Theory at a Glance: A Guide for Health Promotion Practice (Second Edition) - U.S. Department of Health and Human Services 2018-11-22

The Theory at a Glance: A Guide for Health Promotion Practice (Second Edition) describes influential theories of health-related behaviors, processes of shaping behavior, and the effects of community and environmental factors on behavior. It complements existing resources that offer tools, techniques, and model programs for practice. Theory at a Glance makes health behavior theory accessible and provides tools to solve problems and assess the effectiveness of health promotion programs. For nearly a decade, public health and health care practitioners have consulted the original version of Theory at a Glance for guidance on using theories about human behavior to inform program planning, implementation, and evaluation. Theory at a Glance can be used as a stand-alone handbook, as part of in-house staff development programs, or in conjunction with theory texts and continuing education workshops.

Public Administration and Democratic Governance - United Nations. Division for Public Administration and Development Management 2007
Strengthening trust, accountability, and participation

in government are essential to serving the needs of citizens. This volume brings together concepts and ideas from around the world on how to achieve more responsive and accountable public administration within the framework of democratic governance. Public officials and administrators are provided with conceptual and policy tools to help them understand today's complex challenges, and to pursue ideas that are most likely to enhance service delivery from the citizen's perspective. The publication is one of the analytical products emerging from the Global Forum on Reinventing Government.

The State at Work - Hans-Ulrich Derlien 2009-01-01
Representing the most extensive research on public employment, these two volumes explore the radical changes that have taken place in the configuration of national public services due to a general expansion of public employment that was followed by stagnation and decreases. Part-time employment and the involvement of women also increased as a component of the public sector and were linked to the most important growth areas such as the educational, health care and personal social services sectors. The two volumes that make up this study shed important insight on these changes. Volume 1 offers a unique internationally comparative multi-dimensional analysis of ten public service systems belonging to different families of major advanced western countries. It contains the most comprehensive and comparable quantitative analyses available anywhere of ten public service systems; Britain, New Zealand, Australia, Canada, the US, Germany, Spain, France, Denmark and Sweden. Volume 2 is a comprehensive analysis of the ten public service systems, with in-depth comparisons of the systems along eight dimensions including central-regional-local government employment proportions and the change of the services since the 1950s with respect to social composition (gender, minorities, elites, career groups). Scholars and professionals in the fields of public administration, politics and economics will find this two-volume

compendium informative and practical.
Decision By Objectives: How To Convince Others That You Are Right - Ernest Forman 2001-12-10
Decision-making is a process of choosing from possible courses of action in order to attain goals and objectives. Nobel laureate Herbert Simon wrote that the whole process of managerial decision-making is synonymous with the practice of management. Decision-making is at the core of all managerial functions. Planning, for example, involves the following decisions: What should be done? When? How? Where? By whom? Other managerial functions, such as organizing, implementing, and controlling, rely heavily on decision-making. *Decision by Objectives* is an invaluable book about the art and science of decision-making. It presents a very practical approach to decision-making that has a sound theoretical foundation, known as the analytic hierarchy process. Intended for both the student and the professional, the book includes approaches to prioritizing, evaluating alternative courses of action, forecasting, and allocating resources. By focusing on objectives rather than alternatives alone, it shows the reader how to synthesize information from multiple sources, analyses, and perspectives. The methods presented have been gaining popularity throughout the world.

The Artist's Field Guide to Yellowstone - Katie Shepherd Christiansen 2021-05-04
The Artist's Field Guide to Yellowstone introduces readers to the wildlife of the Greater Yellowstone Ecosystem through the works of fifty of the region's distinguished writers and artists. This robust anthology of eclectic artwork and inspiring storytelling offers an enlivened take on the traditional field guide and argues for the intrinsic value of this world-renowned ecosystem. Yellowstone naturalist and artist Katie Shepherd Christiansen has compiled this sensible field guide and elegant art book to highlight the unique

