Making the Work-Based Safety Net Work Better - Carolyn J. Heinrich 2009-06-02

Work first. That is the core idea behind the 1996 welfare reform legislation. It sounds appealing, but according to *Making the Work-Based Safety Net Work Better*, it collides with an exceptionally difficult reality. The degree to which work provides a way out of poverty depends greatly on the ability of low-skilled people to maintain stable employment and make progress toward an income that provides an adequate standard of living. This forward-looking volume examines eight areas of the safety net where families are falling through and describes how current policies and institutions could evolve to enhance the self-sufficiency of low-income families. David Neumark analyzes a range of labor market policies and finds overwhelming evidence that the minimum wage is ineffective in promoting self-sufficiency. Neumark suggests the Earned Income Tax Credit is a much more promising policy to boost employment among single mothers and family incomes. Greg Duncan, Lisa Gennetian, and Pamela Morris find no evidence that encouraging parents to work leads to better parenting, improved psychological health, or more positive role models for children. Instead, the connection between parental work and child achievement is linked to parents' improved access to quality child care. Rebecca Blank and Brian Kovak document an alarming increase in the number of single mothers who receive neither wages nor public assistance and who are significantly more likely to suffer from medical problems of their own or of a child. Time caps and work hour requirements embedded in benefits policies leave some mothers unable to work and ineligible for cash benefits. Marcia Meyers and Janet Gornick identify another gap: low-income families tend to lose financial support and health coverage long before they earn enough to access employer-based benefits and tax provisions. They propose building "institutional bridges" that minimize discontinuities associated with changes in employment, earnings, or family structure. Steven Raphael addresses a particularly troubling weakness of the work-based safety net—its inadequate provision for the large number of individuals who are or were incarcerated in the United States. He offers tractable suggestions for policy changes that could ease their transition back into non-institutionalized society and the labor market. *Making the Work-Based Safety Net Work Better* shows that the "work first" approach alone isn't working and suggests specific ways the social welfare system might be modified to produce greater gains for vulnerable families.

The Asset Protection Scheme - Great Britain: National Audit Office 2010-12-21

The Treasury's Asset Protection Scheme to protect over £280 billion of Royal Bank of Scotland's financial assets against losses has, so far, only been partially successful in encouraging lending to creditworthy borrowers on the scale originally envisaged. The Scheme, launched in early 2009, initially involved two banks. RBS eventually put £282 billion of assets into the Scheme, while Lloyds Banking Group paid £2.5 billion to exit the Scheme in November 2009 and instead raised additional capital from shareholders. The principal elements of the Scheme, particularly the first loss, were based on a robust assessment of incentives and on as complete information on the underlying assets as were available at the time. As part of the Scheme, Lloyds and RBS agreed lending targets. While both banks met targets for mortgage lending, there was a shortfall of £30

billion against targets for lending to business. Value for money in the longer term will depend heavily on incentives built into the Scheme to encourage good management of assets. Establishing a requirement for RBS to bear the first £60 billion of losses (a 'first loss') was crucial in providing the right incentive for the bank to manage its assets effectively. However, if the first loss is exceeded, RBS will have less financial incentive to avoid further losses although the bank considers it will still have a legal and moral obligation to manage the assets as best it can. The position of taxpayers would be particularly vulnerable if losses were to exceed about £73 billion

Yearbook of Forest Products | Annuaire FAO des produits forestiers | Ежегодник лесной продукции ФАО | Anuario FAO de productos forestales 2018 - Food and Agriculture Organization of the United Nations 2020-08-01

The FAO Yearbook of Forest Products is a compilation of statistical data on basic forest products for all countries and territories of the world. It contains a series of annual data on the volume of production and the volume and value of trade in forest products. It includes tables showing the direction of trade and average unit values of trade for certain products. Statistical information in the yearbook is based primarily on data provided to the FAO Forestry Department by the countries through questionnaires or official publications. In the absence of official data, FAO makes an estimate based on the best information available.

Microfinance India - N Srinivasan 2010-01-20

Microfinance india: state of the Sector Report is a series of annual reports on the microfinance sector in India. The Report seeks to document developments, clarify issues, publicise studies, stimulate research, identify policy choices, generate understanding and enhance support for the sector. It is a comprehensive one-stop document that provides the latest data and a holistic view of the sector, combines analysis and description and integrates a variety of topics hitherto treated piecemeal. The Report highlights recent developments in Self Help Groups (SHGs) and SHB-Bank Linkage Programmes (SBLPs), and focuses on microfinance with regard to the investment scenario in India. It also deals with the burgeoning field of urban microfinance, developments in micro-insurance and the impact of new technologies on the microfinance sector. Additionally, it recognizes the high demands which the state makes on microfinance institutions and discusses the need and relevance of new policy regulations. Complementing these analyses, statistical annexures provide essential data on the sector, strengthening its utility as a reference document. It contains extensive original material, yet draws widely on the findings of other recent studies and reports, thereby providing a complete, detailed analysis of the status and the future of microfinance.

