Moral Wisdom - James F. Keenan 2010

At a time when religion and spirituality have been divorced from one another and morality and ethics are viewed as being confining rather than liberating, Fr. James Keenan has developed a new edition to his beloved book Moral Wisdom. There are new discussions of social sin and Pope Benedict XVI's encyclical Caritas in Veritate, a clearer exploration of Jesus in the New Testament, and new study questions at the end of each chapter. 'Moral wisdom, ' as Fr. Keenan calls it, is the distinctive gift of the Catholic tradition, a gift that helps us discern what values to pursue and which virtues to embody on the path to becoming who we really are and who God calls us to be. Fr. Keenan uses a conversational style filled with stories and examples to open the treasure trove of resources in the Catholic tradition for developing moral wisdom. He lifts up the lessons on love, conscience, sin, and suffering, helping readers connect with the formative influences of the Catholic heritage and appreciate what gives meaning to our lives and what enhances our

relationships with friends and family

Confronting Capitalism - Philip Kotler 2015-04-15

With one side of the political aisle proposing increasingly more socialistic and anti-capitalistic ideas, the other side has been quick to defend our country's great economic model, with good reason. Capitalism--spanning a spectrum from laissez faire to authoritarian--shapes the market economies of all the wealthiest and fastest-growing nations. But does that mean it is perfect as is, and that we would not all benefit from an honest evaluation and reconstruction of the free market system that has shaped our country's way of economic growth?The truth is, trouble is cracking capitalism's shiny veneer. In the US, Europe, and Japan, economic growth has slowed down. Wealth is concentrated in the hands of a few; natural resources are exploited for short-term profit; and good jobs are hard to find. In Confronting Capitalism, business expert Philip Kotler explains 14 major problems undermining capitalism, including:• Persistent and increasing poverty• Automation's effects on job creation• High debt burdens• Steep environmental costs• Boom-bust economic cycles• And moreBut this landmark book does not stop with merely revealing the problems. It also delivers a heartening message: We can turn things around! Movements toward shared prosperity and a higher purpose are reinvigorating companies large and small, while proposals abound on government policies that offer protections without stagnation. Kotler identifies the best ideas, linking private and public initiatives into a force for positive change, and offers suggestions for returning to a healthier, more sustainable capitalism that works for all.

Marketing Metrics - Paul W. Farris 2006-04-18

Few marketers recognize the extraordinary range of metrics now available for evaluating their strategies and tactics. In Marketing Metrics, four leading researchers and consultants systematically introduce today's most powerful marketing metrics. The authors show how to use a "dashboard" of metrics to view market dynamics from various perspectives, maximize accuracy, and "triangulate" to optimal solutions. Their comprehensive coverage includes measurements of promotional strategy, advertising, and distribution; customer perceptions; market share; competitors' power; margins and profits; products and portfolios; customer profitability; sales forces and channels; pricing strategies; and more. You'll learn how and when to apply each

metric, and understand tradeoffs and nuances that are critical to using them successfully. The authors also demonstrate how to use marketing metrics as leading indicators, identifying crucial new opportunities and challenges. For clarity and simplicity all calculations can be performed by hand, or with basic spreadsheet techniques. In coming years, few marketers will rise to senior executive levels without deep fluency in marketing metrics. This book is the fastest, easiest way to gain that fluency.

Marketing Places - Philip Kotler 2002-01-15

Today's headlines report cities going bankrupt, states running large deficits, and nations stuck in high debt and stagnation. Philip Kotler, Donald Haider, and Irving Rein argue that thousands of "places" -- cities, states, and nations -- are in crisis, and can no longer rely on national industrial policies, such as federal matching funds, as a promise of jobs and protection. When trouble strikes, places resort to various palliatives such as chasing grants from state or federal sources, bidding for smokestack industries, or building convention centers and exotic attractions. The authors show instead that places must, like any market-driven business, become attractive "products" by improving their industrial base and communicating their special qualities more effectively to their target markets. From studies of cities and nations throughout the world, Kotler, Haider, and Rein offer a systematic analysis of why so many places have fallen on hard times, and make recommendations on what can be done to revitalize a place's economy. They show how "place wars" -- battles for Japanese factories, government projects, Olympic Games, baseball team franchises, convention business, and other economic prizes -- are often misguided and end in wasted

money and effort. The hidden key to vigorous economic development, the authors argue, is strategic marketing of places by rebuilding infrastructure, creating a skilled labor force, stimulating local business entrepreneurship and expansion, developing strong public/private partnerships, identifying and attracting "place compatible" companies and industries, creating distinctive local attractions, building a service-friendly culture, and promoting these advantages effectively. Strategic marketing of places requires a deep understanding of how "place buyers" -- tourists, new residents, factories, corporate headquarters, investors -- make their place decisions. With this understanding, "place sellers" -- economic development agencies, tourist promotion agencies, mayor's offices -- can take the necessary steps to compete aggressively for place buyers. This straightforward guide for effectively marketing places will be the framework for economic development in the 1990s and beyond.
