The Philosophy of Taxation and Public Finance - Robert W. McGee 2011-06-27

Most public finance books are texts, which are aimed at undergraduate or graduate students. They are overly technical in nature and appeal only to a narrow range of bureaucrats and academics. Books on taxation are written for tax practitioners and usually emphasize either what the law is or how to maneuver through the labyrinth of tax law to minimize taxes for clients. Philosophy books on taxation or public finance simply do not exist. The Philosophy of Taxation and Public Finance is different. It is written in nontechnical language and is aimed to appeal to a wide range of readers, including practitioners, academics and students in the fields of taxation, public finance, economics, law, philosophy and political science as well as general readers who are interested in learning why they are being taxed the way they are. The author

addresses the major issues and topics in taxation and public finance and injects them with philosophical insights. He discusses questions such as: -What arguments have been used to justify taxation? -When is tax evasion unethical? -Are some taxes better than others? -What are the proper functions of government? -How much is enough? Is the ability to pay concept valid? -When can punitive taxes be justified?

The Psychology of Money - Morgan Housel

2020-09-08

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

Significantly updated and thoroughly revised, the 6th Edition reflects the art and science of family nursing practice in today's rapidly evolving healthcare environments.

Resources in Education - 1985-06

Government Finance - John Fitzgerald Due 1981

Managerial Economics - Nick Wilkinson 2005-05-05

Managerial economics, meaning the application of economic methods in the managerial decision-making process, is a fundamental part of any business or management course. This textbook covers all the main aspects of managerial economics:

the theory of the firm; demand theory and estimation; production and cost theory and estimation; market structure and pricing; game theory; investment analysis and government policy. It includes numerous and extensive case studies, as well as review questions and problem-solving sections at the end of each chapter. Nick Wilkinson adopts a user-friendly problem-solving approach which takes the reader in gradual steps from simple problems through increasingly difficult material to complex case studies, providing an understanding of how the relevant principles can be applied to real-life situations involving managerial decision-making. This book will be invaluable to business and economics students at both undergraduate and graduate levels who have a basic training in calculus and quantitative methods.

Teaching Through Stories - Elizabeth Seward

2019-05-13

“Unhurried education, and teaching to the heart through stories, develop a lifelong love of a continually unfolding process of learning and loving the world.” *Teaching through Stories: Jane and Jeremy Learn to Knit* will encourage you to take things into your own hands by giving you the tools to teach others. It's effective and fun to teach using stories—this book tells you how! The first in a series on teaching handwork, this complete guide is written for teachers and others who want to teach this popular craft—or any subject—to children through storytelling, fostering personal connection in any educational setting. This handbook is a practical guide to creating and telling your own stories, and connecting with listeners, with examples from knitting lessons. It introduces important pedagogical foundations and offers suggestions for managing a busy handwork classroom. The last chapter shares ideas about selecting patterns and materials and over a dozen of the best patterns the author has developed. *Teaching through Stories* embodies an unhurried approach to education used successfully for a hundred years in Waldorf schools around the world.

The Great Economists - Linda Yueh 2019-05-21

A Times Best Business Book of 2018 What can the ideas of history's greatest economists tell us about the most important issues of our time? 'The best place to start to learn about the very greatest economists of all time' Professor Tyler Cowen, author of *The Complacent Class* and *The Great Stagnation* Since the days of Adam Smith, economists have grappled with a series of familiar problems - but often their ideas are hard to digest, before we even try to apply them to today's issues. Linda Yueh is renowned for her combination of erudition, as an accomplished economist herself, and accessibility, as a leading writer and broadcaster in this field; and in *The Great Economists* she explains the key thoughts of history's greatest economists, how their lives and times affected their ideas, how our lives have been influenced by their work, and how they could help with the policy challenges that we face today. In the light of current economic problems, and in particular economic growth, Yueh explores the thoughts of economists from Adam Smith and David Ricardo through Joan Robinson and Milton Friedman to Douglass North and Robert Solow. Along the way she asks, for example: what do the ideas of Karl Marx tell us about the likely future for the Chinese economy? How does the work of John Maynard Keynes, who argued for government spending to create full employment, help us think about state investment? And with globalization in trouble, what can we learn about handling Brexit and Trumpism? In one accessible volume, this expert new voice provides an overarching guide to the biggest questions of our time. *The Great Economists* includes: Adam Smith David Ricardo Karl Marx Alfred Marshall Irving Fisher John Maynard Keynes Joseph Schumpeter Friedrich Hayek Joan Robinson Milton Friedman Douglass North Robert Solow 'Economics students, like others, can learn a lot from this book' - Professor Paul Collier, author of *The Bottom Billion* 'Not only a great way to learn in an easily readable manner about some of the greatest economic influences of

the past, but also a good way to test your own a priori assumptions about some of the big challenges of our time.' - Lord Jim O'Neill, former Chairman at Goldman Sachs Asset Management, former UK Treasury Minister, and author of *The Growth Map* 'An extremely engaging survey of the lifetimes and ideas of the great thinkers of economic history.' - Professor Kenneth Rogoff, author of *The Curse of Cash* and co-author of *This Time is Different* 'This book is a very readable introduction to the lives and thinking of the greats.' - Professor Raghuram Rajan, former Governor of the Reserve Bank of India, and author of *I Do What I Do* and *Fault Lines* 'Read it not only to learn about the world's great economists, but also to see how consequential thought innovations can be, and have been.' - Mohamed el-Erian, Chief Economic Adviser at Allianz, former CEO of PIMCO

