Introduction to Sociology 2e - Heather Griffiths 2017-12-31
Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The

textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most

relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

Disposable Women and Other Myths of Global Capitalism - Melissa Wright
2013-01-11

Everyday, around the world, women who work in the Third World factories of global firms face the idea that they are disposable. Melissa W. Wright explains how this notion proliferates, both within and beyond factory walls, through the telling of a simple story: the myth of the disposable Third World woman. This myth explains how young women workers around the world eventually turn into living forms of waste. *Disposable Women and Other Myths of Global Capitalism* follows this

myth inside the global factories and surrounding cities in northern Mexico and in southern China, illustrating the crucial role the tale plays in maintaining not just the constant flow of global capital, but the present regime of transnational capitalism. The author also investigates how women challenge the story and its meaning for workers in global firms. These innovative responses illustrate how a politics for confronting global capitalism must include the many creative ways that working people resist its dehumanizing effects.

Unequal Freedom - Evelyn Nakano GLENN 2009-06-30
The inequalities that persist in America have deep historical roots. Evelyn Nakano Glenn untangles this complex history

in a unique comparative regional study from the end of Reconstruction to the eve of World War II. During this era the country experienced enormous social and economic changes with the abolition of slavery, rapid territorial expansion, and massive immigration, and struggled over the meaning of free labor and the essence of citizenship as people who previously had been excluded sought the promise of economic freedom and full political rights. After a lucid overview of the concepts of the free worker and the independent citizen at the national level, Glenn vividly details how race and gender issues framed the struggle over labor and citizenship rights at the local level between blacks and whites in the South, Mexicans and Anglos in the Southwest, and Asians and haoles (the white planter class) in Hawaii. She illuminates the complex interplay of local and national forces in American society and provides a dynamic view of how labor and citizenship were defined,

enforced, and contested in a formative era for white-nonwhite relations in America.

The Art of Readable Writing

- Rudolf Flesch 1994-01-15

The Art of Readable Writing is an indispensable guide to writing fluently. Noted language maven Dr. Rudolf Flesch moves beyond his examination of and advice on grammar and usage in *The Art of Plain Talk* to the more general principles of style in contemporary writing. Drawing upon a wealth of material from sources as varied as Aristotle and *Life* magazine, Dr. Flesch shows us how we can write more simply and effectively. His famous Readability Formula, devised specially for this book, explains how to analyze writing for its clarity and interest. Entertaining and stimulating and crammed with commonsensical advice, *The Art of Readable Writing* is, above all, immensely readable. *Beyond War* - Douglas P. Fry 2009-04-10

A profoundly heartening view of human nature, *Beyond War* offers a hopeful prognosis for a

future without war. Douglas P. Fry convincingly argues that our ancient ancestors were not innately warlike--and neither are we. He points out that, for perhaps ninety-nine percent of our history, for well over a million years, humans lived in nomadic hunter-and-gatherer groups, egalitarian bands where warfare was a rarity. Drawing on archaeology and fascinating recent fieldwork on hunter-gatherer bands from around the world, Fry debunks the idea that war is ancient and inevitable. For instance, among Aboriginal Australians, warfare was an extreme anomaly. Fry also points out that even today, when war seems ever present, the vast majority of us live peaceful, nonviolent lives. We are not as warlike as we think, and if we can learn from our ancestors, we may be able to move beyond war to provide real justice and security for the world.

Arrowsmith - Sinclair Lewis

the West Indies with a serum to halt an epidemic. A tragic turn of events forces him to come to terms with his career and his personal life.

Introductory Grammar of Amharic - Wolf Leslau 2000

This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and

does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

The College Writer - Randall VanderMey 2006-01-10

[This text] provide[s] coverage of the writing process for today's visually oriented students. The text also included a wealth of rhetorical strategies that instructors and students found accessible and helpful. [It] reinforces these strengths with enhanced coverage of many important topics such as analyzing the rhetorical situation, evaluating sources, avoiding plagiarism, and developing visual literacy.- Pref.

