Wounded Leaders - Nick Duffell 2016-08-24

Political leaders in Britain are consistently drawn from a class born to be educated away from their families in institutions - elite boarding schools. This has a direct effect on their ability to love, to relate, to make good judgments and to develop the necessary leadership qualities for today's world. In this controversial and highly acclaimed book, the author guides the reader along the elite path through boarding school and Oxbridge to government, unpacking what he calls the Entitlement Illusion. Central to the Illusion is a uniquely British phenomenon, an industrialised process for turning out servants of the Empire that has been unwilling to change with the times. It was deified in the Victorian Rational Man Project and normalised by the British public, who still

buy into the trance. Up to date evidence from Neuroscience shows what a poor training for leadership this actually is.

Disruption in the Audit Market - Krish Bhaskar 2019-04-16

Focussing on the dominance of the Big Four auditing firms - PwC, EY, Deloitte and KPMG - this concise volume provides an authoritative critical assessment of the state and future of the audit market, currently the subject of much debate and the focus of significant government enquiries. Drawing on extensive research and a vast collection of evidence from interviews with insiders, experts and users, it explores the key issues of audit quality, independence, choice and the growing expectation gap. Just as disruptive technologies are overturning other established sectors, this book explores their impact on accounting, financial reporting and auditing. It questions whether the Big Four-dominated audit market is prepared not only for the inevitable disruption of new technologies, but also the challenges of negative public perceptions, cynicism about regulation and demands for greater transparency. In the context of increasing high-profile corporate failures, this book provides a compelling scrutiny of the industry's failings and present difficulties, and the impact of future disruption. At this crucial time, it will be of great interest to students, researchers and professionals in accounting and auditing, as well as policy makers and regulators.

Narrow Dog to Carcassonne - Terry Darlington 2006

"When they retired Terry and Monica Darlington decided to sail their canal narrowboat across the Channel and down to the Mediterranean, together with their whippet Jim. They took advice from experts, who said they would die, together with their whippet Jim. On the Phyllis May you dive through six-foot waves in the Channel, are swept down the terrible Rhône, and fight for your life in a storm among the flamingos of the Camargue. You meet the French nobody meets - poets, captains, historians, drunks, bargees, men with guns, scholars, madmen - they all want to know the people on the painted boat and their narrow dog. You visit the France nobody knows - the backwaters of Flanders, the canals beneath Paris, the heavenly Yonne, the lost Burgundy Canal, the islands of the Saône, and the forbidden ways to the Mediterranean. Aliens, dicks, trolls, vandals, gongoozlers, killer fish and the walking dead all stand between our three innocents and

their goal - many-towered Carcassonne."--Provided by publisher.

Running with the Firm - James Bannon 2014-06-05

'Of course I'm a f**king hooligan, you pr**k. I am a hooligan...there I've said it...I'm a hooligan. And, do you know why? Because that's my f**king job.' In 1995, a film called I.D., about an ambitious young copper who was sent undercover to track down the 'generals' of a football hooligan gang, achieved cult status for its sheer brutality and unsettling insight into the dark and often bloody side of the so-called beautiful game. The film was so shocking it was hard to believe the mindless events that took place could ever happen in the real world. Well, believe it now... Almost twenty years on, the man behind the film has explosively revealed that the script was largely a true story. That man, James Bannon, was the ambitious undercover cop. The football club was Millwall F.C. and the gang that he infiltrated was The Bushwackers, among the most brutal and fearless in English football. In *Running with the Firm*, Bannon shares his intense and dangerous journey into the underworld of football hooliganism where sickening levels of violence prevail over anything else. He introduces you to the hardest thugs from football's most notorious gangs, tells all about the secret and almost comical police operations that were meant to bring them down, and, how once you're on the inside, getting out from the mob proves to be the biggest mission of all. A disturbing but compelling read, this is the book that proves fact really is stranger than fiction.

