Deconstructing the Administrative State - Emmett McGroarty 2017-12-19

This book discusses a battle of ideologies that has lasted over a century and continues today, pitting those who defend the American Experiment and the constitutional structure against those who seek to replace that structure with one that empowers them to implement their ideas with little or no popular input. Progressives want governance by experts - bureaucrats with administrative power to make political judgments on how people must live, thereby narrowing the realm of their liberty. They expand the administrative state and create an identity of interest with Big Business. Both groups want an ever-expanding government: one motivated by power, the other by money. For its part, Big Business has set up camp on Capitol Hill, lavishly funding establishment politicians, of both parties, who rationalize the need for campaign money to the detriment of waging the good fight. Together, politicians and their cronies elbow the citizen off the policy-making stage. However, this state of affairs is kindling the passions of the constitutional structure's greatest "check" on government excess - the American people. This is a fight that can be won. Deconstructing the Administrative State offers the blueprint for victory. Emmett McGroarty is a senior fellow at the American Principles Project Foundation (APPF). He is a graduate of Georgetown University and Fordham School of Law. Jane Robbins is a senior fellow at APPF. She is a graduate of Clemson University (the 2016 national football champions) and Harvard Law School. Erin Tuttle is a policy analyst at APPF and a graduate of Indiana University.

Education to Better Their World - Marc Prensky 2016

In his most visionary book, internationally renowned educator Marc Prensky presents a compelling alternative to how and what we teach our children. Drawing on emerging world trends, he elaborates a comprehensive vision for K-12 education that includes new goals, new means, a new curriculum, a new kind of teaching, and a new use of technology. "Marc Prensky—one of the smartest people working in educational reform today—offers us a lucid, inspiring, optimistic, doable, and crucial blueprint for how we can build a future with the schools children desperately need in our modern, high-risk, highly complex, fast-changing, and imperiled world." —James Paul Gee, Mary Lou Fulton Presidential Professor of Literacy Studies, Regents' Professor, Arizona State University "Marc Prensky was always ahead of his time. Education to better their world continues this trend in spades. This book is a goldmine and a powerful wakeup call that the future is already here—in pockets right now but a harbinger of what is rapidly

emerging. Read the book and make yourself part of the future today. As we are finding in our own work, students are agents of change—in pedagogy, in learning environments, and of society itself. Exciting possibilities await!” —Michael Fullan, Professor Emeritus, OISE/University of Toronto “Marc Prensky’s answer to the question ‘What is the purpose of education?’—that education should now empower youth to improve their communities and the world—would unleash the energy, creativity, and compassion of students and teachers in ways we have never imagined. We need the better world Prensky envisions and we need it now.” —Milton Chen, The George Lucas Educational Foundation “Prensky offers perhaps the most compelling case and model yet articulated by anyone for today’s globally-empowered children. A must-read book for all educators and anyone who cares about education.” —James Tracey, Head of School, Rocky Hill School, RI “Wow. As a takeaway it is good—very good.” —John Seeley Brown “A great book. Filled with ‘food for thought’, common sense, provocative ideas and fun to read.” —Nieves Segovia, Presidenta, Institucion Educativa SEK (SEK International Schools)

Thinking Skills & Eye Q - Oliver Caviglioli 2002-05-01

At last! A book that reveals what thinking looks like. Think you can't see someone's thinking? Think again! This book reveals what happens when the normally private, hidden and undefined act of thinking is transformed into one that is public, available and explicit. *Thinking Skills and Eye Q* is the world's first lexicon of visual tools - once tooled up, you can transform teaching and learning in your classroom. *Thinking Skills and Eye Cue* is a breakthrough in thinking. Ironically, there has been lots of fuzzy thinking about thinking skills. Caviglioli, Harris and Tindall, though, are very clear about what thinking is. In this book, they link thinking skills with visual tools and the genres that pupils encounter in every lesson. The book provides a theory of learning that oozes practicality, common sense and relevance at all Key Stages. *Thinking Skills and Eye Q* is a smart tool kit, for transforming teaching and learning. This book shows how to use 40 different visual tools to: infuse the teaching of the five National Curriculum Thinking Skills into subject teaching develop writing skills in all six genres show pupils how to be independent and creative thinkers and learners make speaking and listening, questioning and responding an integral part of all lessons raise IQ

