Polar Bear, Polar Bear, What Do You Hear? - Bill Martin 2007-10

What will you hear when you read this book to a preschool child? Lots of noise! Children will chant the rhythmic words. They'll make the sounds the animals make. And they'll pretend to be the zoo animals featured in the book-- look at the last page! Bill Martin Jr. and Eric Carle are two of the most respected names in children's education and children's illustrations. This collaboration, their first since the classic Brown Bear, Brown Bear, What Do You See? (published more than thirty years ago and still a best-seller) shows two masters at their best.

Water - Stephen Barber 2008

Benoit Aquin from Canada, the winner of the Prix Pictet, was honored by Prix Pictet's Honorary President, Kofi Anna on 30th October 2008 in Paris. This powerful volume chronicles the unique and important mission of the Prix Pictet: to use photography to inform worldwide audiences about environmental issues. Launched in April 2008, this is the first photographic award dedicated to sustainability. It is a remarkable enterprise--art of the highest order tackling the most important issues of our time. This year's theme: water. Over 200 photographers from 43 countries were nominated for the first Prix Pictet. These compelling images highlight how vital water (or lack thereof) is to our food supply, to our health, to fragile ecosystems, and ultimately to our peace and security. After considerable debate, the jury short-listed 18 photographers--inevitably excluding some powerful works from further consideration. This book features some of those notable images alongside work by each of the short-listed artists. The skill,

imagination and artistic vision displayed by each photographer challenge us all to support change for a sustainable world. The shortlist of 18 nominees includes renowned artist such as Edward Burtynsky, Robert Polidori and Roman Signer as well as winner Benoit Aquin This testimony to art's power to change features a foreword by Prix Pictet's Honorary President, Kofi Annan REVIEWS ,,enormously ambitious" - The Times, UK, 27/10/2008 more... ,,the photographs ... wield an elemental power" - The Telegraph, UK, 08/11/2008 ILLUSTRATIONS 57 colour 23 duotone

A Critical Companion to Robert Zemeckis - Adam Barkman 2020-10-15

A Critical Companion to Robert Zemeckis offers a comprehensive, academic and detailed study of the works of Robert Zemeckis, whose films include successful productions such as the Back to the Future trilogy (1985-90), Forrest Gump (1994), Contact (1997), Cast Away (2000) and The Polar Express (2004), but also lesser known films such as I Wanna Hold Your Hand (1978), Used Cars (1980), and Allied (2015). Most of Zemeckis' major productions were not only successful when they were first released but continue to enjoy popularity—with critics and fans alike—even today. This volume investigates several distinct areas of Zemeckis' works and addresses the different approaches: the philosophical, the artistic, the socio-cultural, and the personal. The methodologies adopted by the contributors differ significantly from each other, thus offering the reader a variegated and compelling picture of Zemeckis' oeuvre, which includes nineteen films. Contrary to the few volumes published in the past on the subject, the chapters in this volume offer specific case studies that have been previously ignored (or only partially mentioned) by other scholars. A Critical Companion to Robert Zemeckis offers a great variety of interdisciplinary approaches to Zemeckis' films, illuminating, re-reading and/or interpreting for the first time the entire career of the director, from his first films to the most recent ones.

The Comic Book Film Adaptation - Liam Burke 2015-03-31

"There is no better, smarter examination of the relationship between comics and film." --Mark Waid, Eisner Award-winning writer of Kingdom Come and Daredevil In the summer of 2000 X-Men surpassed all box office expectations and ushered in an era of unprecedented production of comic book film adaptations. This trend, now in its second decade, has blossomed into Hollywood's leading genre. From superheroes to Spartan warriors, The Comic Book Film Adaptation offers the first dedicated study to examine how comic books moved from the fringes of popular culture to the center of mainstream film production. Through in-depth analysis, industry interviews, and audience research, this book charts the cause-and-effect of this influential trend. It considers the cultural traumas, business demands, and digital possibilities that Hollywood faced at the dawn of the twenty-first century. The industry managed to meet these challenges by exploiting comics and their existing audiences. However, studios were caught off-guard when these comic book fans, empowered by digital media, began to influence the success of these

adaptations. Nonetheless, filmmakers soon developed strategies to take advantage of this intense fanbase, while codifying the trend into a more lucrative genre, the comic book movie, which appealed to an even wider audience. Central to this vibrant trend is a comic aesthetic in which filmmakers utilize digital filmmaking technologies to engage with the language and conventions of comics like never before. The Comic Book Film Adaptation explores this unique moment in which cinema is stimulated, challenged, and enriched by the once-dismissed medium of comics.

