An English Car Designer Abroad - Peter Birtwhistle
2020-04-14

An English Car Designer Abroad is the humorous and personal account of a life spent working on the design of some of the world's best known cars. Commencing his

career as a designer at Vauxhall Motors, Luton in 1973, Peter Birtwhistle then left the UK in 1977 to take a position abroad, at Audi in Germany, where he lived for the rest of his working life. From Audi, his career took him to Porsche in Stuttgart, and eventually, in 1988, to the Japanese company Mazda, with whom he would help develop a Design Centre close to Frankfurt, eventually becoming Chief Designer for Mazda Motor Europe. During his career, Birtwhistle was involved in the design of some very significant cars and in his work and travels, crossed the paths of many significant personalities from the car industry. Car design has changed enormously since the time he commenced his career, and for Birtwhistle it was clear, his story needed to be documented before it was lost in time. Featuring original photographs and illustrations from the author's own collection, this highly humorous and very personal story creates a fascinating collage of anecdotes and historical facts, not only from the secretive world of car design, but also his private life.

Bodyscapes® - Allan I. Teger 2012

Can there be more than one reality at a time, and can we experience them both? These were the questions that led photographer and former psychology professor Allan I. Teger to create this collection of black and white *Bodyscapes*(R). At first glance, *Bodyscapes* appear to be landscapes; a second look shows that they are in fact nude bodies with small toys and miniatures set on them. Spanning a 35-year period, this collection shows more than 110 black and white images photographed in a single exposure without any post processing or manipulation. The body becomes the setting for golfing, skiing, mountain climbing, surfing, and other sports. Other images feature landscapes ranging from rolling farmlands to beaches and outer space. They are fun, beautiful, and sensual, but always in good taste. This elegant portfolio of Teger's images is an ideal, reality-bending addition to any art photography library.

Moon-face and Other Stories - Jack London 1919

JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. "The son of the Wolf" (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, "The Call of the Wild" (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including "The Sea-Wolf" (1904), "White Fang" (1906), "South Sea Tales" (1911), and "Jerry of the South Seas" (1917). One of London's most interesting novels is the semi-autobiographical "Martin Eden" (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

308 Circuits - Jan Buiting 2003

Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its

predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of

independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Design Between the Lines - Patrick Le Quément 2019-08-28
The car industry and the way in which cars are created have changed beyond all recognition over the last half-century. Automotive styling was once the grudging afterthought when the engineers had finished their work. Now, following a short flirtation with exotic Italian design houses, it has evolved into sophisticated design carried out by multitalented in-house teams honing carefully crafted brand identities. One of the visionary designers at the forefront of that revolution has been Patrick le Quément. Most widely acclaimed for his 22 years in charge of Renault Design, resulting in such standout models as the Twingo, Scénic and Avantime, le Quément has enjoyed a 50-year career that has also taken in Simca, Ford and Volkswagen-Audi. In his foreword to the book, Stephen Bayley calls le Quément 'perhaps the very most original designer working in the conservative car business at the turn of the millennium'. Some 60

million cars across the world now bear the unmistakable stamp of le Quément. Design: Between the Lines is not a straightforward autobiography; rather, le Quément charts his journey through five decades of thoughts, actions, failures and successes. He offers fascinating commentaries on design and the creative process, and on some of the extraordinary automotive brands that make up our shared cultural heritage. As Bayley notes, for le Quément, design is 'as much a matter of thinking as a matter of drawing'. On a broader, more philosophical level, le Quément also shares his views about life in general and that remarkable contraption called 'the automobile', which has so influenced the lives of millions of people the world over from the late 1800s to the present day. Presented as a series of 50 brief essays or 'perspectives', le Quément's thoughtful and astute observations from the street, from the design studio and from his seat in the boardroom give the reader a penetrating and often amusing insight into the high-level workings of a global industry, its triumphs and tragedies, and the foibles of the decision-makers responsible for running it. A lively complementary text by the automotive journalist Stéphane Geffray accompanies each of le Quément's perspectives, and illustrations are provided by the automobile designer Gernot Bracht. Design: Between the Lines will appeal to all motoring fans and enthusiasts of good design. As Chris Bangle, the former Director of BMW Design, remarks: 'Few car designers have had a career so filled with innovative successes that they have inspired a whole industry; fewer still have the skills to share it. Engaging and revealing, Patrick relates his personal experience and deep knowledge of car design in a very enjoyable manner.'

