Popular with trainee surgeons preparing for the oral element of the MRCS (the objective structured clinical examination, or OSCE), this revision guide will maximise the chances of success in surgical examinations.

Conducting Your Pharmacy Practice Research Project - Felicity J. Smith 2020

The Unofficial Guide to Prescribing e-book - Zeshan Qureshi
2014-01-31

The Unofficial Guide to Prescribing lays out the practical steps of how to assess, investigate and manage a patient, with a focus on what to prescribe and how to prescribe it. Its aim is to empower newly graduated junior doctors to excel at dealing with emergencies and handling complex prescribing scenarios. Prescribing errors cost healthcare systems millions annually, so early training in prescribing has become an urgent priority of medical education and now forms an essential part of teaching and assessment. The Unofficial Guide to Prescribing (from the same stable as The Unofficial Guide to Passing OSCEs) is a new book designed to address this requirement. It is written by junior doctors still close to the transition from theory to practice, overseen by a review panel of senior clinicians to ensure accuracy, and designed to help medical students practise and learn as much as possible about prescribing, in actual clinical scenarios, before they have to do it for real. Each scenario is presented as you would see it in the hospital setting and covers: Initial step-by-step assessment of the patient: how to assess, assessment findings, and immediate management Initial investigations Initial management Reassessment Treatment Handing over the patient 'Prescribe' alerts throughout Written-up drug charts Blank drug charts for copying and practice

Drugs in Use - Linda J. Dodds 2013

Drugs in Use is a popular textbook that addresses one of the key issues for pharmacy students – putting their learning into practice. The text presents a series of clinical case studies to illustrate how pharmacists can optimize drug therapy in response to the needs of individual patients.

Clinical Pharmacy and Therapeutics - Roger Walker 2003

The new edition of this popular, well-established textbook addresses the expanding role of the pharmacist in treating patients. It covers treatment of common diseases as well as other medical, therapeutic and patient related issues. Written by both pharmacists and clinicians to reflect a team approach, it offers an in-depth analysis of drug therapy in the treatment of disease, relying on input from the pharmacist as a member of the "team" in hospital and community settings. Information is easy to locate in a logical format organized primarily by systems and disorders.

Student Perceptions in the Classroom - Dale H. Schunk
2012-10-12

This book's two primary objectives are to present theory and research on the role of learners' achievement-related perceptions in educational contexts and to discuss the implications of this research for educational practices. Although contributors share the view that students' perceptions exert important effects in achievement settings, they differ in diverse ways including their theoretical orientation, their choice of research methodology, the perceptions they believe are of primary importance, and the antecedents and consequences of these perceptions. They discuss the current status of their ideas and provide a forward look at research and practice.

OSCE Stations for Medical Finals - Adam Feather 2012

This second new OSCE title delivers another set of up to date popular cases encountered on the wards and in the exams. OSCE Stations for Medical Finals Book 2: Scenarios is created to reflect current exam topics, each scenario is subdivided into 4 to 6 related tasks. The reader is guided through stations covering:

history taking, clinical signs, data interpretation, and clinical therapeutics. By working methodically through the tasks the authors hope to promote the application and utilisation of knowledge and skills, asking candidates to think and act on the clinical information they have gathered. As the stations and tasks are linked, the candidate starts at station 1, and moves through each of the subsequent stations in the given order. Mirroring the real world, each task would be performed on the same patient.

Home Blood Pressure Monitoring - George S. Stergiou 2019-10-31
Hypertension remains a leading cause of disability and death worldwide. Self-monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and management of hypertension. Unfortunately, in clinical practice, home blood pressure monitoring is often inadequately implemented, mostly due to the use of inaccurate devices and inappropriate methodologies. Thus, the potential of the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted. This volume presents the available evidence on home blood pressure monitoring, discusses its strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Written by distinguished international experts, it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension.

OSCEs for the Final FFICM - Raj Nichani 2016-07-28

Comprehensive coverage of key topics for the FFICM OSCE examination, based on actual exam questions and modelled to the curriculum.

OSCE Cases with Mark Schemes - Susan Shelmerdine 2012

Medical students often feel they understand the theory behind the clinical aspect of medicine but seldom have enough chance to put what they learn into practice. In addition, clinical examinations pose a challenge to students who may be technically and theoretically excellent, but who have poor examination technique.

It is quite common for students to lack understanding of how they will be marked, how much emphasis to place upon certain actions or how much detail is expected of them. 'OSCE CASES WITH MARK SCHEMES' is intended to fill this gap. It provides OSCE mark schemes to reflect the real OSCE experience, by encouraging self assessment when practicing the clinical scenarios. The book includes chapters on communication skills, medical ethics, explanation stations, paediatrics and obstetrics and gynaecology subjects which are sometimes neglected elsewhere. All four authors have taken part in medical student teaching and OSCE examinations. They understand what will earn marks in the actual exam. All the OSCE scenarios are from stations previously examined in the UK's top medical schools. This book prepares the student for what the actual finals exam will be like. CONTENTS: SECTION ONE, COMMUNICATION STATIONS - Presenting Complaints - Psychiatry History Taking - Pediatrics History Taking - Obstetrics History Taking - Gynaecology History Taking - Medical Ethics - Difficult Communication Scenarios - Pharmacology - Consenting - Explanation of Management and Results SECTION TWO, PERFORMANCE STATIONS - Examination Skills - Practical Skills - Data Interpretation - Closing Remarks Physical Examination for Surgeons - Petrut Gogalniceanu 2015-06-25

A concise and highly visual guide to postgraduate physical examination for the MRCS exam, from an expert panel of surgeons.

