The Korean Automotive Industry,
Volume 1 - A. J. Jacobs 2021-12-10

In 1962, South Korea assembled just
1,100 new automobiles. By 1996, this
total had soared to 2,812,714. What
explains this remarkable growth? The
answer is complex, and involves a
combination of a supportive State,
timely technology alliances, a
skilled but historically low-paid
workforce, aggressive pricing, savvy
entrepreneurs, and fortuitous
circumstances. Despite this amazing
ascent, comparatively little has been

written about the Korean auto
industry in English. In the first of
a two-volume set, this 11-chapter
book seeks to help fill this void by
providing in-depth examinations of
all six of Korea's automakers from
their beginnings through 1996.

Uniquely written from the perspective
of industry analysts at the time
(without knowledge of the Asian
Fiscal Crisis), the book should prove
informative to practitioners,
scholars, and students interested in
automotive history, international
political economy, Asian studies, and
more.

For almost seventy years, there has been suspicion that his death was not an accident--and may very well have been an act of assassination. *Killing Patton* takes readers inside the final year of the war and recounts the events surrounding Patton's tragic demise, naming names of the many powerful individuals who wanted him silenced.

Twelve Years a Slave - Solomon Northup 2021-01-01

"Having been born a freeman, and for

more than thirty years enjoyed the blessings of liberty in a free State--and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years--it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The River of Doubt - Candice Millard
2009-12-16

NATIONAL BESTSELLER • At once an incredible adventure narrative and a penetrating biographical portrait--the bestselling author of *Destiny of the Republic* brings us the true story of Theodore Roosevelt's harrowing exploration of one of the most dangerous rivers on earth. *The River of Doubt*--it is a black, uncharted

tributary of the Amazon that snakes through one of the most treacherous jungles in the world. Indians armed with poison-tipped arrows haunt its shadows; piranhas glide through its waters; boulder-strewn rapids turn the river into a roiling cauldron. After his humiliating election defeat in 1912, Roosevelt set his sights on the most punishing physical challenge he could find, the first descent of an unmapped, rapids-choked tributary of the Amazon. Together with his son Kermit and Brazil's most famous explorer, Cândido Mariano da Silva Rondon, Roosevelt accomplished a feat so great that many at the time refused to believe it. In the process, he changed the map of the western hemisphere forever. Along the way, Roosevelt and his men faced an unbelievable series of hardships,

losing their canoes and supplies to punishing whitewater rapids, and enduring starvation, Indian attack, disease, drowning, and a murder within their own ranks. Three men died, and Roosevelt was brought to the brink of suicide. The River of Doubt brings alive these extraordinary events in a powerful nonfiction narrative thriller that happens to feature one of the most famous Americans who ever lived. From the soaring beauty of the Amazon rain forest to the darkest night of Theodore Roosevelt's life, here is Candice Millard's dazzling debut.

Murder in the Métro - Gayle K. Brunelle 2010-05

On the evening of May 16, 1937, the train doors opened at the Porte Dorée station in the Paris Métro to reveal a dying woman slumped by a window, an

eight-inch stiletto buried to its hilt in her neck. No one witnessed the crime, and the killer left behind little forensic evidence. This first-ever murder in the Paris Métro dominated the headlines for weeks during the summer of 1937, as journalists and the police slowly uncovered the shocking truth about the victim: a twenty-nine-year-old Italian immigrant, the beautiful and elusive Laetitia Toureaux. Toureaux toiled each day in a factory, but spent her nights working as a spy in the seamy Parisian underworld. Just as the dangerous spy Mata Hari fascinated Parisians of an earlier generation, the mystery of Toureaux's murder held the French public spellbound in pre-war Paris, as the police tried and failed to identify her assassin. In *Murder in the Métro*,

Gayle K. Brunelle and Annette Finley-Croswhite unravel Toureaux's complicated and mysterious life, assessing her complex identity within the larger political context of the time. They follow the trail of Toureaux's murder investigation to the Comité Secret d'Action Révolutionnaire, a secret right-wing political organization popularly known as the Cagoule, or "hooded ones." Obsessed with the Communist threat they perceived in the growing power of labor unions and the French left wing, the Cagoule's leaders aimed to overthrow France's Third Republic and install an authoritarian regime allied with Italy. With Mussolini as their ally and Italian fascism as their model, they did not shrink from committing violent crimes and fomenting terror to accomplish

their goal. In 1936, Toureaux -- at the behest of the French police -- infiltrated this dangerous group of terrorists and seduced one of its leaders, Gabriel Jeantet, to gain more information. This operation, the authors show, eventually cost Toureaux her life. The tale of Laetitia Toureaux epitomizes the turbulence of 1930s France, as the country prepared for a war most people dreaded but assumed would come. This period, therefore, generated great anxiety but also offered new opportunities -- and risks -- to Toureaux as she embraced the identity of a "modern" woman. The authors unravel her murder as they detail her story and that of the Cagoule, within the popular culture and conflicted politics of 1930s France. By examining documents

related to Toureaux's murder -- documents the French government has sealed from public view until 2038 -- Brunelle and Finley-Croswhite link Toureaux's death not only to the Cagoule but also to the Italian secret service, for whom she acted as an informant. Their research provides likely answers to the question of the identity of Toureaux's murderer and offers a fascinating look at the dark and dangerous streets of pre--World War II Paris.

