The Scale of Perfection - Walter Hilton
2001-02-01
Walter Hilton's *The Scale of Perfection* maintains a secure place among the major religious treatises composed in fourteenth-century England. This guide to the contemplative life, written in two books of more than 40,000 words each, is notable for its careful explorations of its religious themes and

also as a monument of Middle English prose. Its popularity is attested by the fact that some forty-two manuscripts containing one or both of the books survive, with a relatively large number of manuscripts with Book I alone, which suggests it may have been the more popular of the two. Hilton (born c. 1343) was a member of the religious order known as the Augustinian Canons. There is reason to believe that he was trained in canon law and studied at the University of Cambridge. He was the author of a number of works in English and Latin, all much shorter than *The Scale*. He died at the Augustinian Priory of Thurgarton in Nottinghamshire in 1396. On the basis of the content of certain of his works it can be safely inferred that he was actively involved in some of the religious controversies current in England in the 1380s and 1390s, and his principal concern, evident in *The Scale*, is to defend orthodox belief, especially in the conduct of the contemplative life.

Dressed - Shahidha Bari
2020-03-17

Perfect for readers of *Women in Clothes*, this beautifully designed philosophical guide to fashion explores art, literature, and film to uncover the hidden meaning of a well-chosen wardrobe. We all get dressed. But how often do we pause to think about what our clothes say? When we dress ourselves, we are presenting to the world an

essence of who we are, who we want to be. Dressed ranges freely from suits to suitcases, from Marx's coat to Madame X's gown. Through art and literature, film and philosophy, philosopher Shahidha Bari unveils the surprising personal implications of what we choose to wear. The impeccable cut of Cary Grant's suit projects masculine confidence, just as Madonna's oversized denim jacket and her armful of orange bangles loudly announces big ambition. How others dress tells us something fundamental about them -- we can better understand how people live and what they think through their garments. Clothes tell our stories. Dressed is the thinking person's fashion book. In baring the hidden power of clothes in our culture and our daily lives, Bari reveals how our outfits not only cover our bodies but also reflect our minds. !--[if !supportAnnotations]-- !--[endif]--

Blood on the Moon - Edward Steers 2005-10-21
Winner of the 2001 The Lincoln Group of New York's Award of Achievement A History Book Club Selection The assassination of Abraham Lincoln is usually told as a tale of a lone deranged actor who struck from a twisted lust for revenge. This is not only too simple an explanation; Blood on the Moon reveals that it is completely wrong. John Wilkes Booth was neither mad nor alone in his act of murder. He received the help of many, not the least of whom was Dr. Samuel Alexander Mudd, the Charles County physician who has been portrayed as the innocent victim of a vengeful government. Booth was also aided by the Confederate leadership in Richmond. As he made his plans to strike at Lincoln, Booth was in contact with key members of

the Confederate underground, and after the assassination these same forces used all of their resources to attempt his escape. Noted Lincoln authority Edward Steers Jr. introduces the cast of characters in this ill-fated drama, he explores why they were so willing to help pull the trigger, and corrects the many misconceptions surrounding this defining moment that changed American history. After completing an acclaimed career as a research scientist at the National Institutes of Health, Edward Steers Jr. has turned his research skills to the Lincoln assassination. He is the author of several books about the president, including The Trial. He lives in Berkeley Springs, West Virginia.

Attitudes Towards the Past in Antiquity - Brita Alroth 2014

"This volume brings together twenty-eight papers from an International conference on attitudes towards the past and the creating of identities in Antiquity. The volume addresses many different approaches to these issues, spanning over many centuries, ranging in time from the Prehistoric periods to the Late Antiquity, and covering large areas, from Britain to Greece and Italy and to Asia Minor and Cyprus. The papers deal with several important problems, such as the use of tradition and memory in shaping an individual or a collective identity, continuity and/or change and the efforts to connect the past with the present. Among the topics discussed are the interpretation of literary texts, e.g. a play by Plautus, the Aeneid, a speech by Lykurgos, poems by Claudian and Prudentius, and of historical texts and inscriptions, e.g. funerary epigrams, and the analysis of the iconography of Roman coins, Etruscan reliefs, Pompeian and Etruscan frescoes and Cypriote sculpture, and of architectural remains of houses, tombs and temples. Other topics are religious festivals, such as the Lupercalia, foundation myths, the image of the emperor on coins and in literature, the significance of intra-urban burials, forgeries connected with the Trojan War, Hippocrates and Roman martyrs"--

The chapters in this book are divided into two parts: Part One looks at the biodiversity of planarian species, the molecular orchestration of regeneration, ecology of planarians in their natural habitats and their history as lab models. Part Two talks about experimental protocols for studying planarians, ranging from the establishment of a planarian research colony, to RNA and DNA extraction techniques, all the way to single stem cell transplantations or metabolomics analysis. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Comprehensive and cutting-edge, *Planarian Regeneration: Methods and Protocols* is a valuable resource for both newcomers to the field and experts within established planarian laboratories.