Deregulation and Efficiency of Indian Banks - Sunil Kumar 2013-10-23

The goal of this book is to assess the efficacy of India's financial deregulation programme by analyzing the developments in cost efficiency and total factor productivity growth across different ownership types and size classes in the banking sector over the post-deregulation years. The work also gauges the impact of inclusion or exclusion of a proxy for non-traditional activities on the cost efficiency estimates for Indian banks, and ranking of distinct ownership groups. It also investigates the hitherto neglected aspect of the nature of returns-to-scale in the Indian banking industry. In addition, the work explores the key bank-specific factors that explain the inter-bank variations in efficiency and productivity growth. Overall, the empirical results of this work allow us to ascertain whether the gradualist approach to reforming the banking system in a developing economy like India has yielded the most significant policy goal of achieving efficiency and productivity gains. The authors believe that the findings of this book could give useful policy directions and suggestions to other developing economies that have embarked on a deregulation path or are contemplating doing so.

Justice League Vol. 4: The Sixth Dimension - Scott Snyder 2019-11-19

THE JUSTICE LEAGUE IS VICTORIOUS. NOW THE TRUE BATTLE BEGINS! Far beyond the realms of our understanding lies the sixth dimension--the control room of the Multiverse, where cosmic beings set our fates in motion long ago. Now, with our Multiverse hurtling toward a final judgment it will not survive, our only hope lies in the sixth dimension. No mortals have ever visited it...but the Justice League are no mere mortals! Through the doorway to the sixth dimension, the Justice League discovers a future version of Earth, where the hard choices have already been made and the Multiverse has already been saved. All they need to do now is accept this gift, and their battle will be over. But the easy choice is never as easy as it seems. As the Justice League learns the terrible secret of this seeming paradise, Superman must fight to free himself from an impossible trap--a universe designed just to imprison him. With a powerful being and an entire world aligned against our heroes, will the fate of the Justice League and the entire Multiverse come down to an assist from the Legion of Doom? Tying into DC's "Year of the Villain" event, Scott Snyder (BATMAN: LAST KNIGHT ON EARTH), Jorge Jimenez (SUPERMAN), Javier Fernandez (GREEN ARROW), James Tynion IV (JUSTICE LEAGUE DARK) and Francis Manapul (THE FLASH) take the World's Greatest Super Heroes past the thresholds of imagination, into previously uncharted territory! Collects JUSTICE LEAGUE #19-28.

Emigration and the Labouring Poor - Robin F. Haines 1997
Robin Haines has analysed the origins, occupations, literacy, and mobilization of emigrants recruited in the UK on behalf of colonial legislatures. Her exploration of strict selection procedures shows that the symbiosis between the clergy, empire-minded philanthropic societies, and parishes, which combined to fund the emigrants' considerable pre-departure expenses, increased the opportunities for underemployed rural and domestic workers during an era of farm rationalization and industrial restructuring. Although poor, hybrid state and private funding enabled them to relocate to Australia where their skills were in demand.

Geographical Information Systems for Urban and Regional Planning - Henk J. Scholten 2013-03-09

In August 1989, a Summer Institute was held at the Academie van Bouwkunst, the seventeenth century home of Amsterdam's School of Architecture, Town Planning and Landscape. The meeting brought together experts in Geographical Information Systems from throughout the world to address an international audience of planners. The contents of this book reflect many of the themes that were presented and discussed at the conference. The Summer Institute, let alone this volume, would not have been possible without the support of the International Association for the Development and Management of Existing and New Towns (INTNAIVN), the International Society of City and Regional Planners (ISoCaRP), The National Physical Planning Agency of the Netherlands (RPD) and the Berlage Studio. We wish to acknowledge the assistance provided by these organisations and by the various sponsors: The Ministry of Housing, Physical Planning and Environment, the Municipality of Amsterdam, Logisterion b.v., ESRI, UNISYS, MABON b.v., SPSS, PRIME Computer Inc., PANDATA. The provision of hardware facilities by the various computer companies allowed immensely valuable 'hands on' experience to be gained by all the participants.

Innovative Neuromodulation - Jeffrey E. Arle 2017-02-14

Innovative Neuromodulation serves as an extensive reference that includes a basic introduction to the relevant aspects of clinical neuromodulation that is followed by an in-depth discussion of the innovative surgical and therapeutic applications that currently exist or are in development. The Best Service is No Service - Bill Price 2011-09-14

In this groundbreaking book, Bill Price and David Jaffe offer a new, game-changing approach, showing how managers are taking the wrong path and are using the wrong metrics to measure customer service. Customer service, they assert, is only needed when a company does something wrong—eliminating the need for service is the best way to satisfy customers. To be successful, companies need to treat service as a data point of dysfunction and figure what they need to do to eliminate the demand. The Best Service Is No Service outlines these seven principles to deliver the best service that ultimately leads to "no service": Eliminate dumb contacts Create engaging self-service Be proactive Make it easy to contact your company Own the actions across the company Listen and act Deliver great service experiences
