A Computational Method in Plasma Physics - F.

Bauer 2012-12-06

In this book, we report on research in methods of computational magneto hydrodynamics supported by the United States Department of Energy under Contract EY-76-C-02-3077 with New York University. The work has resulted in a computer code for mathematical analysis of the equilibrium and stability of a plasma in three dimensions with toroidal geometry but no symmetry. The code is listed in the final chapter. Versions of it have been used for the design of experiments at the Los Alamos Scientific Laboratory and the Max Planck Institute for Plasma Physics in Garching. We are grateful to Daniel Barnes, Jeremiah Brackbill, Harold Grad, William Grossmann, Abraham Kadish, Peter Lax, Guthrie Miller, Arnulf Schliiter, and Harold Weitzner for many useful discussions of

the theory. We are especially indebted to Franz Herrnegger for theoretical and pedagogical comments. Constance Engle has provided outstanding assistance with the typescript. We take pleasure in acknowledging the help of the staff of the Courant Mathematics and Computing Laboratory at New York University. In particular we should like to express our thanks to Max Goldstein, Kevin McAuliffe, Terry Moore, Toshi Nagano and Tsun Tam. Become a proficient Odoo developer and increase your productivity while building Odoo business applications
Key Features
Set up the Odoo development environment and learn how to test and debug your code
Use the ORM framework to work with data and implement business logic
supporting business rules
Design user interfaces, web pages, and business reports using the Odoo framework's web components
Book Description
Odoo is fast becoming the reference open source platform for business applications thanks to the fact that it provides the infrastructure needed for developers to

deliver software solutions for any business process quickly. Odoo's layered module approach makes it particularly effective for combining and extending features. This updated fifth edition is a tutorial-style introduction to essential Odoo development topics. The book starts by covering the development essentials for building business applications and takes you through Odoo installation and configuration, gradually transitioning from having no specific knowledge of Odoo to being ready for application development. You'll then learn how to develop your first Odoo application, while covering topics such as models and views. Later chapters will get you up to speed with using server APIs to add business logic, helping you lay a solid foundation for advanced topics. As you progress, you'll get equipped to build and customize your applications and explore

the new features available in Odoo 12 and beyond, such as in-memory ORM and computed writable fields. Finally, you'll gain insights into building business logic and using the Odoo API to integrate with various applications. By the end of this book, you'll be able to build business apps from scratch using the latest version of Odoo. What you will learn

Install Odoo from source and organize the development environment
Create your first Odoo app from scratch
Understand the application components available in Odoo
Structure the application's data model using ORM features
Use the ORM API to implement the business logic layer
Design a graphical user interface (GUI) for the web client and website
Use the Odoo External API to interface with external systems
Deploy and maintain your application in production environments
Who this

book is for This book is for developers who want to learn Odoo application development and quickly become productive while creating business applications. Teachers, trainers, and Odoo team managers will also find the book useful for helping their students or trainees to learn Odoo development skills. The Message of Acts in Codex Bezae (vol 4) -

Jenny Read-Heimerdinger
2009-06-15

This is the final volume in the justifiably lauded four-volume commentary on the Book of Acts, presenting a fresh look at the text of Codex Bezae and comparing its message with that of the more familiar Alexandrian text - of which the Codex Vaticanus is taken as a representative. Where Codex Bezae is lacunary (after 22.29), other manuscripts that often support Bezan readings elsewhere are employed. Although based on the Greek text, the commentary aims to be accessible to those who are not familiar with Greek. It is intended to publish the entire Greek text of Codex Bezae following the publication of this fourth volume. The fourth volume addresses Acts 18.24-28.31, the chapters that cover the trial of Paul and the last stage of the mission to the Gentiles, culminating in Paul's

unhindered proclamation of the gospel in Rome. For each section, there is a side by side translation of the Vaticanus and Bezan manuscripts (or related alternatives after 22.29), followed by a full critical apparatus which deals with more technical matters, and finally, a commentary which explores in detail the differences in the message of the two texts. Of particular interest in this part of Acts is the evaluation made by the author of Paul's defence at his successive trials which, it is argued, is considerably less favourable than is commonly assumed.