To Live and Think Like Pigs - Gilles Chatelet 2019-01-15

A startlingly prescient treatise on the cybernetic automation of society and a burlesque satire of its middle-class celebrants. An uproarious portrait of the evils of the market and a technical manual for its innermost ideological workings, this

is the story of how the perverted legacy of liberalism sought to knead Marx's "free peasant" into a statistical "average man"—pliant raw material for the sausage-machine of postmodernity. Combining the incandescent wrath of the betrayed comrade with the acute discrimination of the mathematician-physicist, Châtelet scrutinizes the pseudoscientific alibis employed to naturalize "market democracy" and the "triple alliance" between politics, economics, and cybernetics. A bestseller in France on its publication in 1998, this book remains crucial reading for any future politics that wants to replace individualism with individuation and libertarianism with liberation, this new translation constitutes a major contribution to contemporary debate

on neoliberalism, economics, and capitalist subjectivation.

There was a time when AMC performance was more of an afterthought to the

muscle car era. Low production numbers combined with capable performance and cool and unique styling have increased coverage in magazines and at auctions, making these cars more valuable than ever before. Historical Economics - Charles Poor
Kindleberger 1990-01-01

Charles P. Kindleberger's writing has ranged widely in the past, from international economics to such specialized topics as the Marshall Plan. In recent years, however, his perspective has shifted to one that tempers the rigidity of technical economics with the flexibility of the liberal arts. Historical economics, drawing on history, politics, cultural anthropology, sociology, and geography, bridges the gap between abstraction and fact engendered by traditional conceptions of economic science. Inherently

interdisciplinary, historical economics ultimately leads to a more meaningful understanding of contemporary economic phenomena. This selection of Kindleberger's work has been carefully culled to illustrate his approach to the subject. The essays cover a range of historical periods and in addition to his well known writing on financial issues also include European history and explorations of long-run changes in the American economy. Economists and historians, both the converted and the unconvinced, will want to consult this powerful argument for the importance of historical economics.

The Automobile Revolution - Danielle Attias 2016-10-01

This book discusses cars of the future and the new socio-economic paradigm that they represent. It

examines the electromobility revolution in the traditional automotive industry and brings together multidisciplinary expertise to provide insights into the shift towards electromobility. New vehicular technologies may develop in various directions, including the smart car, and this context raises two important questions: will car manufacturers maintain control over the industry? And if so, will they be able to come up with sufficiently radical innovations to steer us into the electromobility of tomorrow? One thing is certain: the transition to electromobility will be a revolution. The book's combined approach to understanding this complex reality enables readers to better visualize the possible future directions. It offers anyone interested in

electromobility an excellent review of the subject and a useful roadmap to future developments.

Sport in Capitalist Society - Tony Collins 2013-04-12

Why are the Olympic Games the driving force behind a clampdown on civil liberties? What makes sport an unwavering ally of nationalism and militarism? Is sport the new opiate of the masses? These and many other questions are answered in this new radical history of sport by leading historian of sport and society, Professor Tony Collins. Tracing the history of modern sport from its origins in the burgeoning capitalist economy of mid-eighteenth century England to the globalised corporate sport of today, the book argues that, far from the purity of sport being 'corrupted' by capitalism, modern

sport is as much a product of capitalism as the factory, the stock exchange and the unemployment line. Based on original sources, the book explains how sport has been shaped and moulded by the major political and economic events of the past two centuries, such as the French Revolution, the rise of modern nationalism and imperialism, the Russian Revolution, the Cold War and the imposition of the neo-liberal agenda in the last decades of the twentieth century. It highlights the symbiotic relationship between the media and sport, from the simultaneous emergence of print capitalism and modern sport in Georgian England to the rise of Murdoch's global satellite television empire in the twenty-first century, and for the first time it explores

the alternative, revolutionary models of sport in the early twentieth century. Sport in a Capitalist Society is the first sustained attempt to explain the emergence of modern sport around the world as an integral part of the globalisation of capitalism. It is essential reading for anybody with an interest in the history or sociology of sport, or the social and cultural history of the modern world.

Gaston Grummer - Philippe Grummer
2017-12-15

The years between the two World Wars was an extraordinary period for the French luxury car trade and during this time, Carrosserie Gaston Grümmer was one of the leading coach building houses in Paris. Descended from a long line of coach builders, Gaston Grümmer was the son of Antoine-Joseph whose company, J. Grümmer formerly V. Morel, produced first, from 1845, exceptional horse-drawn carriages and

from the 1890s automotive bodies. Trained in the family business before World War I, Gaston Grümmer, spent the war as a soldier, first on horseback and in the trenches and then in the air as a pilot. At the end of hostilities, he brilliantly re-launched the family business transforming it into the Société Anonyme des Etablissements Grümmer. As the company moved towards the production of series bodywork for various manufacturers, Gaston decided that he wanted to break away to build custom cars and in 1924 he created his own company under the name of Carrosserie Gaston Grümmer. For the next ten years he achieved great success on both aesthetic and technical levels. Thanks to recently discovered and previously unpublished archives, his son, Philippe Grümmer,

in association with one of the best French automotive historians, Laurent Friry, takes us back to this glorious period during the "Roaring Twenties" recalling the major events of the Concours d'Elégance and Les Salons de l'Auto, and describes the bodies that Gaston Grümmer produced for the chassis of around 54 manufacturers

and the hundred or so prizes which he won. Illustrated with photographs, press articles and period documents, including the reproduction of a series of design drawings, this reference book on bodywork of the time is a must for any student of the period.
