[The Frontiers of Public Law](#) - Jason NE Varuhas

2020-01-09

This major collection contains selected papers from the third Public Law Conference, an international conference hosted by the University of Melbourne in July 2018. The collection includes contributions by leading academics and senior judges from across the common law world, including Australia, Canada, New Zealand, the United Kingdom and the United States. The collection explores the frontiers of public law, examining cutting-edge issues at the intersection of public law and other fields. The collection addresses four principal frontiers: public law and international law; public law and indigenous peoples; public law and other domestic fields, specifically criminal law and private law; and public law and public administration. In common with the two books from the previous Public Law Conferences, this collection offers authoritative insights into the most important issues emerging in

public law, and is essential reading for those working in the field.

Law and Economics of Public Procurement Reforms - Gustavo Piga 2017-10-03

Appropriate laws and regulations are essential tools to direct the action of procurers toward the public good and avoid corruption and misallocation of resources. Common laws and regulations across regions, nations and continents potentially allow for the further opening of markets and ventures to newcomers and new ideas to satisfy public demand. Law and Economics of Public Procurement Reforms collects the original contributions related to the new European Union Directives approved in 2014 by the EU Parliament. They are of both economists and lawyers, and have been presented in a manner that allows for exchanges of views and "real time" interaction. This book features, for each section, an introductory exchange between two

experts of different disciplines, made up of a series of sequential interactions between an economist and a lawyer, which enriches the liveliness of the debate and improve the mutual understanding between the two professions. Four sections characterize this book: Supporting social considerations via public procurement; Green public procurement; Innovation through innovative partnerships; and Lots - The Economic and Legal Challenges of Centralized Procurement. These themes have current relevance of the new European Public Procurement Directives. Written by an impressive array of experts in their respected fields, this volume is of great importance to practitioners who work in the field of EU public procurement in the Member States of the EU, as well as academics and students who study public finance, public policy and regulation.

Technology Development for Security Practitioners

- Babak Akhgar 2021-06-24

This volume is authored by a mix of global contributors from across the landscape of academia, research institutions, police organizations, and experts in security policy and private industry to address some of the most contemporary challenges within the global security domain. The latter includes protection of critical infrastructures (CI), counter-terrorism, application of dark web, and analysis of a large volume of artificial intelligence data, cybercrime, serious and organised crime, border surveillance, and management of disasters and crises. This title explores various application scenarios of advanced ICT in the context of cybercrime, border security and crisis management, serious and organised crime, and protection of critical infrastructures. Readers will benefit from lessons learned from more than 30 large R&D projects within a security context. The book

addresses not only theoretical narratives pertinent to the subject but also identifies current challenges and emerging security threats, provides analysis of operational capability gaps, and includes real-world applied solutions. Advances in Biobanking Practice Through Public and Private Collaborations - Elena Salvaterra

2017-07-10

Advances in Biobanking Practice Through Public and Private Collaborations presents an analysis of methods and current models of partnership between public and private organizations designed to improve biobanking practices in European countries. Chapters describe the state-of-the-art of public-private collaborations in biobanking on a global scale, innovative approaches to public-private partnership the role of a quality management system in biobanking collaborations, quality standard criteria specifically shaped for tumor biobanks, theoretical and practical access conditions to biobanks, the general legal framework governing biobanks at national, European and international levels and a concrete public-private partnership model for managing sample requests. The contributions in this book include examples of established biobanking institutions (such as Spanish

National Cancer Research Centre, National Institute of Health, Italy, and 3C-R, France among others) which serve to give readers a concrete perspective on current biobanking practices and relevant legal and ethical issues that shape the field. This book is an ideal handbook for all medical researchers, healthcare professionals and biobanking stakeholders seeking information about international biobanking practices and business models.

