Dangerous Games - Margaret MacMillan 2010-07-13

Acclaimed historian Margaret MacMillan explores here the many ways in which history affects us all. She shows how a deeper engagement with history, both as individuals and in the

sphere of public debate, can help us understand ourselves and the world better. But she also warns that history can be misused and lead to misunderstanding. History is used to justify religious movements and political campaigns alike. Dictators may suppress history because it undermines their ideas, agendas, or claims to absolute authority. Nationalists may tell false, one-sided, or misleading stories about the past. Political leaders might mobilize their people by telling lies. It is imperative that we have an understanding of the past and avoid these and other common traps in thinking to which many fall prey. This brilliantly reasoned work, alive with incident and figures both great and infamous, will compel us to examine history anew—and skillfully illuminates why it is important to treat the past with care.

Economic Development in Africa Report 2019 - United Nations Conference on Trade and Development (UNCTAD)
2019-06-26

The African Continental Free Trade Area (AfCFTA) represents a historic opportunity for the continent to boost intra-African trade and accelerate structural transformation. However, this relies on a critical policy instrument: the effective implementation of preferential trade liberalization among the AfCFTA members. Whether in practice African firms will utilize tariff preferences under the AfCFTA depends on a critical factor: rules of origin (RoO) and

the net benefits of complying with them. This report argues for the adoption of flexible RoO and a strengthening of institutional capacities to ensure an impartial, transparent, predictable, consistent and neutral implementation of agreed RoO.

Liquid Intelligence: The Art and Science of the Perfect Cocktail -

Dave Arnold 2014-11-10

Winner of the 2015 James Beard Award for Best Beverage Book and the 2015 IACP Jane Grigson Award. A revolutionary approach to making better-looking, better-tasting drinks. In Dave Arnold's world, the shape of an ice cube, the sugars and acids in an apple, and the bubbles in a bottle of champagne are all ingredients to be measured, tested, and tweaked. With *Liquid Intelligence*, the creative force at work in Booker & Dax, New York City's high-tech bar, brings readers behind the counter and into the lab. There, Arnold and his collaborators investigate

temperature, carbonation, sugar concentration, and acidity in search of ways to enhance classic cocktails and invent new ones that revolutionize your expectations about what a drink can look and taste like. Years of rigorous experimentation and study—botched attempts and inspired solutions—have yielded the recipes and techniques found in these pages. Featuring more than 120 recipes and nearly 450 color photographs, *Liquid Intelligence* begins with the simple—how ice forms and how to make crystal-clear cubes in your own freezer—and then progresses into advanced techniques like clarifying cloudy lime juice with enzymes, nitro-muddling fresh basil to prevent browning, and infusing vodka with coffee, orange, or peppercorns. Practical tips for preparing drinks by the pitcher, making homemade sodas, and building a specialized bar in your own home are exactly what

drink enthusiasts need to know. For devotees seeking the cutting edge, chapters on liquid nitrogen, chitosan/gellan washing, and the applications of a centrifuge expand the boundaries of traditional cocktail craft. Arnold's book is the beginning of a new method of making drinks, a problem-solving approach grounded in attentive observation and creative techniques. Readers will learn how to extract the sweet flavor of peppers without the spice, why bottling certain drinks beforehand beats shaking them at the bar, and why quinine powder and succinic acid lead to the perfect gin and tonic. *Liquid Intelligence* is about satisfying your curiosity and refining your technique, from red-hot pokers to the elegance of an old-fashioned. Whether you're in search of astounding drinks or a one-of-a-kind journey into the next generation of cocktail making, *Liquid Intelligence* is the

ultimate standard—one that no bartender or drink enthusiast should be without.

[Understanding Four Views on the Lord's Supper](#) - Russell Moore 2007

Who should participate in the Lord's Supper? How frequently should we observe it? What does this meal mean? What happens when we eat the bread and drink from the cup? What do Christians disagree about and what do they hold in common?

These and other questions are explored in this thought-provoking book. This new volume in the Counterpoints: Church Life series allows four contributors to make a case for the following views: * Baptist view (memorialism) * Reformed view (spiritual presence) * Lutheran view (consubstantiation) * Roman Catholic view (transubstantiation) All contributors use Scripture to present their views, and each responds to the others' essays. This book helps readers arrive at their own conclusions. It includes resources such as a listing of statements on the Lord's Supper from creeds and confessions, quotations from noted Christians, a resource listing of books on the Lord's Supper, and discussion questions for each chapter to facilitate small group and classroom use.