The Irish Question - Lawrence J. McCaffrey 2021-05-11

The many dimensions of the Irish Question, 1800-1922, constituted the most emotion-laden problem in British politics, often to the detriment of other imperial interests—a Gordian knot only severed by the establishment of the Irish Free State in 1922. In this volume Lawrence J. McCaffrey presents a coherent view of the evolution of Irish nationalism since 1800 and the impact of the Irish Question on British culture, politics, and institutions. The emotional nexus of the Irish Question was the religious issue, but McCaffrey believes that nationalism emerged from the attempt of the Irish Protestant minority, supported by Britain, to maintain religious, political, economic, and social ascendancy over a deprived and resentful majority. Although British concessions to Irish agitation removed many grievances—granting to Ireland

virtual religious equality, along with substantial social, economic, and political reforms—nationalism, often frustrated in its attempts to secure reform and freedom, assumed an increasingly rigid position. Nationalists were not willing to settle for less than self-government, and as constitutional methods failed to achieve this goal, violence seemed the only other alternative. The bitter dissensions created by the Irish Question left permanent marks upon British politics and institutions. The efforts of two Prime Ministers, Peel and Gladstone, to resolve the conflict split their parties, thus contributing to political confusion and instability. But the Irish nationalist-British Liberal alliance achieved improvement in the condition of Ireland and speeded advancement of democracy in Britain. And the attempt of British politicians to deal with the economic and social aspects of the Irish Question undermined laissez faire and encouraged the progress of the welfare state in both islands. On the other hand, the challenge of Irish nationalism sustained and stimulated the no-Popery roots of British nativism, making it an influential factor in politics until early in the twentieth century. The Irish Question, McCaffrey believes, has particular relevance in our contemporary world of emerging nations, wars of liberation, and tensions between majorities and minorities. Ireland offers an early example of the dreams of cultural nationalists becoming realities and of the sobering fact that ideological revolutionaries often make poor practical politicians.

Reading Law - Antonin Scalia 2012

In this groundbreaking book, Scalia and Garner systematically explain all the most important principles of constitutional, statutory, and contractual interpretation in an engaging and informative style with hundreds of illustrations from actual cases. Is a burrito a sandwich? Is a corporation entitled to personal privacy? If you trade a gun for drugs, are you using a gun in a drug transaction? The authors grapple with these and dozens of equally curious questions while

explaining the most principled, lucid, and reliable techniques for deriving meaning from authoritative texts. Meanwhile, the book takes up some of the most controversial issues in modern jurisprudence. What, exactly, is textualism? Why is strict construction a bad thing? What is the true doctrine of originalism? And which is more important: the spirit of the law, or the letter? The authors write with a well-argued point of view that is definitive yet nuanced, straightforward yet sophisticated.

Warraparna Kurna! - Rob Amery 2016-02-22

This book tells the story of the renaissance of the

Kurna language, the language of Adelaide and the Adelaide Plains in South Australia, principally over the earliest period up until 2000, but with a summary and brief discussion of developments from 2000 until 2016. It chronicles and analyses the efforts of the Nunga community, and interested others, to reclaim and relearn a linguistic heritage on the basis of mid-nineteenth-century materials. This study is breaking new ground. In the Kurna case, very little knowledge of the language remained within the Aboriginal community. Yet the Kurna language has become an important marker of identity and a means by which Kurna people can further the struggle for recognition, reconciliation and liberation. This work challenges widely held beliefs as to what is possible in language revival and questions notions about the very nature of language and its development.

