## **Use of Market Data in the Recruitment of High Potentials** - Jan Posthumus 2015-06-18

In his study, Jan Posthumus uses the grounded theory method to explore the implementation of marketing instruments such as segmentation and targeting in the recruitment of high potentials in the pharmaceutical industry. The implementation of these instruments can best be understood as the result of an interaction between four categories: the identified internal need for certain groups of high potentials; the scarcity of these groups of high potentials in the market; the attitudes, opinions, and strategies within human resources; and the technological capabilities. Depending on the situation, different recruitment instruments are used to recruit high potentials. However, the interviewees did not use an explicit high potential recruitment profile, though they implicitly search for varying combinations of high-potential characteristics such as: intelligence and agility, engagement, the ability to perform in various environments, and the

ability to manage one's energy levels.

### **The Transformation of American Sex Education** - Ellen S. More 2022-01-11

A comprehensive history of the battle over sex education in the United States Mid-century America had a problem talking about sex. Dr. Mary Calderone first diagnosed this condition

and, in 1964, led the uphill battle to de-stigmatize sex education. Supporters hailed her as the “grandmother of modern sex education” while her detractors painted her as an “aging libertine,” but both could agree that she was quickly shaping the way sex was discussed in the classroom. Part biography, part social history, *The Transformation of American Sex Education* for the first time situates Dr. Mary Calderone at the center of decades of political, cultural, and religious conflict in the fight for comprehensive sex education. Ellen S. More examines Americans’ attempts to come to terms with the vexed subject of sex education in schools from the late 1940s to the early twenty-first century. Using Mary Calderone’s life and career as a touchstone, she traces the origins of modern sex education in the United States from the work of a group of reformers who coalesced around Calderone to create the Sexuality Information and Education Council of the United States (SIECUS) in 1964, to the development and use of

the competing approaches known as “abstinence-based” and “comprehensive” sex education from the 1980s into the twenty-first century. A fascinating and timely read, *The Transformation of American Sex Education* provides a substantial contribution to the history of one of America’s most intense and protracted culture wars, and the first account of the woman who fought those battles.