biodiversity of the Greater Yellowstone Ecosystem, organized across four habitat strata: sky, earth, soil, and water. Writers and artists pair up to reveal new ways of understanding key species through prose, poetry, and artwork. The addition of scientific descriptions provides a natural history frame, and Christiansen's illustrations of ecologically connected species bring life to every page. Contributors hail from the Greater Yellowstone area. Writers are Elise Atchison, Rick Bass, Todd Burritt, Tom Campbell, Lyn Dalebout, Matt Daly, Joanne Dornan, Gary Ferguson, Matt Hart, Geneen Marie Haugen, Susan Marsh, Craig Mathews, Arthur Middleton, Doug Peacock, Karen Reinhart, Kelsey Sather, Jack Turner, Rebecca Watters, Tina Welling, Marylee White, Connie Wieneke, Todd Wilkinson, and Terry Tempest Williams. Artists are Kalon Baughan, Tamara Callens, Meredith Campbell, Sue Cedarholm, Derek DeYoung, Loretta Domaszewski, Katy Ann Fox, Dave Hall, Dwayne Harty, Laney Hicks, DG House, Will Hunter, S. J. Karikó, Laney, Jennifer Lowe-Anker, Mimi Matsuda, James Prosek, Robert Schlenker, Jocelyn Slack, Tucker Smith, Kay Stratman, Kara Tripp, Shannon Troxler, Kathryn Mapes Turner, John Wasson, Carrie Wild, and Monte Yellow Bird Sr.

Networks - Steven T. Karris 2009

No previous knowledge of data communications and related fields is required for understanding this text. It begins with the basic components of telephone and computer networks and their interaction, centralized and distributive processing networks, Local Area Networks (LANs), Metropolitan Area Networks (MANs), Wide Area Networks (WANs), the International Standards Organization (OSI) Management Model, network devices

that operate at different layers of the OSI model, and the IEEE 802 Standards. This text also introduces several protocols including X.25, TCP/IP, IPX/SPX, NetBEUI, AppleTalk, and DNA. The physical topologies, bus, star, ring, and mesh are discussed, and the ARCNet, Ethernet, Token Ring, and Fiber Distributed Data Interface (FDDI) are described in detail. Wiring types and network adapters are well covered, and a detailed discussion on wired and wireless transmissions including Bluetooth and Wi-Fi is included. An entire chapter is devoted to the various types of networks that one can select and use for his needs, the hardware and software required, and tasks such as security and safeguarding data from internal and external disasters that the network administrator must perform to maintain the network(s) he is responsible for. Two chapters serve as introductions to the Simple Network Management Protocol (SNMP) and Remote Monitoring (RMON). This text includes also five appendices with very useful information on how computers use numbers to condition and distribute data from source to destination, and a design example to find the optimum path for connecting distant facilities. Each chapter includes True-False, Multiple-Choice, and problems to test the reader's understanding. Answers are also provided.

Byzantine Butrint - Richard Hodges 2020-02-28

Maskwork is a new way of looking at the art of masks and mask-making: a unique combination of ethnography, design and practical advice. Jenny Foreman's book for teachers and practitioners of drama, art, design and technology grew out of a research bursary from the UK's National Society for Education in Art and Design. They received her report with great enthusiasm as "one of the very best projects . . . likely to make a valuable and useful contribution" to both specific and cross-discipline school and college courses as well as to adult performing groups. The first part explains the anthropology, nature, use and meaning of masks around the world, from prehistory to modern times. Richly illustrated with colour and black-and-white photographs,

this section introduces the ethical implications of free use of masks which have ethnographical connections - an important aspect completely neglected elsewhere. The second part comprises eight theme workshops, including theory, background and instructions for mask-making, supplemented by photographs of assembly and use by groups of people from all age-ranges. Materials are inexpensive and easy to acquire, while line drawings aid step-by-step construction. A bibliography and reference section helps readers go on to even greater understanding and achievements.

The Enforcement of Intellectual Property Rights: A Case Book - L.T.C. Harms 2012-12

With this publication, WIPO and the author aim at making available for judges, lawyers and law enforcement officials a valuable tool for the handling of intellectual property cases. To that effect, the case book uses carefully selected court decisions drawn from various countries with either civil or common law traditions. The extracts from the decisions and accompanying comments illustrate the different areas of intellectual property law, with an emphasis on matters that typically arise in connection with the enforcement of intellectual property rights in civil as well as criminal proceedings.

