The Book of Thoth (Egyptian Tarot) - Aleister Crowley 2019-03-09

This book describes the philosophy and the use of Aleister Crowley's Thoth Tarot, a deck of Tarot cards designed by Crowley and co-designed and painted by Lady Frieda Harris. The Thoth Tarot has become one of the best-selling and most popular Tarot Decks in the world. It is also one of the most original interpretations of the tarot, incorporating astrological, numerological, Egyptian, and Qabalistic symbolism. While there are many

other useful guides to this famous tarot deck, there are no others that explain the deck in its designer's own words. The book is divided into four major parts: * Part One: The Theory Of The Tarot. * Part Two: The Atu (Keys or Trumps). * Part Three: The Court Cards. * Part Four: The Small Cards. Part One is further divided into three chapters; Part Two into two chapters and an appendix; Part Three into one chapter; and Part Four into one chapter. The book includes a list of plates depicting the Tarot cards as

seen by Crowley and Harris.

The Perfect Bet - Adam Kucharski 2016-02-23

"An elegant and amusing account" of how gambling has been reshaped by the application of science and revealed the truth behind a lucky bet (Wall Street Journal). For the past 500 years, gamblers-led by mathematicians and scientists-have been trying to figure out how to pull the rug out from under Lady Luck. In *The Perfect Bet*, mathematician and award-winning writer Adam Kucharski tells the astonishing story of how the experts have succeeded, revolutionizing mathematics and science in the process. The house can seem unbeatable. Kucharski shows us just why it isn't. Even better, he demonstrates how the search for the perfect bet has been crucial for the scientific pursuit of a better world.

Why Nations Fail - Daron Acemoglu 2013-09-17

Brilliant and engagingly written, *Why Nations Fail* answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and

violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving

from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas on the interplay between inclusive political and economic institutions? *Why Nations Fail* will change the way you look at—and understand—the world.

The Black Swan - Nassim Nicholas Taleb 2007-04-17

The Black Swan is a standalone book in Nassim Nicholas Taleb's landmark *Incerto* series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are *Fooled by Randomness*, *Antifragile*, and *The Bed of Procrustes*. A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random, and more predictable, than it was. The astonishing success of Google was a black swan; so was 9/11. For Nassim Nicholas Taleb, black swans underlie almost everything about our world, from the rise of religions to events in our own personal lives. Why do we not acknowledge the phenomenon of black swans until after they

occur? Part of the answer, according to Taleb, is that humans are hardwired to learn specifics when they should be focused on generalities. We concentrate on things we already know and time and time again fail to take into consideration what we don't know. We are, therefore, unable to truly estimate opportunities, too vulnerable to the impulse to simplify, narrate, and categorize, and not open enough to rewarding those who can imagine the "impossible." For years, Taleb has studied how we fool ourselves into thinking we know more than we actually do. We restrict our thinking to the irrelevant and inconsequential, while large events continue to surprise us and shape our world. In this revelatory book, Taleb explains everything we know about what we don't know, and this second edition features a new philosophical and empirical essay, "On Robustness and Fragility," which offers tools to navigate and exploit a Black Swan world. Elegant, startling, and universal in its applications, *The Black Swan* will change the way you look at the world. Taleb is a vastly entertaining writer, with wit, irreverence, and unusual stories to tell. He has a polymathic command of subjects ranging from cognitive science to business to probability theory. *The Black Swan* is a landmark book—itsself a black swan. Praise for Nassim Nicholas Taleb "The most prophetic voice of all."—GQ Praise for *The Black Swan* "[A book] that altered modern thinking."—The Times (London) "A masterpiece."—Chris Anderson, editor

in chief of Wired, author of *The Long Tail* “Idiosyncratically brilliant.”—Niall Ferguson, *Los Angeles Times* “The Black Swan changed my view of how the world works.”—Daniel Kahneman, Nobel laureate “[Taleb writes] in a style that owes as much to Stephen Colbert as it does to Michel de Montaigne. . . . We eagerly romp with him through the follies of confirmation bias [and] narrative fallacy.”—The Wall Street Journal “Hugely enjoyable—compelling . . . easy to dip into.”—Financial Times “Engaging . . . The Black Swan has appealing cheek and admirable ambition.”—The New York Times Book Review From the Hardcover edition.

