Blasphemy And Defamation of Religions In a Polarized World - Darara Timotewos Gubo 2014-12-24
The twenty-first century has been significantly shaped by the growing importance of religion in international politics resulting in rising polarization among nation states. This new dynamic has presented new challenges to international human rights principles. This book deals with some of these new challenges, particularly the growing demand by Muslim states for protection of Islamic religion from blasphemy and defamation. Member states of the Organization of Islamic Cooperation (OIC), through resolutions at the United Nations, made efforts to introduce laws that globally protect Islamic religion from blasphemy and defamation. The bid by OIC member states faced opposition from Western countries. The conflicting claims of the two sides are discussed in this book. The book clearly shows the impact of blasphemy and defamation of religion laws on certain aspects of fundamental human rights principles.

Faith Versus Fact - Jerry A. Coyne 2016-05-17
"A superbly argued book." —Richard Dawkins, author of *The God Delusion*
The New York Times bestselling author of *Why Evolution is True* explains why any attempt to make religion compatible with science is doomed to fail In this provocative book, evolutionary biologist Jerry A. Coyne lays out in clear, dispassionate detail why the toolkit of science, based on reason and empirical study, is reliable, while that of religion—including faith, dogma, and revelation—leads to incorrect, untestable, or conflicting conclusions. Coyne is responding to a national climate in which more than half of Americans don't believe in evolution, members of Congress deny global warming, and long-conquered childhood diseases are reappearing

because of religious objections to inoculation, and he warns that religious prejudices in politics, education, medicine, and social policy are on the rise. Extending the bestselling works of Richard Dawkins, Daniel Dennett, and Christopher Hitchens, he demolishes the claims of religion to provide verifiable "truth" by subjecting those claims to the same tests we use to establish truth in science. Coyne irrefutably demonstrates the grave harm—to individuals and to our planet—in mistaking faith for fact in making the most important decisions about the world we live in. Praise for *Faith Versus Fact*: "A profound and lovely book . . . showing that the honest doubts of science are better . . . than the false certainties of religion." —Sam Harris, author of *The End of Faith*

Political Religion and Religious Politics - David S. Gutterman 2015-10-14
Profound demographic and cultural changes in American society over the last half century have unsettled conventional understandings of the relationship between religious and political identity. The "Protestant mainline" continues to shrink in numbers, as well as in cultural and political influence. The growing population of American Muslims seek both acceptance and a firmer footing within the nation's cultural and political imagination. Debates over contraception, same-sex relationships, and "prosperity" preaching continue to roil the waters of American cultural politics. Perhaps most remarkably, the fastest-rising religious demographic in most public opinion surveys is "none," giving rise to a new demographic that Gutterman and Murphy name "Religious Independents." Even the evangelical movement, which powerfully re-entered American politics during the 1970s and 1980s and retains a strong foothold in the Republican Party, has undergone generational turnover and no longer

represents a monolithic political bloc. *Political Religion and Religious Politics: Navigating Identities in the United States* explores the multifaceted implications of these developments by examining a series of contentious issues in contemporary American politics. Gutterman and Murphy take up the controversy over the "Ground Zero Mosque," the political and legal battles over the contraception mandate in the Affordable Health Care Act and the ensuing Supreme Court Hobby Lobby decision, the national response to the Great Recession and the rise in economic inequality, and battles over the public school curricula, seizing on these divisive challenges as opportunities to illuminate the changing role of religion in American public life. Placing the current moment into historical perspective, and reflecting on the possible future of religion, politics, and cultural conflict in the United States, Gutterman and Murphy explore the cultural and political dynamics of evolving notions of national and religious identity. They argue that questions of religion are questions of identity -- personal, social, and political identity -- and that they function in many of the same ways as race, sex, gender, and ethnicity in the construction of personal meaning, the fostering of solidarity with others, and the conflict they can occasion in the political arena.

