But there is an enigma surrounding Red that the FBI is unwilling to admit—closely guarded secrets of something gone terribly wrong beneath the skin of Summerville. Secrets that will destroy far more than one small town. Wendy Davidson is caught in the middle. Twelve Years a Slave - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State--and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years--it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Memoirs - Edward Teller 2009-09-09

Edward Teller is perhaps best known for his belief in freedom through strong defense. But this extraordinary memoir at last reveals the man behind the headlines--passionate and humorous, devoted and loyal. Never before has Teller told his story as fully as he does here. We learn his true position on everything from the bombing of Japan to the pursuit of weapons research in the post-war years. In clear and compelling prose, Teller chronicles the people and events that shaped him as a scientist, beginning with his early love of music and math, and continuing with his study of quantum physics under Werner Heisenberg. He also describes his relationships with some of the century's greatest minds--Einstein, Bohr, Fermi, Szilard, von Neumann--and offers an honest assessment of the development of the atomic and hydrogen bombs, the founding of Lawrence Livermore Laboratory, and his complicated relationship with J. Robert Oppenheimer. Rich and humanizing, this candid memoir describes the events that led Edward Teller to be honored or abhorred, and provides a fascinating perspective on the ability of a single individual to affect the course of history.

Pathways in Crime - David Keatley
2018-04-25

This book introduces a novel approach
to analysing and mapping criminal
behaviours. Every crime occurs as a
chain of behaviours and events, from
inception and preparation through to
commission and exit from the crime
scene. These pathways in crime are
complex, dynamic sequences that are
by their very nature difficult to
analyse. Keatley provides a clear and
coherent introduction to Behaviour
Sequence Analysis, and the chapters
address a wide range of criminal
offences, from deception in
interrogations through to sexual
assaults, serial homicide, and
terrorism. Interesting additional
similarities between Behaviour
Sequence Analysis and other well-
known methods, such as crime linkage,
crime script analysis, and T-Pattern
Analysis are also outlined in detail.
Academic researchers in Forensic
Psychology and Criminology, as well
as applied practitioners and
investigators will find this an
invaluable book, and will gain clear
insight and understanding into the
method in order to apply it to their
own cases.

In Mortal Combat - John Toland
2016-05-31

A history of the Korean War with
soldier's-eye views from both sides,

by the Pulitzer Prize-winning author of *The Rising Sun and Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. *In Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

Demonstrating the potential of building strong brands in the energy sector, this book explores the challenges of shifting the perception of energy from a commodity business into a consumer brand. Energy suppliers are increasingly being met with skepticism, indicating the need for a greater focus on marketing and branding in the energy industry. The

Topics discussed include green energy, the liberalisation of the electricity industry, and the relationship between consumers and executives in the energy market.
