Tacky - Rax King 2021-11-02

An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic

meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor. Sport, Media and Mega-Events - Lawrence A. Wenner
2017-03-27

Bringing together many of the most influential scholars in sport and media studies, this book examines the diverse ways that media influences our understanding of the world's most important sport events, dubbed sports mega-events. It sheds new light on how these events have been changed by the media, and have, in turn, adapted to media to further their brand's cultural influence. Focusing on the central concept of "mediatization" - the permeation of media into all spheres of contemporary life - the book presents original case studies of major events including the Olympics, FIFA, rugby and cricket World Cups, Tour de France, Super Bowl, World Series, Monaco Grand Prix, Wimbledon, and many more. Written from a truly international perspective, this is a seminal work in sport and media studies that reveals the growing political, economic, and cultural influences of sport mega-events in contemporary society. *Sport, Media and Mega-Events* is an essential text for any course on the sociology of sport, event management, sport marketing, or featuring a cultural, communication or media studies approach to sport.

How We Reason - Philip Johnson-Laird 2008-10-23

Good reasoning can lead to success; bad reasoning can lead to catastrophe. Yet, it's not obvious how we reason, and why we make mistakes - so much of our mental life goes on outside our awareness. In recent years huge strides have been made into developing a scientific understanding of reasoning. This new book by one of the pioneers of the field, Philip Johnson-Laird, looks at the mental processes that underlie our reasoning. It provides the most accessible account yet of the science of reasoning. We can all reason from our childhood onwards - but how? 'How we reason' outlines a bold approach to understanding reasoning. According to this approach, we don't rely on the laws of logic or probability - we reason by thinking about what's possible, we reason by seeing what is common to the possibilities. As the book shows, this approach can answer many of the questions about how we reason, and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl. It shows why our irrational fears may become psychological illnesses, why terrorists develop 'crazy' ideologies, and how we can act in order to improve our reasoning. The book ends by looking at the role of reasoning in three extraordinary case histories: the Wright brothers' use of analogies in inventing their flyer, the cryptanalysts' deductions in

breaking the German's Enigma code in World War II, and Dr. John Snow's inductive reasoning in discovering how cholera spread from one person to another. Accessible, stimulating, and controversial, How we Reason presents a bold new approach to understanding one of the most intriguing facets of being human.

Consuming mobility - Jorrit O. Nijhuis 2013-11-25

The current fossil fuel-based system of mobility is associated with a wide range of environmental and social problems. There is a growing body of literature on system innovations and transitions which has as a common understanding that long-term transformative change is necessary to deal with these complex problems. However, knowledge on the crucial role of citizen-consumers in sustainable mobility transitions is still underdeveloped. By incorporating the viewpoint of consumption patterns and everyday life routines, this book provides (new) knowledge on the role of citizen-consumers in sustainable mobility transitions. Theoretically, a practice based approach is developed as

a novel framework to analyse, understand and influence transition processes to sustainable mobility at the level of everyday life. The focus in each of the three cases studies is on situated interactions between consumers and producers. Amongst these is an analysis of the role environmental information and subsidies in new car purchasing. Also, various examples in which an attempt was made to orchestrate a (modal) shift in commuting practices are examined. Each of the empirical case studies shows the important role of contextual factors in understanding and influencing mobility behaviour of citizen-consumers. In addition, this book helps to understand how and why innovation in mobility practices takes place or not.

Twelve Years A Slave (Illustrated) - Solomon Northup
2014-08-22

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Cycling Cultures - Peter Cox 2015-05-27

Cycling studies is a rapidly growing area of investigation across the social sciences, reflecting and engaged with rapid transformations of urban mobility and concerns for sustainability. This volume brings together a range of studies of cycling and cyclists, examining some of the diversity of practices and their representation. Its international contributors focus on cases studies in the UK and the Netherlands, and on cycling subcultures that cross national boundaries. By considering cycling through the lens of culture it addresses issues of diversity and complexity, both past

and present. The authors cross the boundaries of academia and professional engagement, linking theory and practice, to shed light on the very real processes of change that are reshaping our mobility.

Green Events and Green Tourism - Hugues Seraphin

2018-08-28

As the appetite for leisure travel and events continues to grow at an exponential rate, the impact on the environment and local communities is becoming an increasing concern, not least by the users of the services. Green approaches to tourism and events are growing in popularity and present an opportunity to both identify solutions to significant environmental and societal problems and new approaches to business. *Green Events and Green Tourism* looks at key frameworks, guidelines, principles and benchmarks that support the application of sustainability in practice. The five sections of the book cover themes of governance, accreditation, certification, innovation, priorities, trends, ambitions and consumer behaviour, and the chapters include examples of best practice in the organisation of music and arts festivals, special interest tourism, the green management of outdoor sites and the management of sports events. Readers will benefit from insightful case studies from around the globe.