On the Road to Emmaus - Daniel Tomlinson 2018-07-28

Central Departments and Local Authorities - John Aneurin Grey Griffith 1966

Ethics for Bureaucrats - John Rohr 2017-12-01

This important text integrates the study of ethics into public management training, highlighting Supreme Court opinions on three specific constitutional values—equality, freedom, and property—focusing on the pedagogical aspects of law and posing challenging questions to help readers apply theories to concrete situations. It includes a case index for further research. Topics of specific interest include abortion, affirmative action, bureaucratic bashing, civil disobedience, the Ethics in Government Act of 1978, the Iran-Contra scandal, moral absolutism, privileged communications, religious fundamentalism, and whistle blowing. The Midwest Review of Public Administration lauds it as "...a unique teaching tool."

Toxoplasmosis - Olgica Djurković Djaković 2012

A ubiquitous organism able to infect all mammals and birds, which has been estimated to infect one third of the global human population, *Toxoplasma gondii* is the most successful parasite on Earth, and toxoplasmosis a major zoonotic disease. A current approach to this zoonosis is the "one health" concept, based on the understanding that a disease occurring between animals and man in a specific environment can only be dealt with at the interface of all "players" involved. This book, composed of a series of articles which integrate human and animal data on toxoplasmosis, by authors from all over the world, offers its readers a view on the current research interests and achievements.

The Europeanization of National Policies and Politics of Immigration - T. Faist 2007-02-28

Structure and Synthesis of PID Controllers - Aniruddha Datta 2013-03-14

In many industrial applications, the existing constraints mandate the use of controllers of low and fixed order while typically, modern methods of optimal control produce high-order controllers. The authors seek to start to bridge the resultant gap and present a novel methodology for the design of low-order controllers such as those of the P, PI and PID types. Written in a self-contained and tutorial fashion, this book first develops a fundamental result, generalizing a classical stability theorem - the Hermite-Biehler Theorem - and then applies it to designing controllers that are widely used in industry. It contains material on: • current techniques for PID controller design; • stabilization of linear time-invariant plants using PID controllers; • optimal design with PID controllers; • robust and non-fragile PID controller design; • stabilization of first-order systems with time delay; • constant-gain stabilization with desired damping • constant-gain stabilization of discrete-time plants.

Housing Policy Reforms in Post-Socialist Europe - Sasha Tsenkova 2008-12-29

The book explores both theoretically and empirically the impacts of housing reforms on housing provision in the context of the transition from a centrally-planned to a market-based economy. Fifteen years after the overthrow of state socialism housing policy has lost its privileged status of a political priority as most politically embedded systems had favoured market-based solutions to housing problems. This departure from state controlled housing policies with the aim of providing a dwelling for every family is significant, particularly in some post-socialist countries where no new housing policy has emerged. The transition process, embedded in the paradigm shift from central planning to markets, has triggered off turbulence and adjustments with tangible outcomes in post-socialist housing systems. What has changed and what new housing systems have emerged during this dramatic 'transition to markets and democracy'? Are

these systems more efficient and equitable? These questions are the main focus of the book with an emphasis on diversity and change in housing reforms. The book supports the hypothesis that notions of convergence are not really appropriate to the conceptualisation of post-socialist housing systems. It argues that different housing policy choices are going to map out increasingly divergent scenarios for future development.