The Beauty of What Remains - Steve Leder 2023-01-03

The national bestseller From the author of the bestselling *More Beautiful Than Before* comes an inspiring book about loss based on his most popular sermon. As the senior rabbi of one of the largest synagogues in the world, Steve Leder has learned over and over again the many ways death teaches us how to live and love more deeply by showing us not only what is gone but also the beauty of what remains. This inspiring and comforting book takes us on a journey through the experience of loss that is fundamental to everyone. Yet even after having sat beside thousands of deathbeds, Steve Leder the rabbi was not fully prepared for the loss of his own father. It was only then that Steve Leder the son truly learned how loss makes life beautiful by giving it meaning and touching us with love that we had not felt before. Enriched by Rabbi Leder's irreverence, vulnerability, and wicked sense of humor, this heartfelt narrative is filled with laughter and tears, the wisdom of millennia and modernity, and, most of all, an unfolding of the profound and simple truth that in loss we gain more than we ever imagined.

Connect First: 52 Simple Ways to Ignite Success, Meaning, and Joy at Work - Melanie Katzman 2019-10-22

#1 WALL STREET JOURNAL BESTSELLER • USA TODAY BESTSELLER A renowned business psychologist, advisor, and consultant to the world's leading companies reveals the key to greater success, meaning, and joy at work Technology has enabled us to be more interconnected today than ever before. So why do so many of us feel isolated and undervalued at work? Why does it feel like something is missing? It doesn't have to be this way. In these rapidly changing, challenging times, how do we—YOU—develop the intuition, self-awareness, and interpersonal agility required to prosper? Here's what we've lost track of: organizations are run by people, and people run on emotions. Strong relationships are the bedrock of lasting success, meaning, and joy at work. In this life-changing guide, Dr. Melanie Katzman shows you an impactful approach to connect first as fellow humans, then as coworkers and colleagues, to forge the deep bonds that make a significant difference. Learn how to: • Establish respect and make others feel valued • Engage all of your senses to create a truly inclusive culture • Become popular and be the person everyone wants to work with • Grow loyalty by making it about them—your coworkers • Resolve conflicts by remaining curious and open with others • Fight fear (and prepare for the future) by stepping outside your comfort zone and experimenting with new ideas • Have a big impact by leveraging your platform, living your values, and leading the change Dr. Katzman presents 52 actions you can take immediately to create a deeply rewarding work life by connecting to yourself, your organization, and the world at large. These are the same powerful techniques she has used with leaders and employees at the world's top companies to enhance productivity and foster fulfillment and joy at work—the hallmarks of true success.

EBOOK: Developing Thinking; Developing Learning - Debra McGregor 2007-03-16

"This highly informative book provides a comprehensive guide to the teaching of thinking skills in primary and secondary education." Learning and Teaching Update It is now recognised that thinking skills, such as problem-solving, analysis, synthesis, creativity and evaluation, can be nurtured and developed, and education professionals can play a significant role in shaping the way that children learn and think. As a result, schools are being encouraged to make greater use of thinking skills in lessons and the general emphasis on cognition has developed considerably. This book offers a comprehensive introduction to thinking skills in education and provides detailed guidance on how teachers can support cognitive development in their classrooms. Developing Thinking; Developing Learning discusses how thinking programmes, learning activities and teachers' pedagogy in the classroom can fundamentally affect the nature of pupils' thinking, and considers the effects of the learning environment created by peers and teachers. It compares the nature, design and outcomes of established thinking programmes used in schools and also offers practical advice for teachers wishing to develop different kinds of thinking capabilities. This is an indispensable guide to thinking skills in schools today, and is key reading for education studies students, teachers and trainee teachers, and educational psychologists.

