*Clinical Nursing Skills and Techniques* - Anne Griffin Perry 2009-05

Focusing on the skills that are the most labor intensive to learn and that pose the greatest risk to patient safety, this online course is the perfect tool to help you review and evaluate your competency before performing skills in the clinical setting. This one-of-a-kind online course includes 17 modules with each module comprising several lessons. Each lesson provides you with a variety of interactive exercises and self-check activities that allow you to test your comprehension and ask you to apply concepts. You can also view the video for each skill from start to finish, pausing and repeating segments as desired. Each lesson includes an exam that can be scored immediately, with feedback that provides the rationale for the correct answer, and each module concludes with a test. Provides over 700 activities to encourage decision-making, critical thinking and self-evaluation. Case-based/problem-oriented format of learning activities relate to real-life patient scenarios. Varied self-assessment exercises - over 750 - allow you to test your knowledge of key concepts throughout the module. Lesson exams may be scored immediately and feedback provides rationale for the correct answer. Scramble function allows you to reset an exercise so the problem is

reordered and presented anew. Colorful visuals and graphics (over 800 images) provided on screens increase engagement and provides context when applicable. Over 100 video clips demonstrating procedures can be viewed from start to finish, pausing and repeating segments as desired. Over 100 printable Procedure Guides provide a study tool for later review.

**Understanding Pathophysiology - ANZ adaptation** - Judy Craft 2013-04-26

A new pathophysiology textbook specifically for Australian and New Zealand nursing students

Understanding Pathophysiology provides nursing students with the optimal balance between science, clinical case material and pharmacology. With entrenched bio-medical terminology that can be difficult to relate to nursing practice, pathophysiology is a complex, though essential, component of all undergraduate nursing courses. Understanding Pathophysiology: ANZ Edition overcomes this difficulty by presenting the topic in an accessible manner appropriate to undergraduate nursing students in Australia and New Zealand. The book prioritises diseases relevant to nursing students and presents them according to prevalence and rate of incidence in Australia and New Zealand. This focused approach prepares students for the presentations they will experience in a clinical setting. Understanding Pathophysiology: ANZ Edition explores each body system first by structure and function, then by alteration. This establishes the physiology prior to addressing the diseases relative to the system and allows students to analyse and compare the normal versus altered state. This local edition of Understanding Pathophysiology incorporates a lifespan approach and explores contemporary health with specific chapters on stress, genes and the environment, obesity and diabetes, cancer, mental illness and Indigenous health issues. Clinical case studies are included in each chapter, with each patient case study highlighting the relevant medical symptoms of a given disease within a clinical setting. This is then analysed with respect to the relevancy of each symptom, their respective affect on body systems and the best course of pharmacological treatment. Elsevier's Evolve website provides extensive support materials for students and lecturers. Also available for purchase with this textbook is an e-book, Pathophysiology Online - a set of online modules, and a mobile study guide application. • pathophysiology presented at an appropriate level for undergraduate nursing students in Australia and New Zealand • an adaptation of a US edition - Understanding Pathophysiology, 4th Edition • diseases are addressed

according to prevalence, incidence and relevance • a 'systems' approach is incorporated with a 'lifespan' approach within the alterations chapters • a new section on contemporary health issues examines the effects of an aging population and lifestyle choices on a society's overall health • new chapters on topics including homeostasis; genes and the environment; obesity and diabetes; mental health and Indigenous health issues • chapter outlines and key terms appear at the beginning of each chapter • concept maps provide visual representation of the key concepts addressed in each chapter • clinical case studies feature in each chapter to bring pathophysiology into practice • helpful 'focus on learning' boxes in each chapter • key terms are bolded in the text and listed in the glossary • summaries of main points feature in each chapter • review questions at chapter end are accompanied by answers provided online

Basic Nursing - Patricia Ann Potter 1999

This innovative text presents nursing fundamentals in a concise, visually attractive format that captures students' attention and addresses dramatic changes taking place in the health care environment. At the heart of this revision is the critical thinking model presented as a practical, clinical decision-making guide and applied to the nursing process throughout. Case studies in all clinical chapters bring this process to life, demonstrating to students how using the combination of critical thinking and the nursing process will help them deliver comprehensive, professional care. Case studies introduce the client, family and nurse, and follow them through synthesizing knowledge and assessment data, planning and evaluating care. It addresses community health care and health promotion by consistently organizing each implementation section into three main areas: health promotion, acute care, and restorative care. Other themes include delegation, multidisciplinary collaboration, focus on outcomes, cultural sensitivity, gerontologic principles, and client satisfaction. \* Complete coverage of fundamentals in a concise, readable, visually appealing format. \* Five-step nursing process provides a consistent framework in

all clinical chapters. \* Hundreds of color photographs and drawings increase educational value while adding visual appeal. \* Client teaching covered in both narrative and boxes to highlight this key nursing role. \* Skills are presented in a clear, two-column format with rationales for all steps. NEW FEATURES: \* Critical thinking model provides a practical, clinical decision-making guide applied to the nursing process. \* Case studies in all clinical chapters include the client, family and nurse, and are developed throughout the chapter to demonstrate the ongoing nature of nursing care. \* Implementation consistently addresses health promotion, acute care, and restorative care to reflect the current focus on community-based nursing and health promotion. \* Skills include guidelines to assist nurses when delegating to unlicensed assistive personnel, Critical Decision Points, Recording and Reporting, and Home Care Considerations. \* Expanded evaluation includes both the nurse's and client's perspectives to stress today's "customer satisfaction" emphasis. \* Care Plans based on the case studies highlight key assessment data and include client goals and expected outcomes. \* Procedural Guidelines provide step-by-step instructions for performing basic skills in a clear and concise format. \* Cultural focus is reflected throughout and in special boxes to highlight the importance of cultural sensitivity. \* Collaborative care and multidisciplinary problems are addressed in narrative and care paths/maps to reflect current health care focus.
