A Biological and Psychological Background to Education - C. G. Ivan Hussell 2014-05-09

A Biological and Psychological Background to Education focuses on man's physical and psychological characteristics which influence education. The publication first underscores the importance of man's biological background, the biological nature of man, and the nature of the vital processes. Discussions focus on respiration, nutrition, object of vital activities, characteristics of man as an animal, primate characteristics, diversity of man, public education, and human biology in the schools. The book then examines the

control of vital processes, reproduction and sex education, genetic factors in the life of man, evolution and man, and development and growth. The manuscript takes a look at movement, posture, and exercise, health and the teacher's responsibility, social heritage of man, higher mental processes, and structure of personality. Topics include social factors in personality, remembering and forgetting, intelligence, perception, contemporary pressures in society, prevention of disease, and the significance of levers in the body. The publication is designed for students at colleges of education and colleges of physical education.
Foundations of Educational Technology - Gwendolyn M. Morel 2022-10-18
Foundations of Educational Technology offers a fresh, interdisciplinary, problem-centered approach to educational technology, learning design, and instructional systems development. As the implementation of online,

blended, hybrid, mobile, open, and adaptive learning systems rapidly expands, emerging tools such as learning analytics, artificial intelligence, mixed realities, serious games, and micro-credentialing are promising more complex and personalized learning experiences. This book provides faculty and graduate students with a conceptual, empirical, and practical basis for the effective use of these systems across contexts, integrating essential theories from the fields of human performance, learning and development, information and communications, and instructional design. Key additions to this revised and expanded third edition include coverage of the latest learning technologies, research from educational neuroscience, discussions about security and privacy, new attention to diversity, equity, and inclusion, updated activities, support materials, references, and more.

Psychological Foundation of Education - Samuel Ball 1968

Psychological Foundation of Education - 2022

Psychological Foundations of Education - B. Claude Mathis 2013-09-17

Psychological Foundations of Education presents some of the principles of psychology that are relevant to learning and teaching. It presents an alternative answer to the problem of the bifurcation of general and educational psychology in the curriculum of teacher preparation. While the solution is provisional and has obvious imperfections, it is offered in the hope that it may stimulate discussion of the problem and other solutions and/or explicit justifications for past practice. Key concepts discussed include teachers' attitudes and behavior, different types of learning, technology in education, forgetting and extinction, child development, and intelligence measurements. Also covered are the assessment of

educational achievement, the social psychology of the classroom, and education in urban schools. This text should have a variety of uses in classes where students are preparing for teaching. It was written specifically for those situations in which the prospective teacher is introduced to psychology through a one- or two-semester integrated sequence.

Cultural Foundations of Education - Young Pai 2001

This thought-provoking book examines education as a cultural phenomenon and explores the implications of this perspective on schooling, multicultural education, educational development, and the process of teaching and learning. The authors combine the concepts of anthropology, education, schooling, teaching, and learning into an insightful introduction to the study of the cultural basis of education. Key topics include conflict between core and youth values, minority languages in the classroom, contemporary analysis of the IQ issues, recent school reform

efforts, a new look at approaches to multicultural education, the postmodern conception of childhood and its educational implications, a discussion of performance assessment, communication and learning styles, and intercultural communication and competence. For teachers or any individuals interested in the relationship between social context and educational issues.

Sociological Foundation of Education - Srinibas

Bhattacharya 2006

From The Dawn Of Civilization, Man Has Been Marching In Search Of Wisdom. Various Experiments Are Projected Through Education, So That Humanity, Happiness And Harmony Be Wedded Together. Education Is Indispensable For Making Life And Living Meaningful And Purposeful. Its Significance Cannot Be Fully Appreciated Unless It Is Looked At In Proper Perspectives Philosophical, Sociological And Psychological. The Sociological Foundation Of Education Has Added A New Dimension To Education As An

Interdisciplinary Approach. Man Not Only Lives In A Society, He Grows And Functions In A Social Context And Various Factors Contribute To The Growth Of An Individual. Sociology Which Involves The Study Of Society, Social Process And Social Change Is A Growing Science. Education Can Hardly Be Separated From Society And So From Sociology. School Is A Miniature Society And What Happens In A Society Also Happens In A School Situation. Like Parents In A Family, Teachers Take Important Roles In A School. Culture Occupies A Significant Place In A Society. A Community Cannot Grow Without Culture. Similarly, A Society Cannot Survive Without Culture. As In Every Dynamic Society There Are Problems, So In Every School There Are Typical Situations. Teacher Has A Distinct Role As A Social Worker And Community Member. Obviously, Of All The Foundations Of Education, The Sociological Basis Has A More Practical Bearing On Day-To-Day Living. In The Present Book An Attempt Has Been Made To

Analytically Deal With Education In Relation To Social Environment, Culture, Social Control, Social Stratification And Social Mobility, Social Change, And National Integration. In Addition, It Elucidates The Significance Of Education For Survival, Peace, Harmony, International Understanding, Emancipation Of Creative Consciousness Etc. The Present Indian Society And Its Problems In Educational Perspectives Have Been Particularly Studied. It Is Hoped That The Present Book Will Prove Immensely Useful For The Students And Teachers Of Both Education And Sociology. Even The General Readers Will Find It Highly Informative. *Foundations of Education* - J. Calderon 1998

