This text presents the findings of a major investigation of second language proficiency in various groups of school-aged learners. It invites a frank appraisal of the research from an outside panel of experts. The theoretical and practical implications of the study are the subject of a lively debate focused on three main research issues: the nature of second language proficiency, the impact of classroom treatment on second language learning, and the role of social and individual factors in bilingual development. This original collection of articles will be of interest to all those concerned with policy and practice in second language education.

**Emblemata Hispanica** - Pedro F. Campa 1990

Emblem books—books containing pictorial representations whose symbolic meaning is expressed in words—were produced in great quantities and in numerous languages during the sixteenth and seventeenth centuries. Because literary critics and art historians increasingly recognize the importance of the emblem in Renaissance and Baroque studies, this book answers the need for a bibliography listing the locations of all known emblem books in Spanish, as well as those translated into Spanish, written by Spaniards in other languages, and polyglot editions that contain a Spanish text. Covered in this bibliography are all emblem books published from the beginning to the end of the Spanish Golden Age, as well as a wide range of secondary sources on relevant subjects, among them mythography, paradoxography, numismatics, fetes, funerals, proverbs, apothegms, antiquarianism, collecting, and pertinent studies in art history and architecture. Providing call numbers for library locations, information on facsimile reprints, and microform editions, the work is extensively indexed—by date and place of publication, by printers and booksellers, by authors and artists, and by dedicatees, as well as by subject.