Love in the Time of Cholera (Illustrated Edition) - Gabriel García Márquez 2020-10-27
A beautifully packaged edition

of one of García Márquez's most beloved novels, with never-before-seen color illustrations by the Chilean artist Luisa Rivera and an interior design created by the author's son, Gonzalo García Barcha. In their youth, Florentino Ariza and Fermina Daza fall passionately in love. When Fermina eventually chooses to marry a wealthy, well-born doctor, Florentino is devastated, but he is a romantic. As he rises in his business career he whiles away the years in 622 affairs—yet he reserves his heart for Fermina. Her husband dies at last, and Florentino purposefully attends the funeral. Fifty years, nine months, and four days after he first declared his love for Fermina, he will do so again.

Type and Image - Philip B. Meggs 1992-03-15
Type and Image The Language of Graphic Design Philip B. Meggs What is the essence of graphic design? How do graphic designers solve problems, organize space, and imbue their work with those visual and symbolic qualities

that enable it to convey visual and verbal information with expression and clarity? The extraordinary flowering of graphic design in our time, as a potent means for communication and a major component of our visual culture, increases the need for designers, clients, and students to comprehend its nature. In this lively and lavishly illustrated book, the author reveals the very essence of graphic design. The elements that combine to form a design— signs, symbols, words, pictures, and supporting forms—are analyzed and explained. Graphic design's ability to function as language, and the innovative ways that designers combine words and pictures, are discussed. While all visual arts share common spatial properties, the author demonstrates that graphic space has unique characteristics that are determined by its communicative function. Graphic designs can have visual and symbolic properties which empower them to

communicate with deep expression and meaning. The author defines this property as graphic resonance and explains how it occurs. After defining design as a problem-solving process, a model for this process is developed and illustrated by an in-depth analysis of actual case histories. This book will provide insight and inspiration for everyone who is interested or involved in graphic communications. While most materials about form and meaning in design have a European origin, this volume is based on the dynamic and expressive graphic design of America. The reader will find inspiration, hundreds of exciting examples by many of America's outstanding graphic designers, and keen insights in *Type and Image*.

Brand Relevance - David A. Aaker 2010-12-15

Branding guru Aaker shows how to eliminate the competition and become the lead brand in your market This ground-breaking book defines the concept of brand relevance using dozens of case studies- Prius, Whole Foods, Westin, iPad and more-and explains how brand relevance drives market dynamics, which generates opportunities for your brand and threats for the competition. Aaker reveals how these companies have made other brands in their categories irrelevant. Key points: When managing a new category of product, treat it as if it were a brand; By failing to produce what customers want or losing momentum and visibility, your brand becomes irrelevant; and create barriers to competitors by supporting innovation at every level of the organization. Using dozens of case studies, shows how to create or dominate new

categories or subcategories, making competitors irrelevant Shows how to manage the new category or subcategory as if it were a brand and how to create barriers to competitors Describes the threat of becoming irrelevant by failing to make what customer are buying or losing energy David Aaker, the author of four brand books, has been called the father of branding This book offers insight for creating and/or owning a new business arena. Instead of being the best, the goal is to be the only brand around-making competitors irrelevant.

Water, Cultural Diversity, and Global Environmental Change - Barbara Rose Johnston 2011-12-07

Co-published with UNESCO A product of the UNESCO-IHP project on Water and Cultural Diversity, this book represents an effort to examine the complex role water plays as a force in sustaining, maintaining, and threatening the viability of culturally diverse peoples. It is argued that water is a fundamental

human need, a human right, and a core sustaining element in biodiversity and cultural diversity. The core concepts utilized in this book draw upon a larger trend in sustainability science, a recognition of the synergism and analytical potential in utilizing a coupled biological and social systems analysis, as the functioning viability of nature is both sustained and threatened by humans.