Transitioning from an Ethnic to a Multicultural Church - Byoung Ok Koo 2019-12-20

Multicultural churches help us understand God's will for us to become one in this multicultural world and experience a heavenly gathering in advance. This book, based on case studies of four multicultural churches, provides insights and knowledge regarding minority-dominant multicultural churches in the United States. Many multicultural churches in America are mainly concerned about racial reconciliation between the white and the black. On the other hand, resources concerning minority-dominant multicultural churches are scant. With the special attention on Korean immigrant churches, this book contributes to the body of knowledge regarding minority-dominant multicultural churches. Specifically, this book provides a model transition process, called the Windmill T-process, to facilitate the movement of monocultural/monoethnic churches in taking steps towards acquiring the characteristics of multicultural churches. In addition, this book touches on the issue of evangelism in the multicultural church. Although there is limited insight, the book describes what factors first draw different racial/ethnic people to a church and what factors cause them to stay there. All in all, this book will guide you to a deeper understanding on multicultural churches and its practices for all nations beyond ethnic/racial identities.

The Varieties of Religious Experience - William James 1982-12-16
Standing at the crossroads of psychology and religion, this catalyzing work applied the scientific method to a field abounding in abstract theory. William James believed that individual religious experiences, rather than the precepts of organized religions, were the backbone of the world's religious life. His discussions of conversion, repentance, mysticism and saintliness, and his observations on actual, personal religious experiences - all support this thesis. In his introduction, Martin E. Marty discusses how James's pluralistic view of religion led to his remarkable tolerance of extreme forms of religious behaviour, his challenging, highly original theories, and his welcome lack of pretension in all of his observations on the individual and the divine.

Culture and Cultures in Tourism - Andres Artal-Tur 2020-06-30

According to the World Tourism Organization (UNWTO), international tourists engaging in cultural activities accounted for more than 500 million of international tourist numbers in 2017. City tourism relies on culture as a major product, providing benefits not only for interested visitors, but also for the local resident population. New trends in tourism include "experiential tourism", where the interactions between tourists and residents become a key part of the tourism experience and overall customer satisfaction. New technologies and IT applications allow tourists to design their own trip, given the presence of global companies like Trip Advisor, Booking.com and AirBnB. This comprehensive volume explores new trends in cultural tourism, demonstrating how and why culture has become a central factor in tourism. The authors analyse a wide range of relevant issues, including: how heritage-based and cultural tourism could contribute to the sustainability of destinations; the increase of religious travels to and within Arab countries; and how cultural tourism fosters understanding among people and cultures, and could even potentially help to consolidate peace at a regional level. The book also analyses interactions between hosts (the local residents) and guests (the cultural visitors), revisiting the pioneer hippy travelling experiences in Turkey of the 1960s and how they shaped youth culture. This book will be of great interest to students and researchers of cultural tourism. The chapters were originally published in the journal *Anatolia*.

Encounters with World Affairs - Emilian Kavalski 2016-03-09

This book is designed to familiarise students with leading International Relations (IR) theories and their explanation of political events, phenomena, and processes which cross the territorial boundaries of the state. Thus, students will be exposed to the interplay between power, interest, ideas, identity, and resistance, in explaining continuity and change in international relations. Developed to provide students with the analytical tools and intellectual frameworks needed to understand the behaviour of different international actors in contemporary global affairs. This textbook responds to the challenges of a dynamic job market by assisting students to gain both thorough theoretical knowledge and training them to apply this knowledge to real world problems. In short, this textbook delivers: A comprehensive and interdisciplinary approach to the examination of national, regional and global trends in politics, economics and socio-cultural developments allowing students to understand: ¶ the practice and theory of contemporary international relations ¶ the politics, culture, history, and economies of different regions around the world ¶ the role played by international interactions, culture, and government in local, national, and global settings. Equipping students with the proficiency: ¶ to understand and interpret the dynamics, patterns, and issues of global affairs ¶ to know how to get more information about particular questions ¶ to evaluate that information independently and effectively. To these ends, the textbook provides a number of features that will appeal to students and avoids overwhelming students with chapters on topics which (in practice) are rarely on courses, while nonetheless providing a comprehensive overview of the field. Introduces students to the main debates, topics, and terms in the field

and allows them to decide which they would like to focus on in their further studies.

