Sea – Wind – Power - Michael Durstewitz 2016-11-09

This book reports on the objectives, methods used and difficulties faced by the RAVE research projects, and presents the results and their significance for the future use of offshore wind energy in a style that is understandable for everyone. Readers are given a comprehensive overview of the current status of offshore wind energy research and the results of the research activities. Offshore wind energy will play a significant role in our future energy supply, yet this development has really only just begun. A large team of experts from the fields of research, industry, public administration and government therefore set themselves the goal of investigating the current and fundamental issues relating to the use of offshore wind energy. They worked on interdisciplinary research projects with the aim of expanding our knowledge and finding application-oriented solutions. Their work has contributed to establishing offshore wind energy as a reliable, sustainable and economical long term source of energy.

Risks and Resilience of Collaborative Networks - Luis M. Camarinha-Matos 2015-10-02

This book constitutes the refereed proceedings of the 16th IFIP WG 5.5 Working Conference on Virtual Enterprises, PRO-VE 2015, held in Albi, France, in October 2015. The 61 revised papers were carefully selected from 126 submissions. They provide a comprehensive overview of identified challenges and recent advances in various collaborative network (CN) domains and their applications, with a strong focus on the following areas: risks in collaborative networks; agility and resilience in collaborative networks; collaboration frameworks; logistics and transportation; innovation networks; governance in collaborative networks; collaborative communities; information and assets sharing; business processes; performance and optimization; and network formation.

Conference for Wind Power Drives 2017 - Univ.-Prof. Georg Jacobs 2017-02-23

The conference proceedings of the 3rd Conference for Wind Power Drives (CWD) contains the collected contributions of the congress which took place on the 7th and 8th of March, 2017. The latest developments and innovations are presented in 40 articles covering the following topics: Plain bearings in WTG gearboxes; Wind turbine gearboxes; Gearboxes - Planetary stage; Materials in WTG; Reliability; Condition monitoring systems; Bearings and WEC; Electric systems; Blade and main bearings; Modelling and simulation; Wind 4.0. The CWD has been held every two years since 2013 and acts as an interdisciplinary platform for knowledge and technology transfer between developers, researchers and operators. Furthermore, the conference promotes networking between industry and university in the field of wind turbine drive trains. The conference is supported by the Association for Power Transmission Engineering in VDMA (German Engineering Federation) and the Research Association for Drive Technology (FVA).

Rennie & Robertson's Textbook of Neonatology E-Book - Janet M. Rennie 2012-09-03

Thoroughly revised and updated, the New Edition of this definitive text explains how to care for neonates using the very latest methods. Of diagnosis and treatment. Rennie & Robertson's Textbook of Neonatology, 5th Edition represents the state-of-the-art on neonatal care, providing not only detailed pathophysiology and clinical chapters on every condition of the neonate but

also comprehensive chapters on the psychosocial aspects of neonatology, such as handling perinatal death and ethical and legal aspects of neonatal care. Contributions from Fetal Medicine experts and Obstetricians provide valuable peripheral information essential to the practice of neonatology. Rennie & Robertson's Textbook of Neonatology, 5th Edition is the gold standard for neonatal care and will be an invaluable tool for everyone involved in the care of the neonate. It serves as an authoritative reference for practitioners, a valuable preparation tool for neonatal certification exams, and a useful resource for the entire neonatal care team. Improved illustration program throughout – color figures, line drawings. Will facilitate quick review and enhance comprehension. Major changes have been made to the chapters on genomics, screening, and a range of neurologic, respiratory and cardiovascular disorders including: resuscitation and ventilation, chronic lung disease, periventricular leucomalacia. This book continues to provide the user with the latest clinically relevant applications in diagnosis and management to enable user to derive appropriate differential diagnosis and management plans. Latest advances in imaging techniques included (CT, cranial ultrasonography, MRI). There has been tremendous growth in the pace of development and refinement of imaging techniques. This book will ensure that the user is fully aware of their clinical applications. Incorporates the latest guidelines on clinical governance (as recommended by RCPCH). Helps ensure implementation of appropriate management plans. Selected "key references now included at end of each chapter. Experts carefully select the most important articles for further reading to facilitate further understanding/research