Digitising the Industry - Internet of Things Connecting the Physical, Digital and Virtual Worlds -

Peter Friess 2016-07-07

This book provides an overview of the current Internet of Things (IoT) landscape, ranging from the research, innovation and development priorities to enabling technologies in a global context. A successful deployment of IoT technologies requires integration on all layers, be it cognitive and semantic aspects, middleware components, services, edge devices/machines and infrastructures. It is intended to be a standalone book in a series that covers the Internet of Things activities of the IERC - Internet of Things European Research Cluster from research to technological innovation, validation and deployment. The book builds on the ideas put forward by the European Research Cluster and the IoT European Platform Initiative (IoT-EPI) and presents global views and state of the art results on the challenges facing the research, innovation, development and deployment of IoT in the next years. The IoT is bridging the

physical world with virtual world and requires sound information processing capabilities for the "digital shadows" of these real things. The research and innovation in nanoelectronics, semiconductor, sensors/actuators, communication, analytics technologies, cyber-physical systems, software, swarm intelligent and deep learning systems are essential for the successful deployment of IoT applications. The emergence of IoT platforms with multiple functionalities enables rapid development and lower costs by offering standardised components that can be shared across multiple solutions in many industry verticals. The IoT applications will gradually move from vertical, single purpose solutions to multi-purpose and collaborative applications interacting across industry verticals, organisations and people, being one of the essential paradigms of the digital economy. Many of those applications still have to be

identified and involvement of end-users including the creative sector in this innovation is crucial. The IoT applications and deployments as integrated building blocks of the new digital economy are part of the accompanying IoT policy framework to address issues of horizontal nature and common interest (i.e. privacy, end-to-end security, user acceptance, societal, ethical aspects and legal issues) for providing trusted IoT solutions in a coordinated and consolidated manner across the IoT activities and pilots. In this, context IoT ecosystems offer solutions beyond a platform and solve important technical challenges in the different verticals and across verticals. These IoT technology ecosystems are instrumental for the deployment of large pilots and can easily be connected to or build upon the core IoT solutions for different applications in order to expand the system of use and allow new and even unanticipated IoT end uses. Technical topics discussed in the book include:

Introduction Digitising industry and IoT as key enabler in the new era of Digital Economy IoT Strategic Research and Innovation Agenda IoT in the digital industrial context: Digital Single Market Integration of heterogeneous systems and bridging the virtual, digital and physical worlds Federated IoT platforms and interoperability Evolution from intelligent devices to connected systems of systems by adding new layers of cognitive behaviour, artificial intelligence and user interfaces. Innovation through IoT ecosystems Trust-based IoT end-to-end security, privacy framework User acceptance, societal, ethical aspects and legal issues Internet of Things Applications

Handbook for translators of Spanish historical documents - Juan Villasana Haggard 1969

The Great Zapruder Film Hoax - James H. Fetzer
2013-11-07

This is the first book to expose

a crucial aspect of the cover-up of the JFK assassination conspiracy: the doctoring of the Zapruder film, allegedly a 27-second home movie shot by Abraham Zapruder in Dealey Plaza. The evidence for alteration of the Zapruder movie takes many forms, including inconsistencies with eyewitness testimony, discrepancies with other films and photographs, impossible movements within the time-frame of the movie, contradictions between the movie and the physical layout of Dealey Plaza, and the multiple versions of the movie itself. This book brings together all the leading authorities within the assassination research community, including David Healy, authority on technical processes of film production; Jack White, who for forty years has made a special study of the JFK assassination movies and photographs; John Costella, Ph.D., a physicist and engineer with a background in optics, the properties of light, and moving objects; and David W.

Mantick, Ph.D., the foremost expert on the medical evidence in the JFK assassination.