Religious Liberty and the Law - Angus J. L. Menuge 2017-07-20

Questions of religious liberty have become flashpoints of controversy in virtually every area of life around the world. Despite the protection of religious liberty at both national and supranational levels, there is an increasing number of conflicts concerning the proper way to recognize it – both in modern secular states and in countries with an established religion or theocratic mode of government. This book provides an analysis of the general concept of religious liberty along with a close study of important cases that can serve as test beds for conflict resolution proposals. It combines the insights of both pure academics and experienced legal practitioners to take a fresh look at the nature, scope and limits of religious liberty. Divided into two parts, the collection presents a blend of legal and philosophical approaches, and draws on cases from a wide range of jurisdictions, including Brazil, India, Australia, the USA, the Netherlands, and Canada. Presenting a broad range of views, this often provocative volume makes for fascinating reading for academics and researchers working in the areas of law and religion, legal philosophy and human rights.

Al-Ghazali's Philosophical Theology - Frank Griffel 2009-05-28

The Muslim thinker al-Ghazali (d. 1111) was one of the most influential theologians and philosophers of Islam and has been considered an authority in both Western and Islamic philosophical traditions. Born in northeastern Iran, he held the most prestigious academic post in Islamic theology in Baghdad, only to renounce the position and teach at small schools in the provinces for no money. His contributions to Islamic scholarship range from responding to the challenges of Aristotelian philosophy to creating a new type of Islamic mysticism and integrating both these traditions-falsafa and Sufism-into the Sunni mainstream. This book offers a comprehensive study of al-Ghazali's life and his understanding of cosmology-how God creates things and events in the world, how human acts relate to God's power, and how the universe is structured. Frank Griffel presents a serious revision of traditional views on al-Ghazali, showing that his most important achievement was the creation of a new rationalist theology in which he transformed the Aristotelian views of thinkers such as Avicenna to accord with intellectual currents that were well-established within Muslim theological discourse. Using the most authoritative sources, including reports from al-Ghazali's students, his contemporaries, and his own letters, Griffel reconstructs every stage in a turbulent career. The al-Ghazali that emerges offers many surprises, particularly on his motives for leaving Baghdad and the nature of his "seclusion" afterwards. Griffel demonstrates that al-Ghazali intended to create a new cosmology that moved away from concerns held earlier by Muslim theologians and Arab philosophers. This new theology aimed to provide a framework for the pursuit of the natural sciences and a basis for Islamic science and philosophy to flourish beyond the 12th century. Al-Ghazali's Philosophical Theology is the most thorough examination to date of this important thinker.

Religious Interactions in Europe and the Mediterranean World - Katsumi Fukasawa 2019-12-12

The religious histories of Christian and Muslim countries in Europe and Western Asia are often treated in isolation from one another. This can lead to a limited and simplistic understanding of the international and

interreligious interactions currently taking place. This edited collection brings these national and religious narratives into conversation with each other, helping readers to formulate a more sophisticated comprehension of the social and cultural factors involved in the tolerance and intolerance that has taken place in these areas, and continues today. Part One of this volume examines the history of relations between people of different Christian confessions in western and central Europe. Part Two then looks at the relations between Western and Eastern Orthodox Christianity, Islam and Judaism in the vast area that extends around the Mediterranean from the Iberian Peninsula to western Asia. Each Part ends with a Conclusion that considers the wider implications of the preceding essays and points the way toward future research. Bringing together scholars from Asia, the Middle East, Europe, and America this volume embodies an international collaboration of unusual range. Its comparative approach will be of interest to scholars of Religion and History, particularly those with an emphasis on interreligious relations and religious tolerance.
Religions of the World - Lewis M. Hopfe 1979

The Bloomsbury Handbook of Religious Education in the Global South - Yonah Hisbon Matemba 2022-02-10

The Bloomsbury Handbook of Religious Education in the Global South presents new comparative perspectives on Religious Education (RE) across the Global South. Including 23 chapters written by scholars from the Global North and South, this is the first authoritative reference work on the subject. The handbook is thematically organised into seven sections. The first three sections deal with provision, response to changes in contemporary society, and decolonizing RE. The next four sections explore young people and RE, perspectives on teachers, RE in higher education, and finally, challenges and opportunities for RE. The term 'Global South' is used here primarily to signify the deep economic divide with the Global North, but the concept is also examined in historical, geographical, political, social and cultural terms, including the indelible influence of religion in all four broadly defined regions. Exploring RE from local, cross-national as well as regional and sub-regional perspectives, the handbook examines RE from its diverse past, present realities, and envisioned future revealing not only tensions, contestations, injustices and inequalities of power, but importantly, how inclusive forms of RE can help solve these problems.