Is the Bible Good for Women? -

Wendy Alsup 2017-03-21

Is it possible to embrace the

inherent dignity of womanhood while still cherishing the Bible? Many people, both inside and outside the church, are concerned that an orthodox understanding of the Bible is threatening and even harmful to women. After all, the Bible has a number of passages regarding women that are deeply troubling and hard to read. But is that assessment accurate? In this fascinating look at God's work of redemption from Creation to today, Wendy Alsup explores questions such as: * How does God view justice and equal rights for women? * What does it mean to be made in the image of God? * How have the centuries distorted our interpretation of how God views women? * How did Jesus approach the Old Testament and how does that help us read difficult passages today? * What is the difference between a modern view of feminism and the feminism that Scripture models? * How does the Bible explain the

Bible to us? Using a Jesus-centered understanding to look at both God's grand storyline and specific biblical passages, Alsop gives practical and accessible tools for understanding the noble ways God speaks to and about women in its pages and the dignity He places on His daughters.

Wind Energy Basics - Paul Gipe 2009-05-05

The availability of clean, renewable power is without question going to be the defining challenge and goal of the 21st century, and wind will lead the way. Internationally acclaimed wind energy expert Paul Gipe is as soberly critical of past energy mistakes as he is convincingly optimistic about the future. The overwhelming challenge of transforming our world from one of fossil carbon to one of clean power seems daunting at best—and paralyzingly impractical at worst. *Wind Energy Basics* offers a solution. Wind power can realistically not only replace the lion's share of oil-, coal-, and naturalgas- fired electrical plants in the U.S., but also can add enough extra power capacity to allow for most of the cars in the nation to run on electricity. Gipe explains why such a startlingly straightforward solution is eminently doable and can be accomplished much sooner than previously thought—and

will have the capacity to resuscitate small and regional economies. **Wind Energy Basics** offers a how-to for home-based wind applications, with advice on which wind turbines to choose and which to avoid. He guides wind-energy installers through considerations such as renewable investment strategies and gives cautionary tales of wind applications gone wrong. And for the activist, he suggests methods of prodding federal, state, and provincial governments to promote energy independence.

Orphism and Christianity in Late

Antiquity - Miguel Herrero de Jáuregui 2010-03-26

Many recent discoveries have confirmed the importance of Orphism for ancient Greek religion, philosophy, and literature. However, its nature and role are still very controversial. The key problem of its relationship to Christianity has been discussed by ancient and modern authors from many different viewpoints, albeit too often tainted with apologetic interests and unconscious projections. This free and thorough study of the ancient sources sheds light on these questions and illuminates the complexity of the encounter between Classical culture and Jewish-Christian tradition. New perspectives on the relationship between Classical and Jewish-Christian culture On the avowed subject of Orphism Author is specialist within the field

Ranger Handbook - Department Of The Army 2020-06-29

Marihuana - E.L. Abel 2013-06-29

Of all the plants men have ever grown, none has been praised and denounced as often as marihuana (*Cannabis sativa*).

Throughout the ages, marihuana has been extolled as one of man's greatest benefactors and cursed as one of his greatest scourges.

Marihuana is undoubtedly a herb that has been many things to many people. Armies and navies have used it to make war, men and women to make love.

Hunters and fishermen have snared the most ferocious creatures, from the tiger to the

shark, in its herculean weave.

Fashion designers have dressed the most elegant women in its supple knit. Hangmen have snapped the necks of thieves and murderers with its fiber.

Obstetricians have eased the pain of childbirth with its leaves.

Farmers have crushed its seeds and used the oil within to light their lamps. Mourners have

thrown its seeds into blazing fires

and have had their sorrow transformed into blissful ecstasy by the fumes that filled the air.

Marihuana has been known by many names: hemp, hashish, dagga, bhang, loco weed, grass-the list is endless. Formally christened *Cannabis sativa* in 1753 by Carl Linnaeus,

marihuana is one of nature's hardiest specimens. It needs little care to thrive. One need not talk to it, sing to it, or play soothing tranquil Brahms lullabies to coax it to grow. It is as vigorous as a weed. It is ubiquitous. It

flourishes under nearly every

possible climatic condition.
