[Tyler's Honest Herbal](#) - Steven

Foster 1999
"Researchers, get busy!" and "caveat emptor" are the messages of this iteration (last, 1993; first, 1982) by herbalists Tyler (pharmacognosy, Purdue U.) and Foster, as they cull herbs' healing virtues from the hype. Alphabetical entries from alfalfa to yucca provide: a brief description, proper nomenclature, plant from which derived, comments on usage, accessible discussion of the chemistry/pharmacology of its active components, evaluation of probable utility, and references. A 16-page summary chart may alone be worth the price. No illustrations, though. Annotation copyrighted by Book News, Inc., Portland, OR *Hoosier Home Remedies* - 1985 With a sense of urgency, Dr. Tyler has collected and transcribed some 750 folk remedies still alive in the memories of more than 175 Hoosier-area correspondents. The pharmacologist, who has thirty years of experience with natural-product remedies, fears these cures will soon be

forgotten, since modern medicine usually writes them off as hoax, and those who practice them are becoming fewer and fewer. For Tyler, however, folk medicine is worthy of scientific research; after all, scientists discovered morphine from opium poppy, digoxin from foxglove, and ergotamine from ergot fungus by observing the efficacy of these ancient folk remedies. By suggesting further investigation of some remedies, warning readers against downright dangerous cures, and noting the constitutive ingredients of those proven effective, Tyler invites further illumination of this shady region between superstition and science while entertaining his reader with much fascinating medical lore. Hoosiers, folklore followers, physicians, and pharmacologists will appreciate the meticulous clarity of Tyler's scientific commentary on folk medicines. Pharmacognosy - Varro E. Tyler 1988
