**Montessori Madness** - Trevor Eissler 2009

"We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. **Montessori Madness!** explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book asks parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what education should look like will never be the same"--Back cover.

A collection of automotive art.

**Computer-aided Tolerancing** - Fumihiko Kimura 2012-12-06

Theory and practice of tolerances are very important for designing and manufacturing engineering artifacts on a rational basis. Tolerance specifies a degree of "discrepancy" between an idealized object and its physical realization. Such discrepancy inevitably comes into our product realization processes because of practical cost consideration or our inability to fully control manufacturing processes. Major product and production characteristics which are affected by tolerances are product quality and cost. For achieving high precision machines tight tolerance specification is necessary, but this will normally increase product cost. In order to optimally compromise the conflicting requirements of quality and cost, it is essential to take into account of the total product life cycle throughout product planning, design, manufacturing, maintenance and recycling. For example, in order to construct durable products under severe working conditions, low sensitivity of product functionality with respect to tolerances is required. In future, re-use of components or parts will become important, and tolerance synthesis with respect to this aspect will be an interesting future research topic.

**A Golden Fleecing** - R. Eugene Jackson 1980

"Sarah Sweetflower has inherited Cactus Bob's Saloon in the ghost town

of Elbow's Bend. It is here that she plans to open Sarah Sweetflower's Sarsaparilla Saloon and Bridal Shoppe with the help of our hero, Stanley Stoutheart. But the villainous Sly Scavenger and his accomplice, Miss Twinkle Toes, are more interested in Cactus Bob's lost gold mine. With the help of a professional gunfighter, Big Bad Granny, they attempt to do away with Sarah, only to be foiled by the town's only permanent resident, Tumbleweed, who doubles as both the town judge and constable."-- Provided by publisher

**Methods for Multilevel Analysis and Visualisation of Geographical Networks** - Céline Rozenblat 2013-06-03

This leading-edge study focuses on the latest techniques in analysing and representing the complex, multi-layered data now available to geographers studying urban zones and their populations. The volume tracks the successful results of the SPANGEO Project, which was set up in 2005 to standardize, and share, the syncretic, multinational mapping techniques already developed by geographers and computer scientists. SPANGEO sought new and responsive ways of visualising urban geographical and social data that reflected the fine-grained detail of the inputs. It allowed for visual representation of the large and complex networks and flows which are such an integral feature of the dynamism of urban geography. SPANGEO developed through the 'visual analytics loop' in which geographers collaborated with computer scientists by feeding data into the design of visualisations that in turn spawned the urge to incorporate more varied data into the visualisation. This volume covers all the relevant aspects, from conceptual principles to the tools of network analysis and the actual results flowing from their deployment. Detailed case studies set out in this volume include spatial multi-level analyses of flows in airports and sea ports, as well as the fascinating scientific networks in European cities. The volume shows how the primary concern of geography--the interaction of society with physical space--has been revived by the complexities of new cartographical and statistical methodologies, which allow for highly detailed mapping and far more powerful computer analysis of spatial relationships.

**Fourth Regional Plan** - Regional Plan Association 2019

In the past two decades, the New York-New Jersey-Connecticut region has prospered into one of the world's leading economies. But the benefits of this economic resurgence have been uneven, leaving many behind and resulting in problems that could curtail the region's future prosperity. The Regional Plan Association's Fourth Regional Plan is an ambitious assessment that reviews the most persistent problems and provides a guide to correcting them. Topics discussed include a crisis of housing affordability, overburdened and deteriorating infrastructure, vulnerability to

climate change, and a pervasive distrust in government. The plan offers solutions including how to bring nearly two million jobs to the region by 2040, while promoting shared prosperity, well-being and sustainability across the region. The Fourth Regional Plan continues the Regional Plan Association's tradition of providing concrete ideas for improving the tri-state region. Highlights include radically restructuring the MTA and Port Authority to support creation of a modernized and expanded subway and regional rail network; significantly increasing the availability of housing; and expanding the Regional Greenhouse Gas Initiative to fund climate change initiatives. This highly visual, comprehensive plan will help elected officials, policymakers, and advocates guide any region to a more equitable, sustainable, healthy, and prosperous future.