Phenomenologies of the City - Dr Henriette Steiner 2015-04-28

Phenomenologies of the City: Studies in the History and Philosophy of Architecture brings architecture and urbanism into dialogue with phenomenology. Phenomenology has informed debate about the city from social sciences to cultural studies. Within architecture, however, phenomenological inquiry has been neglecting the question of the city. Addressing this lacuna, this book suggests that the city presents not only the richest, but also the politically most urgent horizon of reference for philosophical reflection on the cultural and ethical dimensions of architecture. The contributors to this volume are architects and scholars of urbanism. Some have backgrounds in literature, history, religious studies, and art history. The book features 16 chapters by younger scholars as well as established thinkers including Peter Carl, David Leatherbarrow, Alberto Pérez-Gómez, Wendy Pullan and Dalibor Vesely. Rather than developing a single theoretical statement, the book addresses architecture's relationship with the city in a wide range of historical and contemporary contexts. The chapters trace hidden genealogies, and explore the ruptures as much as the persistence of recurrent cultural motifs. Together, these interconnected phenomenologies of the city raise simple but fundamental questions: What is the city for, how is it ordered, and how can it be understood? The book does not advocate a return to a naïve sense of 'unity' or 'order'. Rather, it investigates how architecture can generate meaning and forge as well as contest social and cultural representations.

Chronic Pain in Small Animal Medicine - Steven M. Fox 2009-12-15

Chronic pain is unlike acute pain, it lasts beyond the time necessary for healing and resists normal treatment. No one patient feels pain in the same way and yet in veterinary medicine the patient's gain is generally assessed based on a single standard. There is an increasing focus in veterinary medicine on measuring and resolving pain and suffering. This focus is being supported by an increased understanding of pain neurophysiology, a greater offering of innovative pharmacological treatments, and consumer demand. This book is written for the veterinary health care professional seeking a greater depth of knowledge in the mechanisms of pain accompanying chronic disease states, and the potential targets for treatment. It goes beyond common protocols by focusing on the latest evidence and our understanding of 'why and how to treat'. It describes and evaluates current physiological and biochemical theories of pain transmission, without losing sight of the practical need for such information. Chronic Pain in Small Animal Medicine provides a foundation for advances in animal care and welfare and is of value to veterinarians in practice and training.

The Triumph of Faith in Habakkuk - Donald E. Gowan 2009-09-01

Donald E. Gowan offers new insights into what may be the Old Testament's earliest treatment of the problem of suffering: the book of Habakkuk. "That small, obscure part of the Old Testament tucked away somewhere in the middle of the minor prophets,"--as Gowan put it--Habakkuk has been a middle child of too many Bible students' non-attention. Yet Gowan makes no claim that this book should be more central than it has been. Instead, he shows his own personal, pastoral, and scholarly involvement with this powerful tract. After an introductory chapter, the author examines each of Habakkuk's three sections. Gowan offers his own translation of the text, applying a critical approach, and providing a decisive commentary. Gowan compares the first section's dialogue between the prophet and God (Habakkuk 1:1--2:4) with other Old

Testament dialogues about God's justice. He also discusses God's response, "But the just shall live by faith," as a meaningful answer to Habakkuk's questions. While the "woe-oracles" of the second section (Habakkuk 2:5-20) have not seemed very important in the past, Gowan shows how they form a mock funeral dirge sung in advance of a great tyrant's death. He then applies this insight to the problems of tyranny and liberty today. The psalm (Habakkuk 3) which concludes the book is discussed in terms of Israelite traditions, theophany, faith, and history. The central focus is placed on Habakkuk's striking personal statement concerning the ability of the man of faith to live through suffering joyfully. Recognizing the relationship of our suffering to that of Christ, Gowan concludes *The Triumph of Faith in Habakkuk* by drawing together relevant themes from Habakkuk's time and Jesus's experience.

Digital Didactical Designs - Isa Jahnke 2015-08-14

As web-enabled mobile technologies become increasingly integrated into formal learning environments, the fields of education and ICT (information and communication technology) are merging to create a new kind of classroom: CrossActionSpaces. Grounding its exploration of these co-located communication spaces in global empirical research, *Digital Didactical Designs* facilitates the development of teachers into collaborative designers and evaluators of technology-driven teaching and learning experiences—learning through reflective making. The Digital Didactical Design model promotes deep learning expeditions with a framework that encourages teachers and researchers to study, explore, and analyze the applied designs-in-practice. The book presents critical views of contemporary education, theories of socio-technical systems and behavior patterns, and concludes with a look into the conceptual and practical prototypes that might emerge in schools and universities in the near future.
