Order the ISBN above if your course begins before 8/1/06, or click here if your course begins after 8/1/06. The Bade/Parkin package is designed to encourage learning by doing. Each chapter concentrates on a manageable number of core concepts that are called out in the beginning-of-chapter Checklist. Students know what they're

expected to learn and are given the chance to apply those lessons to real-world problems. Practice is the cornerstone of the innovative Bade/Parkin approach. Principles of Economics - Robert H. Frank 2020-12

"lthough many millions of dollars are spent each year on introductory economics instruction in American colleg-es and universities, the return on this investment has been disturbingly low. Studies have shown, for example, that several months after having taken a principles of economics course, former students are no better able to answer simple economics questions than others who never even took the course. Most students, it seems, leave our introductory courses without having learned even the most important basic economic principles"--

Principles of Macroeconomics - Robin Stonecash 2020-10-15

Principles of Macroeconomics 8th edition boils economics down to its essentials, by considering what is truly important for students to learn in their first course in economics. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of

economic ideas, this edition pays careful attention to regional and global policies and economic issues – including the impacts of the contemporary macroeconomic issues, inflation, unemployment, interest rates, and monetary and fiscal policy. The resource emphasises the material that students should and do find interesting about the study of the economy, resulting in a focus on applications and policy, and less on formal economic theory. Principles of Macroeconomics, 8th edition encourages students to make their own judgements by presenting both sides of the debate on five controversial issues facing policy makers: the proper degree of policy activism in response to the business cycle, the choice between rules and discretion in the conduct of monetary policy, the desirability of reaching zero inflation, the importance of balancing the government's budget, and the need for tax reform to encourage saving.