**Leadership in Europe** - Heller, Johnny 1998-02

Although leadership is obviously a topic with global significance, this special issue has a distinctive European flavor. This is partly due to the fact that the contributors and editors hail from five European countries, but even the two chapters that describe major cross-national research covering up to 60 countries, concentrate attention on European issues including eastern countries that only moved into the center of Europe six or seven years ago. The justification for inclusion in this special issue is that each report makes a potentially practical contribution to work and organizational psychologists and those working in organizations in the area of Human Resource Management or Consultancy. European psychology has not yet given leadership anything like the attention it deserves and consequently the contrast with the United States, where this subject is extensively researched, is very noticeable. This special edition may lead to a reassessment of the opportunities and perhaps also act as a stimulus for more applied research to be carried out to engage with the prevalent conditions in Europe. The growth of the European Union and its various harmonization provisions seeks to establish what is often called a 'level playing field' for organizations and this will give leaders in competing enterprises new challenges and new opportunities. Several contributions in the present special issue begin to relate to these developing areas.

**Business Operations in Israel** - Amnon Rafael 1990

**Contested Waterscapes in the Mekong Region** - Francois Molle 2012-05-04

The catchment area of the Mekong River and its tributaries extends from China, through Burma/Myanmar, Thailand, Laos, Cambodia and to Vietnam. The water resources of the Mekong region - from the Irrawaddy and Nu-Salween in the west, across the Chao Phraya to the Lancang-Mekong and Red River in the east- are increasingly contested.

Governments, companies, and banks are driving new investments in roads, dams, diversions, irrigation schemes, navigation facilities, power plants and other emblems of conventional 'development'. Their plans and interventions should provide some benefits, but also pose multiple burdens and risks to millions of people dependent on wetlands, floodplains and aquatic resources, in particular, the wild capture fisheries of rivers and lakes. This book examines how large-scale projects are being proposed, justified, and built. How are such projects contested and how do specific governance regimes influence decision making? The book also highlights the emergence of new actors, rights and trade-off debates, and the social and environmental consequences of 'water resources development'. This book shows how diverse, and often antagonistic, ideologies and interests are contesting for legitimacy. It argues that the distribution of decision-making, political, and discursive power influences how the waterscapes of the region will ultimately look and how benefits, costs and risks will be distributed. These issues are crucial for the transformation of waterscapes and the prospects for democratizing water governance in the Mekong region. The book is part of the action-research of the M-POWER (Mekong Program on Water, Environment and Resilience) knowledge network. Published with IFAD, CGIAR Challenge Program on Water & Food, M-POWER, Project ECHEL-EAU and HEINRICH BOLL STIFTUNG

**Korean** - Jaehoon Yeon 2019-06-25

**Korean: A Comprehensive Grammar** is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed

analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.

**Twelve Years a Slave** - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Chess for Beginners - Cassandra Flores 2021-03-28

Take on the challenge of becoming a chess player using this book to give you a solid foundation of the basics. Chess might seem harder to play than checkers, but once you understand the moves and the rules, it can be truly enjoyable! Among many other topics you'll learn here: - The ancient origins of chess and how it evolved over time - How each piece moves and how to apply the basic rules - The most successful chess strategies to dominate every game - How to apply superior opening tactics and strategies to win every game - How to craft a superior middlegame

plan to prepare for a successful endgame - To deliver the final strike when the two fighting minds reach the decisive phase of endgame - And so much more. You know you need to checkmate your opponent before he checkmates you. But checkmate isn't as easy as it sounds. Wrestling your opponent's king into a position to checkmate him can take hours. Many casual players lacking the know-how give up on endgames they're certain to win.

**Private Market Financing** - International Monetary Fund 1995-01-01

This paper reports the growing number of low-income countries that are making efforts to resolve their debt problems, often aided by the resources of the debt reduction facility for countries of the International Development Association (IDA). Progress for most, however, remains slow. With the backing of IDA resources and assistance from official bilateral sources, debt buy-backs have been concluded by Bolivia, Guyana, Mozambique, Niger, Sao Tome and Principe, Uganda, and Zambia. Preliminary discussions on similar operations are under way with several other countries. Although most of the major baric debt cases have been resolved, attention still needs to be focused on the problems of low-income countries. In many of these countries, the process of debt restructuring has been delayed owing to economic and political difficulties. To maintain market access on reasonable terms, countries need consistently to implement strong macroeconomic and structural policy programs. Maintenance of such programs is likely to be particularly important in the period ahead, given the high degree of uncertainty with regard to interest rate movements in the industrial countries.