A Parallel Postsecondary Universe - Clifford Adelman 2000

This report describes a new system of credentialing that has arisen in the information technology and telecommunications industries over the past decade. It compares this system to traditional higher education, identifying both similarities and dissimilarities, and points to some cases in which the two interact.... The summary section of this report emphasizes the major themes of the certification system and its relationship to higher education: 1. The system is global and operates in many languages. 2. The student, not the institution, is at the center of the system. 3. The system has brought competency-based education and performance assessment to a status they have never enjoyed within traditional higher education. 4. Certification replace neither experience nor degrees, and

the IT system does not pretend to be higher education. the summary also indicates the critical need for more information on certification candidates and providers of course work, since the new system is now large enough to play a role in state and national planning for postsecondary education. (HoF/text adopted).

Reading Images - Gunther R. Kress 1996

Reading Images provides the first systematic and comprehensive account of the grammar of visual design. By looking at the formal elements and structures of design the authors examine the ways in which images communicate meaning.

A Cognitive Psychology of Mass Communication - Richard Jackson Harris 2009-05-19

In this fifth edition of *A Cognitive Psychology of Mass Communication*, author Richard Jackson Harris continues his examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge

influences our attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics - sex, violence, advertising - to lesser-studied topics, such as values, sports, and entertainment education. The fifth and fully updated edition offers: highly accessible and engaging writing contemporary references to all types of media familiar to students substantial discussion of theories and research, including interpretations of original research studies a balanced approach to covering the breadth and depth of the subject discussion of work from both psychology and media disciplines. The text is appropriate for Media Effects, Media & Society, and Psychology of Mass Media coursework, as it examines the effects of mass media on human cognitions, attitudes, and behaviors through

empirical social science research; teaches students how to examine and evaluate mediated messages; and includes mass communication research, theory and analysis.

Uranium - Tom Zoellner
2009-03-05

The fascinating story of the most powerful source of energy the earth can yield Uranium is a common element in the earth's crust and the only naturally occurring mineral with the power to end all life on the planet. After World War II, it reshaped the global order- whoever could master uranium could master the world. Marie Curie gave us hope that uranium would be a miracle panacea, but the Manhattan Project gave us reason to believe that civilization would end with apocalypse. Slave labor camps in Africa and Eastern Europe were built around mine shafts and America would knowingly send more than six hundred uranium miners to their graves in the name of national security.

Fortunes have been made from this yellow dirt; massive energy grids have been run from it. Fear of it panicked the American people into supporting a questionable war with Iraq and its specter threatens to create another conflict in Iran. Now, some are hoping it can help avoid a global warming catastrophe. In Uranium, Tom Zoellner takes readers around the globe in this intriguing look at the mineral that can sustain life or destroy it.

Experiential Marketing -

Kerry Smith 2016-03-29

The most researched, documented, and comprehensive manifesto on experiential marketing. As customers take control over what, when, why, and how they buy products and services, brands face the complete breakdown and utter failure of passive marketing strategies designed more than a half-century ago. To connect with a new generation of customers, companies must embrace and deploy a new marketing mix, powered by a more effective discipline: experiences. Experiential marketing, the use of live, face-to-face engagements to connect with audiences, create relationships and drive brand affinity, has become the fastest-growing form of marketing in the world as the very companies that built their brands on the old Madison Avenue approach—including Coca-Cola, Nike, Microsoft, American Express and

others—open the next chapter of marketing. . . as experiential brands. Using hundreds of case studies, exclusive research, and interviews with more than 150 global brands spanning a decade, global experiential marketing experts Kerry Smith and Dan Hanover present the most in-depth book ever written on how companies are using experiences as the anchor of reinvented marketing mixes. You'll learn: The history and fundamental principles of experiential marketing How top brands have reset marketing mixes as experience-driven portfolios The anatomy of a brand experience The psychology of engagement and experience design The 10 habits of highly experiential brands How to measure the impact of experiential marketing How to combine digital and social media in an experiential strategy The experiential marketing vocabulary How to begin converting to experiential marketing Marketers still torn between outdated marketing models and the need to

reinvent how they market in today's customer-controlled economy will find the clarity they need to refine their marketing strategies, get a roadmap for putting their brands on a winning path, and walk away inspired to transition into experiential brands.