Anarchy and Art - Allan Antliff 2007-04-01

One of the powers of art is its ability to convey the

human aspects of political events. In this fascinating survey on art, artists, and anarchism, Allan Antliff interrogates critical moments when anarchist artists have confronted pivotal events over the past 140 years. The survey begins with Gustave Courbet's activism during the 1871 Paris Commune (which established the French republic) and ends with anarchist art during the fall of the Soviet empire. Other subjects include the French neoimpressionists, the Dada movement in New York, anarchist art during the Russian Revolution, political art of the 1960s, and gay art and politics post-World War II. Throughout, Antliff vividly explores art's potential as a vehicle for social change and how it can also shape the course of political events, both historic and present-day; it is a book for the politically engaged and art aficionados alike. Allan Antliff is the author of *Anarchist Modernism*.

Global Political Ecology - Richard Peet 2010-12-17

The world is caught in the mesh of a series of environmental crises. So far attempts at resolving the deep basis of these have been superficial and disorganized. *Global Political Ecology* links the political economy of global capitalism with the political ecology of a series of environmental disasters and failed attempts at environmental policies. This critical volume draws together contributions from twenty-five leading intellectuals in the field. It begins with an introductory chapter that introduces the readers to political ecology and summarizes the book's main findings. The following seven sections cover topics on the political ecology of war and the disaster state; fuelling capitalism: energy scarcity and abundance; global governance of health, bodies, and genomics; the contradictions of global food; capital's marginal product: effluents, waste, and garbage; water as a commodity, a human

right, and power; the functions and dysfunctions of the global green economy; political ecology of the global climate, and carbon emissions. This book contains accounts of the main currents of thought in each area that bring the topics completely up-to-date. The individual chapters contain a theoretical introduction linking in with the main themes of political ecology, as well as empirical information and case material. *Global Political Ecology* serves as a valuable reference for students interested in political ecology, environmental justice, and geography.

David O. McKay Around the World - Hugh J.

Cannon 2005

Many years before he became the leader of The Church of Jesus Christ of Latter-day Saints, David O. McKay spread the gospel on an extraordinary mission around the world. This mission broadened the horizons of the Church. In 1920, Elder McKay was formally called by President Heber J. Grant to visit the Orient, the Pacific and Asia. Elder McKay selected Hugh J. Cannon, a son of George Q. Cannon and the Liberty Stake President, to accompany him. Over the course of a year, from December 4, 1920 to December 23, 1921, they sought out Church members in remote areas, and they had numerous spiritual experiences that demonstrated the hand of the Lord in their efforts. Their many accomplishments included visits to China, Egypt, and many Pacific islands. Following their return to the United States, Elder McKay asked President Cannon to write down these experiences, which he did. The completed handwritten manuscript was misplaced and not found for many years. Now, nearly a century later, the details of that historic journey have finally come forth.

The Early Oxford Press - Falconer Madan 1895

An Approach to the Book of Mormon - Hugh

Nibley 2011-10-01

Race and Ethnicity - Stephen Spencer 2014-03-14

Broad-ranging and comprehensive, this completely revised and updated textbook is a critical guide to issues and theories of 'race' and ethnicity. It shows how these concepts came into being during colonial domination and how they became central – and until recently, unquestioned – aspects of social

identity and division. This book provides students with a detailed understanding of colonial and post-colonial constructions, changes and challenges to race as a source of social division and inequality. Drawing upon rich international case studies from Australia, Guyana, Canada, Malaysia, the Caribbean, Mexico, Ireland and the UK, the book clearly explains the different strands of theory which have been used to explain the dynamics of race. These are critically scrutinised, from biological-based ideas to those of critical race theory. This key text includes new material on changing multiculturalism, immigration and fears about terrorism, all of which are critically assessed. Incorporating summaries, chapter-by-chapter questions, illustrations, exercises and a glossary of terms, this student-friendly text also puts forward suggestions for further project work. Broad in scope, interactive and accessible, this book is a key resource for undergraduate students of 'race' and ethnicity across the social sciences.

Mind, Brain, Body, and Behavior - Ingrid G. Farreras 2004

It provides a perspective that can illuminate contemporary policy debates about the nature and direction of biomedical and social science research as well as the relationships between government and science.

Encompassing developments in both the arts and sciences, the authors analyze focal points, aesthetic preferences and cultural phenomena through topics as wide-ranging as the East- and West German interior design; the Soviet stance on genetics; US cultural diplomacy during and after the Cold War; and the role of popular music as a universal cultural ambassador. Well positioned at the cutting edge of Cold War studies, this important work illuminates some of the striking paradoxes involved in the production and reception of culture in East and West.

The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem.