A History of Three-Dimensional Cinema - David A. Cook 2021-09-14

A History of Three-Dimensional Cinema chronicles 3-D cinema as a single, continuous and coherent medium, proceeding from 19th-century experiments in stereoscopic photography and lantern projection (1839–1892) to stereoscopic cinema's "long novelty period" (1893–1952). It proceeds to examine the first Hollywood boom in anaglyphic stereo (1953–1955), when the mainstream industry produced 69 features in 3-D, mostly action films that could exploit the depth illusion, but also a handful of big-budget films—for example, Kiss Me Kate (George Sidney, 1953) and Dial M for Murder (Alfred Hitchcock, 1954)—until audiences tired of the process; the anaglyphic revival of 1970–1985, when 3-D was sustained as a novelty feature in sensational genres like soft-core pornography and horror; the age of IMAX 3-D (1986–2008); the current era of digital 3-D cinema, which began in 2009 when James Cameron's Avatar became the highest-grossing feature of all time and the studios once again stampeded into 3-D production; and finally the future promise of Virtual Reality.

Filming the Fantastic with Virtual Technology - Mark Sawicki 2020-03-27

This book brings fantasy storytelling to a whole new level by providing an in-depth insight into the tools used for virtual reality, augmented reality, 360 cinema and motion capture in order to repurpose them to create a virtual studio for filmmaking. Gone are the long days and months of post before seeing your final product. Composites and CG characters can now be shot together as fast as a live-action show. Using off-the-shelf software and tools, authors Mark Sawicki and Juniko Moody document the set-up and production pipelines of the modern virtual/mocap studio. They reveal the procedures and secrets for making movies in virtual sets. The high-end technology that enabled the creation of films such as The Lord of the Rings, Avatar and The Jungle Book is now accessible for smaller, independent production companies. Do you want your actors to perform inside of an Unreal® Game Engine set and interact with the environment? Do you want to be able to put your live-action camera on a jib or dolly and move effortlessly through both a live-action and virtual space together? Do you want live performers interacting with giants, elves and other creatures manipulated by motion capture in real time? This book discusses all of these scenarios and more, showing readers how to create high-quality virtual content using alternative, cost-effective technology. Tutorials, case studies, and project breakdowns provide essential tips on how to avoid and overcome common pitfalls, making this book an indispensable guide for both beginners to create virtual backlot content and more advanced VFX users wanting to adopt best practices when planning and directing virtual productions with RealityTM software and performance capture equipment such as Qualysis.

Children's Film in the Digital Age - Karin Beeler 2014-12-11

Films of the past 15 years have been released in a number of formats and reflect a reconceptualization of film genres, audiences and the impact of technology on adaptation. Focusing on multiple audiences, film adaptation, nationalism, globalism and consumer culture, this collection of new essays explores how children's film can be re-examined alongside recent developments in their production. These analyses consider the effect of multimedia strategies on the child audience, the opportunities for viewer participation and the pedagogical implications of films for children. The essays also address how childhood is embedded within films and linked to various consumer contexts.

Internet Video Culture in China - Marc L Moskowitz 2019-05-15

Examining Internet culture in the People's Republic of China, Taiwan, Hong Kong, and the US, this book analyzes videos which entertain both English and Chinese-speaking viewers to gain a better understanding of cultural similarities and differences. Each of the chapters in the volume studies streaming videos from YouTube and its Chinese counterparts, Todou and Youku, with the book using a combination of interpretative analysis of content, commentary, and ethnographic interviews. Employing a diverse range of examples, from Michael Jackson musical mash-ups of Cultural Revolution visuals, to short clips of Hitler ranting about twenty-first century issues with Chinese subtitles, this book goes on to explore the ways in which traditional beliefs regarding gender, romance, religion, and politics intersect. Looking at how these issues have changed over the years in response to new technologies and political economies, it also demonstrates how they engage in regional, transnational, and global dialogues. Comparing and incorporating the production of videos with traditional media, such as television and cinema, Internet Video Culture in China will be useful to students and scholars of Internet and digital anthropology, as well as Cultural Studies and

Chinese Studies more generally.

School Library Storytime: Just the Basics - Brenda S. Copeland 2013-04-23

This book is an invaluable resource for school library aides who conduct storytime activities, providing everything from instruction on how to read to children to a week-by-week read aloud curriculum for the entire school year. School Library Storytime: Just the Basics is the perfect resource for library aides, paraprofessionals, or other library staff who conduct storytime in a school library media center. It provides all of the essential information, materials, and step-by-step guidance needed to facilitate these all-important events for children in kindergarten through second grade, allowing library staff without previous training or experience to get started with confidence. The fifth title in the highly regarded Just the Basics series, this book starts with an introduction, followed by explanations of how to read aloud and tips for managing and working with children in the primary grades. The authors suggest specific picture books that tie into school year-based themes and supply materials that can be used as listed or easily modified to meet the individual library's needs. Event-specific lessons are supplied for many weeks within the school year, making this title one that educators will rely on for storytime ideas from September through May. Follows the school calendar, providing a lesson for nearly every week of the school year Uses both fiction and nonfiction readalouds Supplies a resource page for each month
