, and more.

Nursing Outcomes Classification (NOC) - E-Book - Sue Moorhead 2018-01-12

Promoting safe and effective nursing care, *Nursing Outcomes Classification (NOC)*, 6th Edition standardizes the terminology and criteria needed to measure and evaluate outcomes that result from nursing interventions. Over 540 research-based nursing outcome labels — including 50 that are NEW to this edition — help to standardize expected patient outcomes. Specific indicators make it easier to evaluate and rate the patient in relation to outcome achievement. Written by an expert author team led by Sue Moorhead, this book is ideal for practicing nurses, students, educators, researchers, and administrators seeking to improve cost containment and patient outcomes. 540 research-based nursing outcome labels promote standardization of expected patient outcomes. Definitions, lists of indicators, publication facts lines, and references provide all of the information you need to understand outcomes. NEW! Approximately 50 new outcome labels allow you to better define patient outcomes that are responsive to nursing care.

Essentials of Psychiatric Mental Health Nursing - E-Book - Elizabeth M. Varcarolis 2016-07-22

Awarded third place in the 2017 AJN Book of the Year Awards in the Psychiatric and Mental Health Nursing Category. Get a full understanding of today's psychiatric nursing practice in less time! *Essentials of Psychiatric Mental Health Nursing*, 3rd Edition offers the perfect balance of essential nursing interventions and clinical content paired with current research and evidence-based practice to fully equip you for today's field of mental health nursing. This new edition continues to retain the reader-friendly style, emphasis on therapeutic communication, and the nursing process organization that was successful in the previous edition. It also includes additional DSM-5 disorders, illustrations of various neurobiology disorders, a new neurobiology learning tool, and new NCLEX review questions to help you pass your course and thoroughly prepare for the psychiatric nursing section of the NCLEX. REVISED! Examining the Evidence boxes explain the reasoning behind nursing interventions and how research affects everyday practice. UNIQUE! Applying the Art sections in the clinical chapters provide examples of therapeutic and nontherapeutic communication techniques as well as realistic nurse-patient interaction scenarios. Chapter review questions reinforce essential content from the chapter. Critical thinking questions introduce clinical situations in psychiatric nursing.

Nursing Interventions tables familiarize readers with interventions for a disorder that they will encounter in clinical practice. Key concepts and terms clarify essential terminology. Vignettes offer succinct, real-life glimpses into clinical practice by describing patients and their psychiatric disorders. Assessment Guidelines familiarize readers with methods of assessing patients. Potential Nursing Diagnosis tables give several possible nursing diagnoses for a particular disorder along with the associated signs and symptoms. DSM-5 diagnostic criteria identifies medical diagnostic criteria for psychiatric disorders for integration into the nursing plan of care. Important contributions from psychiatric mental health nursing pioneers are featured in the opening unit pages. Cultural Considerations sections reinforce the principles of culturally competent care. Key Points to Remember outline the main concepts of each chapter in an easy to comprehend and concise bulleted list. Appendices feature the DSM-5 Classifications and a list of the latest NANDA-I diagnoses for readers' reference.

Nursing Outcomes Classification (NOC) - Marion Johnson 2004
Nursing Outcomes Classification (NOC) presents standardized terminology and measures for nursing-sensitive patient outcomes that result from nursing interventions. Developed by a research team at the University of Iowa, the classification can be used by clinicians, students, educators, researchers, and administrators in a variety of clinical, educational, and research venues. The comprehensiveness of the outcomes, and the inclusion of specific indicators that can be used to evaluate and rate the patient in relation to outcome achievement, make this book an invaluable resource for both practicing nurses and students. Includes 330 research-based outcome labels to provide standardization of expected patient outcomes. Presents for each outcome: a definition, list of indicators, and measures to facilitate clinical implementation. Provides links between NOC outcomes and NANDA nursing diagnoses to promote clinical decision making. Organizes NOC outcomes into a conceptual framework using a coded taxonomy to facilitate locating an outcome. Includes examples of implementation in practice and educational settings. Provides linkages with Gordon's Functional Health Patterns. 76 newly approved outcomes: 70 for individual patients and family caregivers, 3 family-level outcomes, and 3 community-level outcomes. Research results from 10 clinical sites testing the reliability and validity of the outcomes. Expanded content covering community settings, reflecting the shift in health care delivery. Core Outcomes for Nursing Specialty Areas featuring core interventions for 41 nursing specialties. An additional column in the Outcomes section measurement scale with N/A to help nurses document the specific outcome indicators that do not apply to their patient.

