**Principles and Standards for School Mathematics** - 2000

This easy-to-read summary is an excellent tool for introducing others to the messages contained in *Principles and Standards. National Excellence* - Pat O'Connell Ross 1993

This report on the educational needs of American gifted and talented students identifies indicators of an educational crisis, describes the current status of education for these students, and presents recommendations to meet the educational needs of these students. Indicators demonstrating the need for change include the relatively poor performance by American students on international tests and the small number of students performing at the highest levels on National Assessment of Educational Progress tests. Recent studies have shown that gifted and talented elementary school students have mastered 35-40% of the curriculum in five basic subjects before they begin the school year; most regular classroom teachers make few, if any, provisions for talented students; highest achieving students study less than an hour a day; and only 2 cents out of every \$100 spent on K-12 education supports special opportunities for talented students. A review describes how gifted and talented students are currently identified, the number of students served, the kind of support available, the kind of education most gifted and talented students receive, and characteristics of effective programs for these students. Seven recommendations are offered: (1) set challenging curricular standards; (2) establish high-level learning opportunities; (3) ensure access to early childhood education; (4) increase learning opportunities for disadvantaged and minority children with outstanding talents; (5) broaden the definition of gifted (a broadened definition based on the federal Javits Gifted and Talented Education Act is offered); (6) encourage appropriate teacher training and technical assistance; and (7) match world performance. **U.S. History Detective** - Steve Greif 2015-03-01

The Current State of Social Studies - 1982

This volume, one in a series resulting from Project SPAN (Social Studies/Social Science Education: Priorities, Practices, and Needs), reviews and analyzes the current state of K-12 social studies. A major purpose of the review and analysis was to form a basis for recommendations for future directions that might be taken to improve social studies. The report contains six sections. The first section provides a broad and integrative analysis of the interrelated topics of rationales, definitions, approaches, goals, and objectives of social studies. The second section, "Curriculum

Organization in Social Studies," describes the typical pattern of social studies programs from kindergarten through grade 12, stating that despite numerous variations that have occurred, the dominant pattern throughout the nation is one that was established more than 60 years ago. "Social Studies Curriculum Materials," the third section of the volume, describes the great extent to which students, teachers, administrators, and the public accept and rely on curriculum materials as essential aids to teaching, learning, and classroom management. Foremost among curriculum materials being used are textbooks. The topic of the fourth section is "Social Studies Teachers." There is general agreement that the teacher is "the central figure," the "key," or "the magic ingredient" in the learning process. The fifth section, "Instructional Practices in Social Studies," presents a detailed report on what teachers do. The last section, "Barriers to Change in Social Studies," focusing on the fact that the new social studies had relatively little impact on the schools, explores reasons for lack of change in schools.