Global food security: ethical and legal challenges -

Carlos M. Romeo Casabona 2010-08-10

Food security will exist when all people, at all times, have physical and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life (as stated in the Rome Declaration in 1996). Given the dimension of the current global food crisis, food security means adopting effective

and specific actions at individual, household, national, regional and global levels. Food security invites us to reflect upon ethical principles like human equity, justice between current and future generations, respect for human dignity and sustainable food production. We strive to maintain our basic ethical convictions and engage in societal debates about other important values. While we do this, we may have to change our ways of life and learn to create new priorities in the face of global responsibility. Science and technology are key tools to reach the Millennium Goals, providing both society and decision makers alike with relevant information and new options within an ethical framework. The contributions found in this publication bring together the perspectives of a diverse group of authors. Coming from the academic world, the public sector and non-governmental organisations (NGOs), they provide the latest views

on 'Global food security: ethical and legal challenges'.

Blockchain, Law and Governance - Benedetta Cappiello 2020-10-21

This volume explores from a legal perspective, how

blockchain works. Perhaps more than ever before, this new technology requires us to take a multidisciplinary approach. The contributing authors, which include distinguished academics, public officials from important national authorities, and market operators, discuss and demonstrate how this technology can be a driver of innovation and yield positive effects in our societies, legal systems and economic/financial system. In particular, they present critical analyses of the potential benefits and legal risks of distributed ledger technology, while also assessing the opportunities offered by blockchain, and possible modes of regulating it. Accordingly, the discussions chiefly focus on the law and governance of blockchain, and thus on the paradigm shift that this technology can bring about.

The Globalization of International Law - Paul Schiff Berman 2017-07-05

'International law' is no longer a sufficient rubric to describe the complexities of law in an era of globalization. Accordingly, this collection situates cross-border norm development at the intersection of interdisciplinary scholarship on comparative law, conflict of laws, civil procedure, cyberlaw, legal pluralism and the cultural analysis of law, as well as traditional international law. It provides a broad range of seminal articles on transnational law-making, governmental and non-governmental networks, judicial influence and cooperation across borders, the dialectical relationships among national, international and non-state legal norms, and the possibilities of 'bottom-up' and plural law-making processes. The introduction situates these articles within the framework of law and globalization and suggests four important ways in which such a

framework enlarges the traditional focus of international law. This book, therefore, provides a crucial reference for scholars and practitioners seeking to understand the varied processes of norm development in the emerging global legal order.

Intelligence Enabled Research - Siddhartha Bhattacharyya 2022-03-29

This book gathers extended versions of papers presented at DoSIER 2021 (the 2021 Third Doctoral Symposium on Intelligence Enabled Research, held at Cooch Behar Government Engineering College, West Bengal, India, during November 12–13, 2021). The papers address the rapidly expanding research area of computational intelligence, which, no longer limited to specific computational fields, has since made inroads in signal processing, smart manufacturing, predictive control, robot navigation, smart cities, and sensor design, to name but a few. Presenting chapters written by experts active in

these areas, the book offers a valuable reference guide for researchers and industrial practitioners alike and inspires future studies.

Enterprise Culture in Neoliberal India - Nandini Gooptu 2013-10-30

The promotion of an enterprise culture and entrepreneurship in India in recent decades has had far-reaching implications beyond the economy, and transformed social and cultural attitudes and conduct. This book brings together pioneering research on the nature of India's enterprise culture,

covering a range of different themes: workplace, education, religion, trade, films, media, youth identity, gender relations, class formation and urban politics. Based on extensive empirical and ethnographic research by the contributors, the book shows the myriad manifestations of enterprise culture and the making of the aspiring, enterprising-self in public culture, social practice, and personal lives, ranging from attempts to construct hegemonic ideas in public discourse, to appropriation by individuals and groups with unintended consequences, to forms of contested and contradictory expression. It discusses what is 'new' about enterprise culture and how it relates to pre-existing ideas, and goes on to look at the processes and mechanisms through which enterprise culture is becoming entrenched, as well as how it affects different classes and communities. The book highlights the social and political implications of

enterprise culture and how it recasts family and interpersonal relationships as well as personal and collective identity. Illuminating one of the most important aspects of India's current economic and social transformation, this book is of interest to students and scholars of Asian Business, Sociology,

Anthropology, Development Studies and Media and Cultural Studies.