NOC and NIC Linkages to NANDA-I and Clinical Conditions - E-Book - Marion Johnson 2011-06-03

Based on ongoing research conducted by investigative teams at the University of Iowa, NOC and NIC Linkages to NANDA-I and Clinical Conditions: Supporting Critical Thinking and Quality Care, 3rd Edition is the only book on the market that provides linkages between the three standardized languages recognized by the American Nurses Organization (NOC, NIC, and all of the 2009-2010 NANDA-I approved nursing diagnoses). Its user-friendly, tabular format and real-world case studies make it the perfect tool to help you develop effective care plans for your patients. This edition features a new chapter on clinical decision making, a new chapter on the use of NNN in information systems, more concise intervention listings that identify major and suggested interventions, and approximately 20 new linkages to common, high-cost medical diagnoses. Linkages between the three standardized languages recognized by the American Nurses Organization: NANDA-I, Nursing Interventions Classification (NIC), and Nursing Outcomes Classification (NOC) help you select the most effective care plans for patients and allow institutions to track and quantify nursing care. Tabular format allows you to quickly retrieve information. Case studies with nursing care plans demonstrate the practical, real-life application of linkages. Definitions of all NANDA-I, NOC, and NIC labels provide comprehensive coverage of the standardized languages. Serves as an excellent companion to Nursing Outcomes Classification (NOC), 4th Edition and Nursing Interventions Classification (NIC), 5th Edition. NEW! Added linkages to common medical diagnoses help support clinical reasoning, improve quality, and build the evidence needed to enhance nursing care. - Includes 15-20 high-frequency, high-cost medical diagnoses that are commonly experienced by patients across the life span. - Examples include Congestive Heart Failure, Chronic Obstructive Pulmonary Disease (COPD), Total Joint Replacement, and Asthma. NEW! Treatment of Intervention content makes information easier to locate by listing interventions as Major Interventions and Suggested Interventions. Two NEW chapters discuss the use of linkages for clinical reasoning and quality improvement and the use of NNN in computerized

information systems. NEW! Information associated with the risk for nursing diagnosis is contained on a single page for quick and easy reference.

Nursing Outcomes Classification (NOC) - Marion Johnson 2000
This second edition of the Nursing Outcomes Classification (NOC) contains 260 outcomes. Each outcome includes a label name; a definition; a set of indicators that describe specific patient, caregiver, family, or community states related to the outcome; a 5-point Likert-type measurement scale; and selected references used in the development of the outcome. Although we encourage the use of the indicators and measurement scale associated with the outcomes, the goal of the research team is to standardize the label name and definition for each outcome, which assist nurses in evaluating and quantifying patient status in relation to a particular outcome. Preface, p. XI

Nursing Outcomes Classification (NOC) - E-Book - Sue Moorhead 2014-04-14

Promoting safe and effective nursing care, *Nursing Outcomes Classification (NOC)*, 5th Edition standardizes the terminology and criteria needed to measure and evaluate outcomes that result from nursing interventions. Nearly 500 research-based nursing outcome labels — including 107 that are NEW to this edition — help to standardize expected patient outcomes. Specific indicators make it easier to evaluate and rate the patient in relation to outcome achievement. Written by an expert author team led by Sue Moorhead, this book is ideal for practicing nurses, students, educators, researchers, and administrators seeking to improve cost containment and patient outcomes. 490 research-based nursing outcome labels promote standardization of expected patient outcomes. Definitions, lists of indicators, publication facts lines, and references provide all of the information you need to understand outcomes. A label name, definition, set of indications, 5 point Likert measurement scale, a publication facts line, and selected references are presented for each outcome. Linkages between NOC outcomes and 2012-2014 NANDA-I Diagnoses and Functional Health Patterns promote clinical decision-making. Nursing Diagnoses 2015-17 - NANDA International 2014-08-01
Nursing Diagnoses: Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. The 2015-2017 edition of the classic and internationally recognised text has been rigorously updated and revised, and now provides more linguistically congruent diagnoses as a result of the Diagnostic Development Committee's attentiveness to understanding the translation of the diagnostic label, definition, defining characteristics, related factors, and risk factors. Each of the 235 diagnoses presented are supported by definitions as well as defining characteristics and related factors, or risk factors. Each new and revised diagnosis is based on the latest global evidence, and approved by expert nurse diagnosticians, researchers, and educators. New to this edition: 26 brand new nursing diagnoses and 13 revised diagnoses Updates, changes, and revision to the vast majority of the nursing diagnosis definitions, in particular the Health Promotion and Risk Diagnoses A standardization of diagnostic indicator terms (defining characteristics, related factors, and risk factors) to further aid clarity for readers and clinicians All introductory chapters are written at an undergraduate nursing level, and provide critical information needed for nurses to understand assessment, its link to diagnosis, and the purpose and use of taxonomic structure for the nurse at the bedside A new chapter, focusing on Frequently Asked Questions, representing the most common questions received through the NANDA-I website, and at global conferences Five nursing diagnoses have been re-slotted within the NANDA-I taxonomy, following a review of the current taxonomic structure Coding of all diagnostic indicator terms is now available for those using electronic versions of the terminology Companion website featuring references from the book, video presentations, teaching tips, and links to taxonomy history and diagnosis submission/review process description www.wiley.com/go/nursingdiagnoses