The Psychology of Education - Martyn Long 2010-11-05

Written in an accessible and engaging style, this second edition of *The Psychology of Education* addresses key concepts from psychology which relate to education. Throughout the text the author team emphasise an evidence-based approach, providing practical suggestions to improve learning outcomes, while fictional case studies are used in this new edition to provide students with a sense of what psychological issues can look like in the classroom. Activities around these case studies give students the chance to think about how to apply their theoretical knowledge to these real-world

contexts. 'Key implications' are drawn out at appropriate points, and throughout the book students are provided with strategies for interrogating evidence. Key terms are glossed throughout the book and chapters are summarised and followed by suggestions for further reading. A chapter on Learning interactions and social worlds is new to this edition. The following chapters have all been extensively updated: Learning Assessment Individual differences and achievement Student engagement and motivation The educational context Society and culture Language Literacy Inclusive education and special educational needs Behaviour problems Dealing with behaviour problems. This book is essential reading for undergraduate students of Education Studies and Psychology as well as trainee teachers on BA, BEd and PGCE courses. It will also be of use to postgraduates training to be educational psychologists.

Perceiving, Behaving, Becoming - H. Jerome Freiberg
1999

In 1962, ASCD's *Perceiving, Behaving, Becoming: A New Focus for Education* provided bold insights on the psychological foundation of education. Some of the most compelling questions in education today were first asked in this groundbreaking work, which included chapters

by preeminent scholars Arthur Combs, Earl Kelley, Abraham Maslow, and Carl Rogers. Although we cannot predict what current information future generations will need to know, the book's Introduction states, creating schools that encourage the "development of persons with adequate, fully functioning personalities is the best way to contribute some degree of stability to an uncertain future." Decades later, in preparing *Perceiving, Behaving, Becoming: Lessons Learned*, editor H. Jerome Freiberg invited distinguished scholars in the field of affective/humanistic education and psychology to review these four chapters from the 1962 book to "provide a context for lessons learned for future generations of educators." Each author in *Lessons Learned* works with teachers, administrators, and schools and offers a distinct perspective on the human side of teaching and learning. Their analyses raise significant issues, such as whether an emphasis on academic standards ignores the

education of the "whole" student, and what schools that are committed to an environment of trust and respect look like. *Lessons Learned* promises to further the cause of education that focuses on the person. By understanding the evolution of our educational past, says Freiberg, perhaps we can shape a future that will better meet the needs of generations that come after us.

Psychological Foundations of the Curriculum - Willard Clifford Olson 1971

Historical Foundations of Educational Psychology - John A. Glover 2013-11-11

This volume represents a beginning effort to compile a history of educational psychology. The project began, innocuously enough, several years ago when we decided to add mon material about the history of educational psychology to the undergraduate course we were teaching. What seemed like a simple task became very complex as we searched in vain

for a volume dealing with the topic. We ended up drawing on various histories of psychology that devoted anywhere from a few paragraphs to several pages to the topic and on a very few articles addressing the issue. We were startled, frankly, by the apparent lack of interest in the history of our field and decided to attempt to compile a history ourselves. As is the case with any edited volume, the contributing authors deserve credit for its positive features. They uniformly made every effort asked of them and taught us much about educational psychology. Any errors or omissions are our responsibility alone.

From The Dawn Of Civilization, Man Has Been Marching In Search Of Wisdom. Various Experiments Are Projected Through Education, So That

Humanity, Happiness And Harmony Be Wedded Together. Education Is Indispensable For Making Life And Living Meaningful And Purposive. Its Significance Cannot Be Fully Appreciated Unless It Is Looked At In Proper Perspectives Philosophical, Sociological And Psychological. The Philosophical Perspectives Provide The Basis Of Education In Terms Of Values, Aims And Objectives. Without A Philosophical Basis, Education Tends To Lose Its Direction. In Addition, Philosophy Provides A Framework Within Which Education And Educational Problems Can Be Discussed. Above All, The Nature Of Decisions Is Significantly Determined By Philosophy And Education. A Philosophy Of Education Is Often Adequate To Make Immediate Resolution To Conflicts. Thus, Philosophy Of Education Is A Comprehensive Area Of Knowledge With An Interdisciplinary Approach. Keeping In View The Significant Bearing Of Philosophical Basis Of Education On Life And Society,

The Present Book Philosophical Foundation Of Education Has Been Written. It Is An In-Depth Study Of All The Aspects Related To Education. Beginning With The Philosophical Foundation Of Education, The Book Analytically Discusses Education In Relation To Issues Of Human Values, Freedom And Discipline, Peace And Democracy And Its Application In Classroom Teaching. It Also Acquaints The Readers With The Indian Philosophy Of Education. Apart From These, It Analytically Presents The Aims, Creativity, Role And Human Factors Of Education. Here, The Indian Standard Of Education Has Been Particularly Studied. It Is Hoped That The Present Book Will Prove Immensely Useful For The Students And Teachers Of Both Education And Philosophy. Using Psychology in Management Training - David A. Statt 2002-09-26

Many of the fundamental principles of psychology form the basis for management

training. Using Psychology in Management Training aims to give trainers and student trainers a grounding in the ideas and research findings which are most relevant to their work. Three major areas are explored from a management training perspective and illustrated with examples * the individual psychological processes of learning, personality and motivation which are at the heart of most management training courses * the social psychological processes of group dynamics, leadership and stress which all arise from the interaction of people at work * the psychology of the actual training experience including the crucial training skill of communication and what is needed to meet organisational training needs Using Psychology in Management Training has a clear and accessible format with a comprehensive glossary of unfamiliar terms and suggestions for further reading at the end of each chapter.