The Mental Game of Poker - Jared Tendler 2011-10-02

London Belongs to Us - Sarra Manning 2016-06-02

'Fast and funny and happy-making' Lisa Williamson, author of *THE ART OF BEING NORMAL* Twelve hours, two boys, one girl . . . and a whole lot of hairspray. Seventeen-year-old Sunny's always been a little bit of a pushover. But when she's sent a picture of her boyfriend kissing another girl, she knows she's got to act. What follows is a mad, twelve-hour dash around London - starting at 8pm in Crystal Palace (so far away from civilisation you can't even get the Tube there) then sweeping through Camden, Shoreditch, Soho, Kensington, Notting Hill . . . and ending up at 8am in Alexandra Palace. Along the way Sunny meets a whole host of

characters she never dreamed she'd have anything in common with - least of all the devilishly handsome (and somewhat vain) French 'twins' (they're really cousins) Jean Luc and Vic. But as this love-letter to London shows, a city is only a sum of its parts, and really it's the people living there who make up its life and soul. And, as Sunny discovers, everyone - from friends, apparent-enemies, famous bands and even rickshaw drivers - is willing to help a girl on a mission to get her romantic retribution. A fast-paced, darkly funny love letter to London, boys with big hair and the joys of staying up all night.

Sapiens - Yuval Noah Harari 2015-02-10

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for

the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Cousin Bazilio - Eça de Queirós 1992

"Cousin Bazilio is a tale of sexual folly and hyprocrisy and vividly depicts bourgeois life in nineteenth-century Lisbon. Eca gives us a whole gallery of characters from Bazilio, the suave villain to Jorge, the smugly uxorious husband, from Luiza, the bored, empty-headed wife to Juliana, the plain, ailing maidservant desperate, by whatever means, to grab some of life's little luxuries, from Leopoldina, nicknamed 'the Ever-Open Door', to Joana the cook and her affair with the tubercular carpenter who lives opposite, and the voluminous Dona Felicidade who nurses an entirely unrequited passion for the unbearably pompous Acacio, who lives in concubinage with his much younger housekeeper, who is also having an affair."--BOOK JACKET.

Diary of an Oxygen Thief - Anonymous 2016-05-23

Hurt people hurt people. Say there was a novel in which Holden Caulfield was an alcoholic and Lolita was a photographer's assistant and, somehow, they met in Bright Lights, Big City. He's blinded by love. She by ambition. **Diary of an Oxygen Thief** is an honest, hilarious, and heartrending novel, but above all, a very realistic account of what we do to each other and what we allow to have done to us.

E-Squared - Pam Grout 2013-01-28

Don't face reality. Create reality! E-Squared could best be described as a lab manual with simple experiments to prove once and for all that reality is malleable, that consciousness trumps matter, and that you shape your life with your mind. Rather than take it on faith, you are invited to conduct nine 48-hour experiments to prove there really is a positive, loving, totally hip force in the universe. Yes, you read that right. It says prove. The experiments, each of which can be conducted with absolutely no money and very little time expenditure, demonstrate that spiritual principles are as dependable as gravity, as consistent as Newton's laws of motion. For years, you've been hoping and praying that spiritual principles are true.

Now, you can know. E-Squared proves the following: 1. There is an invisible energy force or field of infinite possibilities. 2. You impact the field and draw from it according to your beliefs and expectations. 3. You, too, are a field of energy. 4. Whatever you focus on expands. 5. Your connection to the field provides accurate and unlimited guidance. 6. Your thoughts and consciousness impact matter. 7. Your thoughts and consciousness provide the scaffolding for your physical body. 8. You are connected to everything and everyone else in the universe. 9. The universe is limitless, abundant, and strangely accommodating.

The Malleus Maleficarum - Heinrich Kramer and James Sprenger

2016-09-22

The **Malleus Maleficarum** is probably one of the most notorious books of Catholic Church history. Originally put out when the Inquisition was in full force, this book and the text it contains condemned thousands of innocent people to needless deaths. Most of what today's society and culture thinks of the witches and the occult comes from these pages. Although this text is largely misguided and inaccurate from even a scriptural standpoint, the fact remains that it has molded our views on those who practice occult arts in many ways. Take a look into the past!

And Still the Earth - Ignácio de Loyola Brandão 2013-05-16

Welcome to São Paulo, Brazil, in the not too distant future. Water is

scarce, garbage clogs the city, movement is restricted, and the System—sinister, omnipotent, secret—rules its subjects' every moment and thought. Here, middle-aged Souza lives a meaningless life in a world where the future is doomed and all memory of the past is forbidden. A classic novel of "dystopia," looking back to Orwell's 1984 and forward to Terry Gilliam's Brazil, *And Still the Earth* stands with Loyola Brandão's *Zero* as one of the author's greatest, and darkest, achievements.

