**Living in Volkswagen Buses** - Julian Beck 1992

Poetry. "Rhythmically I have tried to capture the tempo of my time, its ecstasy, its hardness, its lyricism, its great variety. The songs are musical, and I took a seat with the rhythm, its fluctuations, and the way in which they make music, which reaches in each poem its own order: repetitions, choruses, instrumental changes, the deposition of the phrases. Each poem, however, must produce its own music, because each poem must be free in itself. I tried to express through rhythm and language, in the flow of images, the freedom, at last, of the poetic voice. I write these poems all the time. At home, in the car, backstage, at cafes. I am always writing this single poem. Since I was 15. And I intend to continue writing them for the rest of my life" -Julian Beck, 1925-1985.

Merging Traffic - John A. C. Conybeare 2004

During the past few decades the global auto industry has concentrated into a small number of groups led by GM, Ford, Daimler-Chrysler, VW, Toyota, and Renault. The trend is of great political and economic significance because of the large size of the industry, its importance to the economic health of many countries, and its geographic spread around the globe. Many reasons are commonly cited when trying to explain this rapid corporate consolidation--cost savings, new products and markets, price controls, and labor negotiations chief among them. Frequently, however, mergers do not achieve their stated goals. Merging Traffic explores all these factors and goes on to suggest that, as with the mystique of the automobile itself, other motivations may prevail.