Challenging Life: Existential Questions as a Resource for Education - Jari Ristiniemi 2018

There is an increasing recognition today that young people need to have knowledge about religions and world views in order to live and work in diverse societies. What kind of 'maps' are they provided with through religious, values and ethics education? Does education address the challenging existential questions that children and adolescents ask about life and the world? This volume addresses different aspects of how existential questions have been dealt with in educational research. It especially draws attention to the Swedish research tradition of focusing on life questions and the interpretation of life in education, but with contemporary international research added. It also addresses issues of ethics education and discusses possible options for the future of existential questions as a resource for education.

Our Social World - Jeanne H. Ballantine 2019-01-02

The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award—enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. *Our Social World: Introduction to Sociology* inspires students to develop their sociological imaginations, to see the world and personal events from a new perspective, and to confront sociological issues on a day-to-day basis. Organized around the "Social World" model, a conceptual framework that demonstrates the relationships among individuals (the micro level); organizations, institutions, and subcultures (the meso level); and societies and global structures (the macro level), the authors use this framework to help students develop the practice of using three levels of analysis, and to view sociology as an integrated whole, rather than a set of discrete subjects. The Seventh Edition includes new coverage of climate change, the influence of robots and artificial intelligence on workers, race relations in the Trump era, transgender identity and gender fluidity, sexual harassment in the workplace and the #MeToo movement, declining marriage rates, the impact of tracking for students at all academic achievement levels, smoking as an example of health and inequality in the U.S., gun violence and the student movement to control access to guns, social media, and Russian interference in the 2016 election. Defending the Gospel in Legal Style - John Warwick Montgomery 2017-10-25

Traditional apologetics is either focused on obscure, quasi-Thomist philosophical arguments for God's existence or on 18th-century-style answers to alleged biblical contradictions. But a new approach has recently entered the picture: the juridical defence of historic Christian faith, with its particular concern for demonstrating Jesus's deity and saving work for humankind. The undisputed leader of this movement is John Warwick Montgomery, emeritus professor of law and humanities, University of Bedfordshire, England, and director, International Academy of Apologetics, Evangelism and Human Rights, Strasbourg, France. His latest book (of more than sixty published during his career) shows the strength of legal apologetics: its arguments, drawn from secular legal reasoning, can be rejected only at the cost of jettisoning the legal system itself, on which every civilised society depends for its very existence. The present work also includes theological essays on vital topics of the day, characterised by the author's well-known humour and skill for lucid communication.

Pentecostal Theology for the Twenty-First Century - May Ling Tan-Chow 2016-09

In our post 9/11 world where there is a growing religious fundamentalism, and when both exclusion and easy tolerance are inadequate options, this book offers a creative alternative arguing that Pentecostalism has the potential to be a peaceful harbinger of plurality. The potential lies in its spirituality - a lively pneumatology and eschatology. The eschatological Spirit is seen as orientated towards the other, crossing boundaries in redemptive embrace, transcending exclusion and easy tolerance. This book's non-Western perspective and the empirical contextual study of Singapore's multicultural and multi-faith context are unique contributions to religion and society. This is a book for students, pastors, teachers, and theologians concerned for an approach to mission that is sensitive to their context, who want to learn from a creative theological voice from what has been perhaps the largest religious movement in history, and who see the immense potential in lively theology by Christians of the Chinese diaspora who can speak to the many millions of ethnic Chinese Christians. This book will also appeal to those outside Christianity who are interested in its attempts to engage with a complex multi-ethnic and multi-religious situation such as that in Singapore.