The Slum - Aluísio Azevedo 2000-06-01

First published in 1890, and undoubtedly Azevedo's masterpiece, *The Slum* is one of the most widely read and critically acclaimed novels ever written about Brazil. Indeed, its great popularity, realistic descriptions, archetypal situations, detailed local coloring, and overall race-consciousness may well evoke *Huckleberry Finn* as the novel's North American equivalent. Yet Azevedo also exhibits the naturalism of Zola and

the ironic distance of Balzac; while tragic, beautiful, and imaginative as a work of fiction, *The Slum* is universally regarded as one of the best, or truest, portraits of Brazilian society ever rendered. This is a vivid and complex tale of passion and greed, a story with many different strands touching on the different economic tiers of society. Mainly, however, *The Slum* thrives on two intersecting story lines. In one narrative, a penny-pinching immigrant landlord strives to become a rich investor and then discards his black lover for a wealthy white woman. In the other, we witness the innocent yet dangerous love affair between a strong, pragmatic, "gentle giant" sort of immigrant and a vivacious mulatto woman who both live in a tenement owned by said landlord. The two immigrant heroes are originally Portuguese, and thus personify two alternate outsider responses to Brazil. As translator David H. Rosenthal points out in his useful Introduction: one is the capitalist drawn to new markets, quick prestige, and untapped resources; the other, the prudent European drawn moth-like to "the light and sexual heat of the tropics." A deftly told, deeply moving, and hardscrabble novel that features several stirring passages about life in the streets, the melting-pot realities of the modern city, and the oft-unstable mind of the crowd, *The Slum* will captivate anyone who might appreciate a more poetic, less political take on the nineteenth-century naturalism of Crane or Dreiser.

I Don't Have Enough Faith to Be an Atheist - Norman L. Geisler

2021-05-17

To some, the concept of having faith in a higher power or a set of religious beliefs is nonsensical. Indeed, many view religion in general, and Christianity in particular, as unfounded and unreasonable. Norman Geisler and Frank Turek argue, however, that Christianity is not only more reasonable than all other belief systems, but is indeed more rational than unbelief itself. With conviction and clear thinking, Geisler and Turek guide readers through some of the traditional, tested arguments for the existence of a creator God. They move into an examination of the source of morality and the reliability of the New Testament accounts concerning Jesus. The final section of the book deals with a detailed investigation of the claims of Christ. This volume will be an interesting read for those skeptical about Christianity, as well as a helpful resource for Christians seeking to articulate a more sophisticated defense of their faith.

A Friendship That Changed Our Minds In the international bestseller, *Thinking, Fast and Slow*, Daniel Kahneman, the renowned psychologist and winner of the Nobel Prize in Economics, takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how choices are made in both our business and our personal lives—and how we can use different techniques to guard against the mental glitches that often get us into trouble. Winner of the National Academy of Sciences Best Book Award and the Los Angeles Times Book Prize and selected by The New York Times Book Review as one of the ten best books of 2011, *Thinking, Fast and Slow* is destined to be a classic.

The Social Animal - David Brooks 2012-01-03

#1 NEW YORK TIMES BESTSELLER With unequalled insight and brio, New York Times columnist David Brooks has long explored and explained the way we live. Now Brooks turns to the building blocks of human flourishing in a multilayered, profoundly illuminating work grounded in everyday life. This is the story of how success happens, told through the lives of one composite American couple, Harold and Erica. Drawing on a wealth of current research from numerous disciplines, Brooks takes Harold and Erica from infancy to old age, illustrating a fundamental new understanding of human nature along the way: The unconscious mind, it turns out, is not a dark, vestigial place, but a creative one, where most of the brain’s work gets done. This is the realm where character is formed and where our most important life decisions are made—the natural habitat

of *The Social Animal*. Brooks reveals the deeply social aspect of our minds and exposes the bias in modern culture that overemphasizes rationalism, individualism, and IQ. He demolishes conventional definitions of success and looks toward a culture based on trust and humility. *The Social Animal* is a moving intellectual adventure, a story of achievement and a defense of progress. It is an essential book for our time—one that will have broad social impact and will change the way we see ourselves

and the world.