The Semantic Web – ISWC 2016 - Paul Groth 2016-10-05
The two-volume set LNCS 9981 and 9982 constitutes the refereed proceedings of the 15th International Semantic Web Conference, ISWC 2016, which was held in Kobe, Japan, in October 2016. The 75 full papers presented in these proceedings were carefully reviewed and selected from 326 submissions. The International Semantic Web Conference is the premier forum for Semantic Web

research, where cutting edge scientific results and technological innovations are presented, where problems and solutions are discussed, and where the future of this vision is being developed. It brings together specialists in fields such as artificial intelligence, databases, social networks, distributed computing, Web engineering, information systems, human-computer interaction, natural language processing, and the social sciences. The Research Track solicited novel and significant research contributions addressing theoretical, analytical, empirical, and practical aspects of the Semantic Web. The Applications Track solicited submissions exploring the benefits and challenges of applying semantic technologies in concrete, practical applications, in contexts ranging from industry to government and science. The newly introduced Resources Track sought submissions providing a concise and clear description of a resource and its (expected) usage. Traditional resources include ontologies, vocabularies, datasets, benchmarks and replication studies, services and software. Besides more established types of resources, the track solicited submissions of new types of resources such as ontology design patterns, crowdsourcing task designs, workflows, methodologies, and protocols and measures.

The Road To Berlin - John Erickson 2015-10-08

Beginning with the destruction of the German Sixth Army at Stalingrad, *The Road to Berlin* is the story of how the Red Army drove the Germans from its territory, and finally invaded the Reich. Using an enormous range of primary sources - Soviet, German and Eastern European - John Erickson describes fighting and hardship on a scale almost unimaginable in the West. He provides a detailed narrative of all the battles on all the fronts, and also of the Soviet system of war which achieved, under maximum stress, near-impossible feats in the field and in the factories. The book also tells of the diplomatic moves and counter-moves, including the all-important conferences at Tehran and Yalta. Comprehensive, compelling and immensely readable, it is an indispensable book for any student of the Second World War.

A PASSION FOR POETRY - Maril Ozanne Garrison 2013-06-27
A PASSION FOR POETRY Why poetry? Why has this ancient craft existed throughout time, continuing even into our fast-paced age of moderncy and technology? Perhaps two reasons: 1) The human condition still demands we ask who we are, what we are and why we are; and 2) space is limited in this form of writing requiring the poet reduce his thoughts into a quick-read format. Puns, pundits, quotes, poetry and prose capsule 90% of everything the human race believes to be important and true. Poets are avatars who define the nature and meaning of our roles. They reduce the fabric of our existence to the simplest ingredients of mind, soul, bones, sinew and

desire. It is the forum that speaks to all, reaches all, touches all, teaches all, questions all, answers all.

Social Change, Stress and Mental Health in the Pearl of the Alps - G. Guntern 2012-12-06

I first became acquainted with Dr. Gottlieb Guntern's work at several scientific symposia and was impressed by the way he combined originality and imagination with the proper use of careful, multidisciplinary epidemiologic approaches. Dr. Guntern has attacked some of the

cardinal aspects of the consequences, in terms of health, well-being, and social function, of rapid social change in an originally isolated rural community - a phenomenon that is occurring at an accelerating rate in developing, as well as in developed, countries. This worldwide problem is approached by Dr. Guntern in a holistic manner. Health and social function are seen as integrated elements of human existence and are studied accordingly. His analysis of social events and their consequences for health and well being in a small Alpine village can serve as a paradigm for the study of the process of social change and its various consequences elsewhere. In view of the problem's importance and being impressed by the thoroughness and ingenuity of Dr. Guntern's multifaceted approach, I encouraged him to make the study available to an international readership. Dr. Guntern's book is warmly recommended not only to epidemiologists, sociologists, anthropologists, and psychiatrists, but also to all those interested in psychosocial and psychosocially induced problems in today's and tomorrow's environments.
