Becoming a High Expectation Teacher - Christine Rubie-Davies 2014-08-13

We constantly hear cries from politicians for teachers to have high expectations. But what this means in practical terms is never spelled out. Simply deciding that as a teacher you will expect all your students to achieve more than other classes you have taught in the same school, is not going to translate automatically into enhanced achievement for

students. *Becoming a High Expectation Teacher* is a book that every education student, training or practising teacher, should read. It details the beliefs and practices of high expectation teachers – teachers who have high expectations for all their students – and provides practical examples for teachers of how to change classrooms into ones in which all students are expected to learn at much higher levels than teachers may previously have thought possible. It shows how student achievement can be raised by providing both research evidence and practical examples. This book is based on the first ever intervention study in the teacher expectation area, designed to change teachers' expectations through introducing them to the beliefs and practices of high expectation teachers. A holistic view of the classroom is emphasised whereby both the instructional and socio-emotional aspects of the classroom are considered if teachers are to increase student achievement. There is a focus on high expectation teachers, those who have high expectations for all students, and a close examination of what it is that these teachers do in their classrooms that mean that their students make very large learning gains each year. *Becoming a High Expectation Teacher* explores three key areas in which what high expectation teachers do differs substantially from what other teachers do: the way they group students for learning, the way they create a caring classroom community, and the way in which they use goalsetting to motivate students, to promote student autonomy and to promote mastery learning. Areas covered include:- Formation of teacher expectations Teacher personality and expectation Ability grouping and goal setting Enhancing class climate Sustaining high expectations for students *Becoming a High Expectation Teacher* is an essential read for any researcher, student, trainee or practicing teacher who cares passionately about the teacher-student relationship and about raising expectations and student achievement.

Developing Materials for Language Teaching - Brian Tomlinson 2013-12-19

There have been a number of books published on various aspects of materials development for language teaching but *Developing Materials for Language Teaching* is the only one which provides a comprehensive coverage of the main aspects and issues in the field. This second edition brings it completely up to date and expands on the original book. It deals with advances in IT and an increasingly globalized world. It is the only publication which views current developments in materials development through the eyes of developers and users of materials from all over the world. In doing so it applies principles to practice in ways demonstrated to facilitate the effectiveness of language learning materials. The chapters are written so that the book provides critical overviews of recent developments in materials development and at the same time acts as a stimulus for development and innovation in the field. It is intended both for use as a course book on postgraduate and teacher training courses and as a resource for the stimulus and refreshment of teachers, publishers and applied linguists in the field. The book contains updated versions of many of the chapters in the 2003 edition plus new chapters on corpus-informed materials development, materials development for blended learning, materials development for EAP, materials development for ESOL and materials development for young learners.

SLA Research and Materials Development for Language Learning - Brian Tomlinson 2016-05-20

SLA Research and Materials Development for Language Learning is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections - position statements; materials driven by SLA theory; evaluations of materials in relation to SLA theory; and proposals for action - that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for post-graduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials development.

Reflective Teaching Beliefs and Practices of Secondary Agricultural Educators in Papua New Guinea - Arnold Charles Parapi 2000

The study concluded that agricultural education can be improved through the engagement of critical reflective teaching curriculum and the use of practices like the reflective journal and diverging activity. It further recommends seminars, workshops, micro-teaching, clinical teaching, and other curriculum based educational approaches to promote quality agricultural education in Papua New Guinea and other comparable settings.

Learning and Understanding - National Research Council 2002-08-06

This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.

Psychology for Teaching - Guy R. Lefrançois 1994

and tempered with a love of children.

Detracking for Excellence and Equity - Carol Corbett Burris 2008
Proven strategies for launching, sustaining, and monitoring a reform that will offer all students access to the best curriculum, raise achievement across the board, and close the achievement gap.

The Framework for Teaching Evaluation Instrument, 2013 Edition - Charlotte Danielson 2013

The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.
