**Religious Offences in Common Law Asia** - Li-ann Thio 2021-02-25

This book provides in-depth comparative analysis of how religious penal clauses have been developed and employed within Asian common law states, and the impact of such developments on constitutional rights. By examining the theoretical and conceptual underpinnings of religious offences as well as interrogating the nature and impact of religious penal clauses within the region, it contributes to the broader dialogue in relation to religious penal clauses globally, whether in countries which practise forms of secular or religious constitutionalism. Asian practice is significant in this respect, given the centrality of religion to social life and indeed, in some jurisdictions, to constitutional or national identity. Providing rigorous studies of common law jurisdictions that have adopted similar provisions in their penal code, the contributors provide an original examination and analysis of the use and development of these religious clauses in their

respective jurisdictions. They draw upon their insights into the background sociopolitical and constitutional contexts to consider how the inter-relationship of religion and state may determine the rationale and scope of religious offences. These country-by-country chapters inform the conceptual examination of religious views and sentiments as a basis for criminality and the forms of 'harm' that attract legal safeguards. Several chapters examine these questions from a historical and comparative perspective, considering the underlying bases and scope, as well as evolving objectives of these provisions. Through these examinations, the book critically interrogates the legacy of colonialism on the criminal law and constitutional practice of various Asian states.

Individual Criminal Responsibility for the Financing of Entities involved in Core Crimes - Laura Ausserladscheider Jonas 2021-12-28  
Anchored by the normative framework, this book aims to clarify the basis for individual criminal liability for persons who finance entities that perpetrate core crimes. The objective of this monograph is to clarify the rules to enable international courts and tribunals to identify the extent to which individual criminal liability attaches to the financing of core crimes, as well as the legal basis for such liability. By clarifying the criminal liability of individual who finance entities that perpetrate core crimes, this book also seeks to clarify the mental elements of the mode of liability of aiding and abetting. This is achieved through a thorough analysis of the applicable rules in the international arena, as well as through the comparative analysis.

**Criminal Law for the 21st Century** - Chan Wing Cheong 2013-07-19

In this book, the authors propose a set of improved and modernised provisions expressing the general principles of criminal responsibility. This set of principles will comprise a 'General Part' which, it is proposed, will form part of Singapore's Penal Code. The key objective of devising and enacting the General Part is to significantly revitalise the Penal Code and restore many of its original technical attributes. Each chapter of this book comprises: (a) a carefully considered and drafted provision on a general principle of criminal responsibility; (b) a summary of the existing law in Singapore pertaining to that principle; (c) a selection of recent formulations of that principle from other jurisdictions to benchmark Singapore's law (both current and proposed) with international best practices; and (d) a comparison of these formulations with the provision proposed in this book for inclusion as a General Part in Singapore's Penal Code.

**Punishment Without Trial** - Carissa Byrne Hessick 2021-10-12  
From a prominent criminal law professor, a provocative and timely exploration of how plea bargaining prevents true criminal justice reform and how we can fix it—now in paperback When Americans think of the criminal justice system, the image that comes to mind is a trial—a standard courtroom scene with a defendant, attorneys, a judge, and most important, a jury. It's a fair assumption. The right to a trial by jury is enshrined in both the body of the Constitution and the Bill of Rights. It's supposed to be the foundation that undergirds our entire justice system. But in *Punishment Without Trial: Why Plea Bargaining Is a Bad Deal*, University of North Carolina law professor Carissa Byrne Hessick shows that the popular conception of a jury trial couldn't be further from reality. That bedrock constitutional right has all but disappeared thanks to the unstoppable march of plea bargaining, which began to take hold during Prohibition and has skyrocketed since 1971, when it was affirmed as constitutional by the Supreme Court. Nearly every aspect of our criminal justice system encourages defendants—whether they're innocent or guilty—to take a plea deal. *Punishment Without Trial* showcases how plea bargaining has undermined justice at every turn and across socioeconomic and racial divides. It forces the hand of lawyers, judges, and defendants, turning our legal system into a ruthlessly efficient mass incarceration machine that is dogging our jails and punishing citizens because it's the path of least resistance. Professor Hessick makes

the case against plea bargaining as she illustrates how it has damaged our justice system while presenting an innovative set of reforms for how we can fix it. An impassioned, urgent argument about the future of criminal justice reform, *Punishment Without Trial* will change the way you view the criminal justice system.

*Shipbreaking in Developing Countries* - Md Saiful Karim 2017-12-06

This book explores the process of shipbreaking in developing countries, with a particular focus on Bangladesh. In the past, shipbreaking (the disposal of obsolete ships) was a very common industrial activity in many developed countries. However, due to stringent domestic environmental and labour laws it is

almost impossible for the increasing number of vessels to be disposed of domestically, and now developing nations including Bangladesh, China, India, Turkey and Pakistan regularly participate in this activity. The shipbreaking yards in these countries are not only detrimental to the marine and coastal environment but also represent significant health hazards to local people and workers. Given the global importance of the issue, an effective legal and institutional framework for a sustainable operation of the shipbreaking industry is desperately needed. Sitting at the intersection of three distinct fields – environmental justice, international environmental law and international maritime law – this book offers an innovative take on the issues surrounding the shipbreaking process. Drawing on the case study of Bangladesh due to its prominence in the shipbreaking industry, the author implements an environmental justice framework to examine the issues of sustainability surrounding shipbreaking, and analyses the relationship between social development, economic development and environmental protection. Maritime perspectives of environmental justice will also be highlighted through a discussion of the International Maritime Organization's role in the implementation of the Hong Kong Convention in developing countries. This book will be of great interest to scholars of environmental justice, international maritime law and international environmental law.
