Next, we introduce ACFS file system and provide steps to create and manage it. Real Application Clusters chapter explores steps to successfully create a RAC database on two nodes. With only few additional steps, you will successfully create a RAC database. Then you see the way how to create and configure ASM with command line interface. Once ASM is configured, silent RAC database creation steps are provided. Data Guard chapter starts by creating a data guard using

ORACLE 11G: SQL is an introduction to the fundamental SQL language used in all relational databases today. This textbook is not simply a study guide; it is written for those who have just a basic knowledge of databases and can be used in a course on this latest implementation of SQL from Oracle. There are hundreds of thousands of Oracle Certified Professional (OCP) DBAs around the world. Most of them aspire to become an Oracle Certified Master, but the difficulty level of the exam is off the charts and only a handful of the few that undertake the exam pass it. Comprising full hands-on labs and lasting for 14 hours over two days, the exam is among the most rigorous in the tech world. Indeed, to pass the exam, applicants are encouraged to take a year-long foundation course. What if you want to undertake study on your own? There are hardly any reference materials out there that provide a thorough coverage of the course syllabus and

test topics in a practical and concise manner--and in a way that will prepare you to pass the exam with flying colors. Oracle Certified Master Kamran Aghayev A., in his *Study Guide for Oracle Certified Master 11g Exam*, provides thorough coverage of the topics you must know in depth to become an OCM. The book covers almost 100 different subjects, bringing you from intermediate-level knowledge to the advanced and expert levels required to pass the test. What's more, at the end of each chapter, he gives you specific hands-on tasks and challenges that must be solved within a specific amount of time. These tasks will not only help you gain the confidence you need to tackle the OCM exam, but also be sure-footed while handling critical issues at work. The book, filled with real-life scenarios and examples, will prove to be useful even for someone who does not intend to take the exam. *Study Guide for Oracle*

Certified Master 11g Exam will ensure that you: Are ready for every single OCM topic by guiding you with clear concepts and practical hands-on experience. About the Author Darron Clark, OCP, PMP Recommendations Great Results, Personable, Expert "Having just passed his Oracle 10g Certified Master (OCM) (an extremely rare qualification indeed), Darron taught

me the 10g Real Application Clusters class. Without exaggeration, I can state that Darron's RAC class was orders of magnitude better than any other IT class that I have taken, and that it was because of his superior knowledge of the subject. I have made this comment about Darron numerous times to my DBA colleagues ever since I sat his class. Darron's Oracle knowledge is encyclopedic. He can answer not only any question about RAC, but also about any other aspect of Oracle, both in new technology areas, such as ASM, and the fundamentals, such as SQL*Net, memory, and PL/SQL. Every participant in his RAC class responded positively to his easy-going teaching style, which is a positive leadership trait. Finally, the significance of the OCM cannot be overstated. It means that Darron passed a high-pressure, two-day, hands-on lab examination that covers the full depth and breadth of the Oracle product, including

performance tuning, data warehousing, RAC, Data Guard, and other advanced subjects. A very low percentage of the candidates who take the OCM manage to pass it. His OCM is a true sign of Darron's Oracle technical expertise." January 6, 2009 Great Results, Expert, High Integrity "Darron is one of the smartest and most personable (can you say that about a DBA?) DBA's that I have ever worked with. He is technically very good at what he does, is trustworthy, reliable, and, while he worked with us, represented himself and the company extremely well. One of the most remarkable things about him is his ability to network, and he truly wants to help others --- in today's world, where most are out for me, myself and I, that's a great quality to possess. He will continue to touch

and help make the organization better even after he's gone. You can't say that about a lot of people working out there anymore " June 16, 2009 [OCP: Oracle Database 11g Administrator Certified Professional Study Guide](#) - Robert G.