Religious Identifications in Late Antique Papyri - Mattias Brand 2022-10-17

This volume provides novel social-scientific and historical approaches to religious identifications in late antique (3rd–12th century) Egyptian papyri, bridging the gap between two academic fields that have been infrequently in full conversation: papyrology and the study of religion. Through eleven in-depth case studies of Christian, Islamic, "pagan," Jewish, Manichaean, and Hermetic texts and objects, this book offers new interpretations on markers of religious identity in papyrus documents written in Coptic, Greek, Hebrew, Aramaic, and Arabic. Using papyri as a window into the lives of ordinary believers, it explores their religious behavior and choices in everyday life. Three valuable perspectives are outlined and explored in these documents: a critical reflection on the concept of identity and the role of religious groups, a situational reading of religious repertoire and symbols, and a focus on speech acts as performative and efficacious utterances. *Religious Identifications in Late Antique Papyri* offers a wide scope and comparative approach to this topic, suitable for students and scholars of late antiquity and Egypt, as well as those interested in late antique religion.

Signposts - Policy and practice for teaching about religions and non-religious world views in intercultural education - Robert Jackson 2014-08-01

How can the study of religions and non-religious world views contribute to intercultural education in schools in Europe? An important recommendation from the Committee of Ministers of the Council of Europe (Recommendation CM/Rec(2008)12 on the dimension of religions and non-religious convictions within intercultural education) aimed to explain the nature and objectives of this form of education. Signposts goes much further by providing advice to policy makers, schools (including teachers, senior managers and governors) and teacher trainers on tackling issues arising from the recommendation. Taking careful account of feedback from education officials, teachers and teacher trainers in Council of Europe member states, Signposts gives advice, for example, on clarifying the terms used in this form of education; developing competences for teaching and learning, and working with different didactical approaches; creating "safe space" for moderated student-to-student dialogue in the classroom; helping students to analyse media representations of religions; discussing non-religious world views alongside religious perspectives; handling human rights issues relating to religion and belief; and linking schools (including schools of different types) to one another and to wider communities and organisations. Signposts is not a curriculum or a policy statement. It aims to give policy makers, schools and teacher trainers in the Council of Europe member states, as well as others who wish to use it, the tools to work through the issues arising from interpretation of the recommendation to meet the needs of individual countries. Signposts results from the work of an international panel of experts convened jointly by the Council of Europe and the European Wergeland Centre, and is written on the group's behalf by Professor Robert Jackson.

[A Criminologist's Life](#) - Cheryl Lero Jonson 2022-09-13

A Criminologist's Life: Essays in Honor of the Criminological Legacy of Francis T. Cullen honors the vast scholarly contributions of Francis T. "Frank" Cullen as well as the immeasurable influence that he has had on the field for over 40 years. With over 500 publications to his name and more than 67,000 citations to his work, Frank Cullen has left an indelible mark on the fields of criminology and criminal justice. Although best known for his work on rehabilitation and criminological theory, Frank also has profusely published in and shaped the areas of white-collar crime, the use of meta-analytic techniques to organize knowledge, the sexual victimization of college women, and public opinion on crime and punishment. However, Frank's legacy on the field is not limited to his

scholarly contributions: He has served as a mentor to countless students, colleagues, and others in the field, helping support and guide the next generation of scholars. Thus, the current volume is organized to recognize both his scholarly work and mentoring, as well as to provide an opportunity for Frank to reflect on his career "in his own words." The result is a collection of essays from Frank's former students, colleagues, and friends written to pay homage to the more than 40 years of work he has done to advance criminological knowledge and shape the field.

Religious Interactions in Europe and the Mediterranean World -

Katsumi Fukasawa 2017-07-14

The religious histories of Christian and Muslim countries in Europe and Western Asia are often treated in isolation from one another. This can lead to a limited and simplistic understanding of the international and interreligious interactions currently taking place. This edited collection brings these national and religious narratives into conversation with each other, helping readers to formulate a more sophisticated comprehension of the social and cultural factors involved in the tolerance and intolerance that has taken place in these areas, and continues today. Part One of this volume examines the history of relations between people of different Christian confessions in western and central Europe. Part Two then looks at the relations between Western and Eastern Orthodox Christianity, Islam and Judaism in the vast area that extends around the Mediterranean from the Iberian Peninsula to western Asia. Each Part ends with a Conclusion that considers the wider implications of the preceding essays and points the way toward future research. Bringing together scholars from Asia, the Middle East, Europe, and America this volume embodies an international collaboration of unusual range. Its comparative approach will be of interest to scholars of Religion and History, particularly those with an emphasis on interreligious relations and religious tolerance.