Tacky - Rax King 2021-11-02

An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes

about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor. The Rule of Three - Jagdish Sheth 2002-05-14

Name any industry and more likely than not you will find that the three strongest, most efficient companies control 70 to 90 percent of the market. Here are just a few examples: McDonald's, Burger King, and Wendy's General Mills, Kellogg, and Post Nike, Adidas, and Reebok Bank of America, Chase Manhattan, and Banc One American, United, and Delta Merck, Johnson & Johnson, and Bristol-Myers Squibb Based on extensive studies of

market forces, the distinguished business school strategists and corporate advisers Jagdish Sheth and Rajendra Sisodia show that natural competitive forces shape the vast majority of companies under "the rule of three." This stunning new concept has powerful strategic implications for businesses large and small alike. Drawing on years of research covering hundreds of industries both local and global, The Rule of Three documents the evolution of markets into two complementary sectors -- generalists, which cater to a large, mainstream group of customers; and specialists, which satisfy the needs of customers at both the high and low ends of the market. Any company caught in the middle ("the ditch") is likely to be swallowed up or destroyed. Sheth and Sisodia show how most markets resemble a shopping mall with specialty shops anchored by large stores. Drawing wisdom from these markets, The Rule of Three offers counterintuitive insights, with suggested strategies for the "Big 3" players, as well as for mid-sized companies that may want to mount a challenge and for specialists striving to flourish in the shadow of industry giants. The book explains how to recognize signs of market disruptions that can result in serious reversals and upheavals for companies caught unprepared. Such disruptions include new technologies, regulatory shifts, innovations in distribution and packaging, demographic and cultural shifts, and venture capital as well as other forms of investor funding. Years in the making and sweeping in scope, The Rule of Three provides authoritative, research-based insights into market dynamics that no business manager should be without.

They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in

The Numinous Legacy - Adair Butchins 2002

Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider the

I Will Survive - Gloria Gaynor 2014-03-11

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the

top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

examines the development and post-1990 restructuring of the Czech car, components, and truck industries.

Strategic Vision - Zbigniew Brzezinski 2012-01-24

By 1991, following the disintegration first of the Soviet bloc and then of the Soviet Union itself, the United States was left standing tall as the only global super-power. Not only the 20th but even the 21st century seemed destined to be the American centuries. But that super-optimism did not last long. During the last decade of the 20th century and the first decade of the 21st century, the stock market bubble and the costly foreign unilateralism of the younger Bush presidency, as well as the financial catastrophe of 2008 jolted America - and much of the West - into a sudden recognition of its systemic vulnerability to unregulated greed. Moreover, the East was demonstrating a surprising capacity for economic growth and technological innovation. That prompted new anxiety about the future, including even about America's status as the leading world power. This book is a response to a challenge. It argues that without an America that is economically vital, socially appealing, responsibly powerful, and capable of sustaining an intelligent foreign engagement, the geopolitical prospects for the West could become increasingly grave. The ongoing changes in the distribution of global power and mounting global strife make it all the more essential that America does not retreat into an ignorant garrison-state mentality or wallow in cultural hedonism but rather becomes more strategically deliberate and historically enlightened in its global engagement with the new East. This book seeks to answer four major questions: 1. What are the implications of the changing distribution of global power from West to East, and how is it being affected by

the new reality of a politically awakened humanity? 2. Why is America's global appeal waning, how ominous are the symptoms of America's domestic and international decline, and how did America waste the unique global opportunity offered by the peaceful end of the Cold War? 3. What would be the likely geopolitical consequences if America did decline by 2025, and could China then assume America's central role in world affairs? 4. What ought to be a resurgent America's major long-term geopolitical goals in order to shape a more vital and larger West and to engage cooperatively the emerging and dynamic new East? America, Brzezinski argues, must define and pursue a comprehensive and long-term a geopolitical vision, a vision that is responsive to the challenges of the changing historical context. This book seeks to provide the strategic blueprint for that vision.
