Tatti - Villa I Tatti (Florence, Italy) 2015

Edited by Carl Brandon Strehlke and Machtelt Brüggén Israëls, The Bernard and Mary

Berenson Collection of European Paintings at I

Tatti surveys the 149 works assembled by the Berensons for their home in Florence from the late 1890s through the first decades of the twentieth century at the time that they were making their mark on the world as connoisseurs.

The catalogue presents a privileged window on the Berensons' intellectual interests through the objects they owned. The entries, written by an international team of art historians, take full advantage of the extensive correspondence from the Berensons' friends, family, and colleagues at I Tatti as well as the couple's diaries and notations on the backs of their vast gathering of photographs. All the entries are lavishly illustrated with full scholarly and technical accountings of the objects. There are also 17 illustrated reconstructions of the original contexts of panel paintings. The catalogue includes essays on the progress of the Berensons' collecting, their love for Siena, the Sieneze forger Icilio Federico Joni, the critic Roger

Fry, and René Piot's murals at I Tatti, as well as a listing of 94 pictures that were once at I Tatti including donations made to museums in Europe and America. The Invention of Argentina - Nicolas Shumway 1993-03-18

The nations of Latin America came into being without a strong sense of national purpose and identity. In *The Invention of Argentina*, Nicholas Shumway offers a cultural history of one nation's efforts to determine its nature, its destiny, and its place among the nations of the world. His analysis is crucial to understanding not only Argentina's development but also current events in the Argentine Republic.

A Summer Life - Gary Soto 1991-08-01

Gary Soto writes that when he was five "what I knew best was at ground level." In this lively

collection of short essays, Soto takes his reader to a ground-level perspective, resreating in vivid detail the sights, sounds, smells, and textures he knew growing up in his Fresno, California, neighborhood. The "things" of his boyhood tie it all together: his Buddha "splotted with gold," the taps of his shoes and the "engines of sparks that lived beneath my soles," his worn tennies smelling of "summer grass, asphalt, the moist sock breathing the defeat of basesall." The child's world is made up of small things--small, very important things.

When I Was Puerto Rican
- Esmeralda Santiago
2006-02-28

Esmeralda Santiago's story begins in rural Puerto Rico, where her childhood was full of both tenderness and domestic strife, tropical sounds and sights as well as poverty. Growing up, she

learned the proper way to eat a guava, the sound of tree frogs in the mango groves at night, the taste of the delectable sausage called morcilla, and the formula for ushering a dead baby's soul to heaven. As she enters school we see the clash, both hilarious and fierce, of Puerto Rican and Yankee culture. When her mother, Mami, a force of nature, takes off to New York with her seven, soon to be eleven children, Esmeralda, the oldest, must learn new rules, a new language, and eventually take on a new identity. In this first volume of her much-praised, bestselling trilogy, Santiago brilliantly recreates the idyllic landscape and tumultuous family life of her earliest years and her tremendous journey from the barrio to Brooklyn, from translating for her

mother at the welfare office to high honors at Harvard.

Liberal Thought in Argentina, 1837-1940 - Natalio R. Botana 2013
This is the first compilation of primary sources that document the history and tradition of liberal thought in Argentina throughout the nineteenth and first half of the twentieth century. With only two exceptions, none of the works have ever been

translated into English until now. Liberal ideas were very important in Argentina from the time of independence. The Argentine constitution (1853-60), in force for a long time, was based on liberal principles taken from both the North American and the European tradition. The general structure of the collection is chronological, taking the reader through an analysis of different periods of liberal thought in Argentina: from liberalism as opposed to dictatorial rule, to liberalism as the framework of the National Constitution (1852-60). Importance is given to the development of liberalism in government and opposition (1857-1910) and to the last period (1912-40), the twilight of liberalism. Chapter 1 addresses the dictatorship of Juan

Manuel de Rosas (1837-50), during which time a set of liberal ideas was formed that would subsequently have a decisive influence on the second period, the formation of the National Constitution (1852-60). Chapters 3 and 4 consist of writings that chronicle the surge of liberalism in Argentina, first, during the period between 1857 and 1879, and, later, between 1880 and 1910. These chapters reflect the great political, economic, and social debates that exemplify the variety and richness of the body of liberal ideas during this time. The writings in the final chapter review the gradual decline of liberalism. They rescue from obscurity those voices and writings that upheld and defended liberal ideals in several aspects, namely, those

ideals concerning electoral and constitutional reforms and the resistance of the advance of different expressions of totalitarian dictatorship during the twentieth century.

How We Reason - Philip Johnson-Laird 2008-10-23

Good reasoning can lead to success; bad reasoning can lead to catastrophe. Yet, it's not obvious how we reason, and why we make mistakes - so much of our mental life goes on outside our awareness. In recent years huge strides have been made into developing a scientific understanding of reasoning. This new book by one of the pioneers of the field,

Philip Johnson-Laird, looks at the mental processes that underlie our reasoning. It provides the most accessible account yet of the science of reasoning. We can all reason from our childhood onwards - but how? 'How we reason' outlines a bold approach to understanding reasoning. According to this approach, we don't rely on the laws of logic or probability - we reason by thinking about what's possible, we reason by seeing what is common to the possibilities. As the book shows, this approach can answer many of the questions about how we reason, and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl. It shows why our irrational fears may become psychological illnesses, why terrorists develop

'crazy' ideologies, and how we can act in order to improve our reasoning. The book ends by looking at the role of reasoning in three extraordinary case histories: the Wright brothers' use of analogies in inventing their flyer, the cryptanalysts' deductions in breaking the German's Enigma code in World War II, and Dr. John Snow's inductive reasoning in discovering how cholera spread from one person to another. Accessible, stimulating, and controversial, How we Reason presents a bold new approach to understanding one of the most intriguing facets of being human. Fabulas Literarias - Tomas De Iriarte 2017-11-23 "Fabulas literarias" (Literary Fables) is a collection of fables (stories with moral, with animals and objects

as characters) written in verse by Tomás de Iriarte, a Spanish writer of the Enlightenment best known for this work. The fables were published in 1782, although they were written with some of the writer's "enemies" in mind, they criticize and satirize human traits that we can find nowadays and they remain actual. "El burro flautista" (The Flutist Donkey) and "Los dos conejos" (The Two Rabbits) are two of the best known fables included here. Also included are 9 posthumous fables.

Greek Wisdom Literature and the Middle Ages -

Francisco Rodríguez Adrados 2009

In 13th-century Toledo, King Alfonso the Wise fostered the publication of Castilian translations of certain Arabic works that had in turn been translated from Greek and Pehlvi. In this book, which is the revised English version of the Spanish original published under the title of Modelos griegos de la sabiduría castellana y europea, the author studies four of these Castilian translations - the Libro de los Buenos Proverbios, Poridad de las Poridades or Secreto de secretos, Bocados de Oro and Historia de la Donzella Teodor - works

of sapiential literature that had an enormous influence in all of Europe. Their Arabic models had been translated from Greek in Bagdad at the instigation of the great caliphs of the 9th century and also in the Fatamid court at Cairo in the 11th century. The traditional view is that this literature is simply of oriental origin, but the author believes that the models were Greek Byzantine works discovered by the Arabs in Syria and Egypt in the 7th and 8th centuries. Their true origin is to be found in the Greek sapiential literature that developed around the figures of Socrates, Plato, Aristotle and Alexander in the Hellenistic, Roman and Byzantine schools of philosophy; its influence can frequently be found reflected in

authors of Christian literature. A detailed study of themes, vocabulary and expressions in the works themselves confirms these origins.