Debunking Economics (Digital Edition - Revised, Expanded and Integrated) - Professor Steve Keen 2011-09-22

Debunking Economics exposes what many non-economists may have suspected and a minority of economists have long known: that economic theory is not only unpalatable, but also plain wrong. When the original *Debunking* was published back in 2001, the market economy seemed invincible, and conventional 'neoclassical' economic theory basked in the limelight. Steve Keen argued that economists deserved none of the credit for the economy's performance, and that 'the false confidence it has engendered in the stability of the market economy has encouraged policy-makers to dismantle some of the institutions which initially evolved to try to keep its instability within limits'. That instability exploded with the devastating financial crisis of 2007, and now haunts the global economy with the prospect of another Depression. In this radically updated and greatly expanded new edition - this version of which includes fully integrated graphs and diagrams - Keen builds on his scathing critique of conventional economic theory whilst explaining what mainstream economists cannot: why the crisis

occurred, why it is proving to be intractable, and what needs to be done to end it. Essential for anyone who has ever doubted the advice or reasoning of economists, *Debunking Economics* provides a signpost to a better future.

Free To Choose - Milton Friedman 1990-11-26

INTERNATIONAL BESTSELLER A powerful and persuasive discussion about economics, freedom, and the relationship between the two, from today's brightest economist. In this classic discussion, Milton and Rose Friedman explain how our freedom has been eroded and our affluence undermined through the explosion of laws, regulations, agencies, and spending in Washington. This important analysis reveals what has gone wrong in America in the past and what is necessary for our economic health to flourish.

Manias Panics Crashes - Kindlberger 1980-11-24

Giving Up on School - Margaret Diane LeCompte 1991-10-07

Students aren't just dropping out of school, they're dumping it. Teachers aren't just quitting, they're running. Each group may blame the other, but they're running from the same problems, not each other. Both are victims of the alienation process that prevails in schools and is cultivated by conditions within the school, the community, and society at large. According to the authors, attempts to decrease dropouts and burnouts have failed because reformers have approached them as two distinct problems. The root causes are the same in each and "mandate an immediate and drastic reappraisal". *Giving Up on School* is the culmination of years of sociological and anthropological research in school setting

Crashed - Adam Tooze 2019-08-27

WINNER OF THE LIONEL GELBER PRIZE A NEW YORK TIMES NOTABLE BOOK OF 2018 ONE OF THE ECONOMIST'S BOOKS OF THE YEAR A NEW YORK TIMES CRITICS' TOP BOOK "An intelligent explanation of the mechanisms that produced the crisis and the

response to it...One of the great strengths of Tooze's book is to demonstrate the deeply intertwined nature of the European and American financial systems."--The New York Times Book Review From the prizewinning economic historian and author of *Shutdown* and *The Deluge*, an eye-opening reinterpretation of the 2008 economic crisis (and its ten-year aftermath) as a global event that directly led to the shockwaves being felt around the world today. We live in a world where dramatic shifts in the domestic and global economy command the headlines, from rollbacks in US banking regulations to tariffs that may ignite international trade wars. But current events have deep roots, and the key to navigating today's roiling policies lies in the events that started it all—the 2008 economic crisis and its aftermath. Despite initial attempts to downplay the crisis as a local incident, what happened on Wall Street beginning in 2008 was, in fact, a dramatic caesura of global significance that spiraled around the world, from the financial markets of the UK and Europe to the factories and dockyards of Asia, the Middle East, and Latin America, forcing a rearrangement of global governance. With a historian's eye for detail, connection, and consequence, Adam Tooze brings the story right up to today's negotiations, actions, and threats—a much-needed perspective on a global catastrophe and its long-term consequences.

The UltraMind Solution - Mark Hyman 2008-12-30

From the ten-time New York Times bestselling author of *Ultrametabolism*, *The Blood Sugar Solution*, and *Eat Fat, Get Thin* comes *The UltraMind Solution*. —Do you find it next to impossible to focus or concentrate? —Have you ever experienced instant clarity after exercise? Alertness after drinking coffee? —Does your brain inexplicably slow down during stress, while multitasking, or when meeting a deadline? —Do you get anxious, worried, or stressed-out frequently? In *The UltraMind Solution*, Dr. Mark Hyman explains that to fix your broken brain, you must heal your body first. Through his simple six-

week plan, Dr. Hyman shows us how to correct imbalances caused by nutritional deficiencies, allergens, infections, toxins, and stress, restoring our health and gaining an UltraMind—one that's highly focused, able to pay attention at will, has a strong memory, and leaves us feeling calm, confident, in control, and in good spirits.

Good Economics for Hard Times - Abhijit V. Banerjee 2019-11-12

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there-- what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

(GLB) Act, the implications of the GLB Act for financial consolidation, and regulatory and supervisory practices.

Integration of the Armed Forces, 1940-1965 - Morris J. MacGregor 2020-06-18

"In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy."_x000D_ Morris J. MacGregor, Jr., received the A.B. and M.A. degrees in history from the Catholic University of America. He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant. Before joining the staff of the U.S. Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff.