Sourcebook on Criminal Law - Michael T. Molan 2001

The second edition of the Criminal Law Sourcebook has been significantly expanded in order to provide law students with a comprehensive selection of key materials drawn from law reports, statutes, Law Commission Consultation Papers and Reports, and Home Office publications. The materials reflect the range of topics taught on the vast majority of undergraduate and CPE criminal law modules, and provide a platform from which the reader can embark upon a more critical evaluation of both theory and doctrine. Extensive extracts are included from a number of recent landmark rulings, including decisions by the House of Lords in *B v DPP* (defence of mistake), *R v Smith* (objective test for the defence of provocation), *R v Hinks* (whether the recipient of a gift can be a thief), and *R v Powell and Daniels*; *R v English* (scope of accessory liability for murder), and the Court of Appeal's ruling in *In Re A* (conjoined twins). Recent statutory initiatives that have been incorporated include the Protection from Harassment Act 1997, the Criminal Justice (Terrorism and Conspiracy) Act 1998, and the Sexual Offences (Amendment) Act 2000. The impact of the Human Rights Act 1998, in so far as it relates to substantive criminal law, is also covered. Substantial extracts are provided from all relevant Law Commission and Home Office law reform publications. In addition to the draft Criminal Code Bill, materials have been selected dealing with reform of sexual offences, consent, conspiracy to defraud, deception offences, offences against the person, accessory liability and involuntary manslaughter.

Information Technology and Organizational Learning -

Arthur M. Langer 2017-10-17

Focusing on the critical role IT plays in organizational development, the book shows how to employ action learning to improve the competitiveness of an organization. Defining the current IT problem from an operational and strategic perspective, it presents a collection of case studies that illustrate key learning issues. It details a dynamic model for effective IT management through adaptive learning techniques—supplying proven educational theories and practices to foster the required changes in your staff. It examines existing organizational learning theories and the historical problems that occurred with companies that have used them, as well as those that have failed to use them.

World Economic Outlook, April 2014 - International Monetary Fund. Research Dept. 2014-04-08

Global activity has broadly strengthened and is expected to improve further in 2014-15, according to the April 2014 WEO, with much of the impetus for growth coming from advanced economies. Although downside risks have diminished overall, lower-than-expected inflation poses risks for advanced economies, there is increased financial volatility in emerging market economies, and increases in the cost of capital will likely dampen investment and weigh on growth. Advanced economy policymakers need to avoid a premature withdrawal of monetary accommodation. Emerging market economy policymakers must adopt measures to changing fundamentals, facilitate external adjustment, further monetary policy tightening, and carry out structural reforms. The report includes a chapter that analyzes the causes of worldwide decreases in real interest rates since the 1980s and concludes that global rates can be expected to rise in the medium term, but only moderately. Another chapter examines factors behind the fluctuations in emerging market economies' growth and concludes that strong growth in China played a key role in buffering the effects of the global financial crisis

in these economies.

Ethics in Public Service for the New Millennium -

Richard Chapman 2019-07-12

This title was first published in 2000: The focus of this analysis is that of moral standards in public service, with special attention to the role(s) of officials. It presents discussion of some of the issues that seem to the contributors to be of pressing importance and that seem to have relevance for public service in the new millennium. It concentrates in particular on public officials, and the constraints imposed on them by the political environment in liberal democracies.

Patterns of Local Autonomy in Europe - Andreas Ladner
2018-10-26

This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).

Ethics and Public Administration - H George Frederickson
2015-03-04

"Ethics and Public Administration" refutes the arguments that administrative ethics cannot be studied in an empirical manner and that empirical analysis can deal only with the trivial issues in administrative ethics. Within a theoretical perspective, the authors qualify their findings and take care not to over-generalise

results. The findings are relevant to the practice of public administration. Specific areas addressed include understanding public corruption, ethics as control, and ethics as administration and policy

Explanatory Report on the European Charter of Local Self-government - Council of Europe 1986

Teaching and the Case Method - Carl Roland Christensen
1987

Teaching and the Case Method delves into the special role of teacher and students in the case method learning process. Schools that want to use the case method more effectively can use this book to teach groups of faculty how to apply case method techniques. For the first time, too, a book about case method teaching attempts to show how the method can be applied in a liberal arts setting. A liberal arts module in the book presents an innovative program for instructors who want to experiment with discussion teaching in traditional arts and science areas. The book focuses on a wide range of knotty problems faced by most instructors, experienced or new, creating an opportunity for them to learn from each other. It's main purpose is to provide a rich opportunity for both professional school and liberal arts instructors to develop their own discussion leadership skills, and to further the process of learning for both themselves and their students.