Community Pharmacy - Paul Rutter 2016-12-03

Now in its fourth edition, this best-selling book is fully updated to address the ever increasing demands on healthcare professionals to deliver high-quality patient care. A multitude of factors impinge on healthcare delivery today, including an ageing population, more sophisticated medicines, high patient expectation and changing health service infrastructure. Time demands on primary care doctors have caused other models of service delivery to be adopted across the world, leading to ongoing changes in the traditional boundaries of care between doctors, nurses, and pharmacists. Certain medical tasks are now being performed by nurses and pharmacists, for example prescribing. Healthcare policies to encourage patients to manage their own health have led to more medicines becoming available over the counter, allowing community pharmacists to manage and treat a wide range of conditions. Further deregulation of medicines to treat acute illness from different therapeutic areas seems likely. Government policy now encourages chronic disease management as a self-care activity, and could well be the largest area for future growth of reclassification of medicines. Pharmacists, now more than ever before, need to be able to recognise the signs and symptoms, and use an evidence-based approach to treatment. Community Pharmacy is intended for all non-medical prescribers

but especially for pharmacists, from undergraduate students to experienced practitioners. Key features Guidance for arriving at a differential diagnosis Practical prescribing tips Trigger points for referral boxes Other hints and tips boxes Specific questions to ask boxes Case studies Self-assessment questions Consistent approach gives: Anatomy overview History taking and physical examination Prevalence and epidemiology Aetiology Arriving at a differential diagnosis Clinical features Conditions to eliminate Likely causes Unlikely causes Very unlikely causes Evidence base for OTC medicine Practical prescribing and product selection More on the examination of eyes, ears and mouth New sections on future-proofing (vaccinations etc.) New material covering inter-professional education for clinical skills. Now on StudentConsult Oxford Handbook of Clinical Pharmacy - Phil Wiffen 2012-01-26 This handbook is the definitive quick reference guide to clinical pharmacy, providing practising and student pharmacists with a wealth of practical information.

Essential Examination, Third Edition - Alasdair K. B. Ruthven 2015-11-11

Paediatric Clinical Examination Made Easy - Denis Gill 2017-03-09

Fully revised, this is an updated new edition of a much-loved book which has built a reputation for pithy, entertaining good sense over the course of six editions. 'Children are different. Paediatrics

is much more than medicine miniaturised.' From reviews of the previous edition: 'All in all a very handy book for the student, the resident or other professionals working with children. I had a lot of fun reading it.' 'The book is full of wonderful illustrations, and funny and profound advice with quotations, like the words of Sir Dominic Corrigan (1853): "The trouble with many doctors is not that they do not know enough but that they do not see enough", or the advice to teach thy tongue to say "I do not know" (Rabbi Moses Maimonides or Rambam, 1135-1204). I have used this book for my final medical year paediatrics exams, the DCH and the MRCP and it has been a great help. It reminds us of the most important and basic things - history and examination, and of course a friendly demeanour.' Short, manageable chapters Clinical examples of examination techniques Very helpful tips and topics section Clinical checklists Simply illustrated Updated throughout New section of 'questions of fives' questions Short glossary of Latin terms

Pharmacy OSCEs and Competency-based Assessments - Sharon Haughey 2017-04-17

Patient safety is now a very strong focus of pharmacy degrees. Competency-based evaluations of pharmacy students using simulated assessments including Objective Structured Clinical Examinations (OSCEs) and Criterion Referenced Assessments (CRAs) are increasingly commonplace. These are designed to simulate aspects of real-life pharmacy practice in order to train students to integrate their knowledge of medicinal chemistry,

pharmaceutics, therapeutics, legislation, clinical skills, numeracy, communication and empathy, and to test a student's ability to provide safe and effective patient care. This book provides a unique resource to support students and trainers in developing and practising these essential skills. It is designed as a useful resource for undergraduate students, clinical tutors and those involved in teaching students on pharmacy degree courses.

The Top 100 Drugs - Andrew Hitchings 2018-10-25

Now in its second edition, this highly successful guide to safe prescribing of the most common classes of drugs is your starting point for safe and effective practice. The first edition was a direct response to requests from students for a compendium of the 100 most important drugs in the NHS. Research led by Professor Emma Baker identified the 'top 100 drugs' by their importance and prescribing frequency. The top 100 drugs and the five most important intravenous fluids are presented using a clear, consistent layout across double-page spreads. Drugs are arranged alphabetically and also listed by organ system and clinical indication, providing multiple pathways into the information. Clinical pharmacology is discussed under the headings: common indications; mechanisms of action; important adverse effects; warnings; and important interactions. Practical prescribing is discussed under the headings: prescription; administration; communication; monitoring; and cost. A clinical tip is presented for

every drug. Single-best-answer questions are provided for self-assessment and to show how information from several drugs may be integrated.
