**Musical Performance** - Stan Godlovitch 2002-01-31  
Most music we hear comes to us via a recording medium on which sound has been stored. Such remoteness of music heard from music made has become so commonplace it is rarely considered.

**Musical Performance: A Philosophical Study** considers the implications of this separation for live musical performance and music-making. Rather than examining the composition or perception of music as most philosophical accounts of music do, Stan Godlovitch takes up the problem of how the tradition of active music playing and performing has been challenged by technology and what problems this poses for philosophical aesthetics. Where does the value of musical performance lie? Is human performance of music a mere transfer medium? Is the performance of music more expressive than recorded music? Musical Performance poses questions such as these to develop a fascinating account of music today. musicians - but via some recording medium on which sound has been stored. Knowing Music, Making

Music - Benjamin Brinner  
1995-12

Using illustrative examples from a variety of traditions, Benjamin Brinner first examines the elements and characteristics of musical competence, the different kinds of competence in a musical community, the development of multiple competences, and the acquisition and transformation of competence through time. He then shows how these factors come into play in musical interaction, establishing four intersecting theoretical perspectives based on ensemble roles, systems of communication, sound structures, and individual motivations. These perspectives are applied to the dynamics of gamelan performance to explain the social, musical, and contextual factors that affect the negotiation of consensus in musical interaction. The discussion ranges from sociocultural

norms of interpersonal conduct to links between music, dance, theater, and ritual, and from issues of authority and deference to musicians' self-perceptions and mutual assessments.

**Worship His Majesty** -

Jack W. Hayford 2000

-- All-new, expanded version of the classic book that set the tone for the contemporary worship movement -- The signature book from worship pioneer Jack Hayford, founding pastor of one of the best-known churches in America, The Church On The Way --

Integrity Music will be co-promoting this product along with their music CD of the same title from Jack Hayford. The Father certainly doesn't need our praise, yet He prescribes worship as a daily activity. Why? Because, as pastor Jack Hayford clearly shows us, God graces His people with worship as a gift, not a demand. Worship liberates all of God's people to discover genuine wholeness, but only as they recognize and acknowledge the holiness of God. Hayford examines the lives of more than a dozen biblical figures to illuminate the fulfilling effects of worship -- including seven truths Jesus revealed about the blessings of praise. God's grace fills everything He gives -- and everything He calls us to do. And this same grace overflows in a special and unique way on all of us who humbly and wholeheartedly worship God.

*Structure and Style*, first published in 1962 and expanded in 1979, fills the need for new ways of analysis that put 20th-century music in perspective. It spans forms in use before 1600 through forms and techniques in use today. *Anthology of Musical Forms* provides musical examples of forms treated in *Structure and Style*. Some examples are analyzed throughout. Most are left for the student to analyze. These books reflect Leon Stein's impressive background as student,

musician, and composer. Stein studied composition with Leo Sowerby, Frederick Stock (conductor of the Chicago Symphony) and orchestration with Eric DeLamarter, his assistant. He earned M. Mus and Ph.D degrees at DePaul University and was associated with its School of Music as director of the Graduate Division and chairman of the Department of Theory and Composition until his retirement in 1976. He has composed a wide variety of works, including compositions for orchestra, chamber combinations, two operas, and a violin concerto.

**Music and Trance** - Gilbert Rouget 1985-12-15  
Ritual trance has always been closely associated with music—but why, and how? Gilbert Rouget offers an extended analysis of music and trance, concluding that no universal law can explain the relations between music and trance; they vary greatly and depend on the system of meaning of their cultural context. Rouget rigorously examines a

worldwide corpus of data from ethnographic literature, but he also draws on the Bible, his own fieldwork in West Africa, and the writings of Plato, Ghazzali, and Rousseau. To organize this immense store of information, he develops a typology of trance based on symbolism and external manifestations. He outlines the fundamental distinctions between trance and ecstasy, shamanism and spirit possession, and communal and emotional trance. Music is analyzed in terms of performers, practices, instruments, and associations with dance. Each kind of trance draws strength from music in different ways at different points in a ritual, Rouget concludes. In possession trance, music induces the adept to identify himself with his deity and allows him to express this identification through dance. Forcefully rejecting pseudo-science and reductionism, Rouget

demystifies the so-called theory of the neurophysiological effects of drumming on trance. He concludes that music's physiological and emotional effects are inseparable from patterns of collective representations and behavior, and that music and trance are linked in as many ways as there are cultural structures.

**Sold American** - Charles F. McGovern 2009-01-06

At the turn of the twentieth century, an emerging consumer culture in the United States promoted constant spending to meet material needs and develop social identity and self-cultivation. In *Sold American*, Charles F. McGovern examines the key players active in shaping this cultural evolution: advertisers and consumer

advocates. McGovern argues that even though these two professional groups invented radically different models for proper spending, both groups propagated mass consumption as a specifically American social practice and an important element of nationality and citizenship. Advertisers, McGovern shows, used nationalist ideals, icons, and political language to define consumption as the foundation of the pursuit of happiness. Consumer advocates, on the other hand, viewed the market with a republican-inspired skepticism and fought commercial incursions on consumer independence. The result, says McGovern, was a redefinition of the citizen as consumer. The articulation of an "American Way of Life" in the Depression and World War II ratified consumer abundance as the basis of a distinct American culture and history.

**Echoes from the East -**

Kiyoshi Tamagawa

2019-12-15

One of the most admired qualities of Claude Debussy's music has been its seemingly effortless evocation and assimilation of exotic musical strains. He was the first great European composer to discern the possibilities inherent in the gamelan, the ensemble consisting mainly of tuned percussion instruments that originated in Java. *Echoes from the East: The Javanese Gamelan and its Influence on the Music of Claude Debussy* argues Debussy's encounter with the gamelan in 1889 at the Paris Exposition Universelle had a far more profound effect on his work and style than can be grasped by simply looking for passages and pieces in his output that sound "Asian" or "like a gamelan." Kiyoshi Tamagawa recounts Debussy's individual

experience with the music of Java and traces its echoes through his entire compositional career.

*Echoes from the East* adds a commentary on the modern-day issue of cultural appropriation and a survey of Debussy's contemporaries and successors who have also attempted to merge the sounds of the gamelan with their own distinctive musical styles.

The Shaping Forces in

Music - Ernst Toch

1977-01-01

A masterful and original classical composer as well as a renowned composer of film scores, Ernst Toch (1887-1964) made a permanent contribution to music in this important and widely praised book. Based

on a series of lectures given at Harvard in 1944 and first published in 1948, this book is a brilliant examination of the materials and concepts that are the basic building blocks of music harmony, melody, counterpoint, and form. An admirable reconciliation of traditional and modern (mainly 12-tone) trends in composition, this book shows all types of writing must respond to psychological wants of the listener and how similar goals may be achieved in seemingly opposed styles. Illustrating his discussion with 390 musical examples, Toch not only introduces new ideas and approaches, but examines many age-old problems with clarity and precision consonance and dissonance, form versus number, and more. His analysis of the expanding harmonic universe, the wave line of melody, and the formative influence of movement are particularly penetrating. New to this edition are a biological

introduction by Toch's grandson, Lawrence Weschler; a previously unpublished letter from Thomas Mann to Toch about this book (in English translation); and a complete checklist of Toch's

compositions. Intended for all those who have a minimum understanding of musical notation and theory, this book will appeal to music lovers, practical musicians and amateurs, and incipient composers."
