Psychology 2e - Rose M. Spielman 2020-04-22

How to Think Straight about Psychology -
Keith E. Stanovich 1986

Schedules of Reinforcement - B. F. Skinner
2015-05-20

The contingent relationship between actions and

their consequences lies at the heart of Skinner's experimental analysis of behavior. Particular patterns of behavior emerge depending upon the contingencies established. Ferster and Skinner examined the effects of different schedules of reinforcement on behavior. An extraordinary work, *Schedules of Reinforcement* represents over 70,000 hours of research primarily with pigeons, though the principles have now been experimentally verified with many species including human beings. At first glance, the book appears to be an atlas of schedules. And so it is, the most exhaustive in existence. But it is also a reminder of the power of describing and explaining behavior through an analysis of measurable and manipulative behavior-environment relations without appealing to physiological mechanisms in the brain. As an exemplar and source for the further study of behavioral phenomena, the book illustrates the scientific philosophy that Skinner and Ferster adopted: that a science is best built from the

ground up, from a firm foundation of facts that can eventually be summarized as scientific laws.

Secular Meditation-Based Ethics of Responsibility (MBER) Program - Helene Hagège 2023-01-12
An ethical solution to the current health,

ecological and financial problems we face is to mobilize our responsibility by overcoming our duality with the environment. It calls for changes in attitudes and behaviors that are not self-evident and can be facilitated by specific learning. Mindfulness-based interventions (MBI) are increasingly used in professional settings, particularly in therapy, because their effectiveness in terms of change is increasingly supported by scientific evidence. This book presents a detailed program aimed at developing an ethics of responsibility known as Mindfulness- or MeditationBased Ethics of Responsibility (MBER). It combines theoretical explanations, exercises and secular meditations to propose (rather than impose) ethical guidelines, accompanying participants in identifying their own ethical values, acting in accordance with them, while weakening their dual functionings.