Volvo Amazon - Richard Dredge 2016-03-31

In 1956, a prototype of a new passenger car from Volvo was presented. It became known as the Amazon in Sweden and the 121 and 122S in export markets, the latter denoting a more sporty derivative. However, despite its substantial appearance, all Amazons were surprisingly fleet of foot - this was one of the most sporty European saloons of the 1960s. With its elegant, timeless styling the Amazon broke new ground for Volvo - and for passenger cars as a whole. This new book covers the complete story of the Volvo Amazon, from 1956 onwards, including full production histories, comprehensive specification details, and over 250 photographs. The book covers the history of Volvo before and after the Amazon, and development and production of all Amazon derivatives from 1956-1970, including the 121, 122S, 123GT and all of the estate editions. There are biographies of key Volvo personnel, including the company's first designer, Jan Wilsgaard. Also included is the Amazon in motorsport, plus driver biographies: Tom Trana, Sylvia Osterberg and Carl-Magnus Skogh. There is a full buying guide along with tips on tuning and modifying, including rally preparation, and an insight into what the press thought of each Amazon derivative, with pages also devoted to how the car was marketed in period. An ideal resource for owners, or anyone with an interest in the evolution of these classic cars, which is superbly illustrated with 250 colour photographs.

Keeping Canada Running - G. Bruce Doern 2021-09-29

The federal government's promises to "build back better" and "build back green" highlight opportunities to reimagine Canadian infrastructure. In this groundbreaking study, authors Bruce Doern, Christopher Stoney, and Robert Hilton provide the first comprehensive overview of Canadian infrastructure policy, examining the impact and implications of the COVID-19 pandemic and rapid technological change as Canada looks to recover and rebuild. Covering more than fifty years across many sectors, the authors identify numerous challenges that have contributed to Canada's growing infrastructure deficit and suboptimal outcomes including political interference in the choice of infrastructure projects; challenges for multilevel governance such as distortion of local priorities, blurred accountability, and unsustainable maintenance costs for municipalities; the growing reliance on public-private partnerships that limit transparency and public scrutiny; and increased corruption associated with infrastructure projects. Transforming infrastructure is notoriously difficult yet vital at a time of rapid technological change. It is estimated that 75 percent of the infrastructure that will exist in 2050 does not exist today. This makes it crucial that Canada invest in future-proof infrastructure with the capacity to facilitate economic growth and the expansion of urban centres, mitigate and adapt to the impacts of climate change, and ensure resilience in response to crises and disasters. *Keeping Canada Running* offers a timely assessment of these issues, Canada's COVID-19 response, and the potential contribution of the newly launched Canadian Infrastructure Bank.

Nick Clegg, with his default expression of a man's whose children's puppy is still missing. And of course, the famous 2010 press conference in the garden of Downing Street, a love-in that would have been illegal in 44 American states. [The Digital Factory](#) - Moritz Altenried 2022-01-05

"In recent years, tech companies such as Google and Facebook have rocked the world as they have seemingly revolutionized the culture of work. We've all heard stories of lounges outfitted with ping pong tables, kitchens with kombucha on tap, and other amenities that supposedly foster creative thinking. Nothing could seem further from earlier workplaces associated with a different revolution in capitalism: factories, in which employees are required to perform highly circumscribed tasks as quickly as possible to meet quotas--for next to no pay. However, as Moritz Altenried shows in *The Digital Factory*, these types of workplaces are not so far from the Googleplex as we might think. While recent accounts of the transformation of labor after the demise of the factory highlight the creative, communicative, immaterial, or artistic features of contemporary labor, Altenried uncovers the factory-like conditions in which many new digital workers perform their jobs. These workers, such as video game testers, social media content moderators, and Amazon fulfillment center workers, perform highly repetitive, unskilled tasks for low and often contingent wages. Based on more than five years of research in different sites using ethnography and interviews combined with an analysis of infrastructural technologies, Altenried's book gives us a first-hand account of many new forms of digital labor that drive contemporary capitalism. He shows that though today's factories might look and feel different than they did 150 years ago, they still follow the same logics and produce the same unequal outcomes"--

funny, supremely chilling book about the experience, and the eerie allure, of crowd violence and football culture.

How to Run a Successful Design Business - Shan Preddy 2017-05-15

The design sector has expanded rapidly in recent years, and now covers a wide range of specialist disciplines from branding and communications to product, commercial interiors and digital. Yet design firms often lack long-term vision, strategies and plans, and research from the Design Council shows that far too many suffer from poor profitability. Shan Preddy believes that the more a design firm knows about business, the more successful it will be, both creatively and financially. That's why she has gathered over 80 design-sector experts from different fields - advisors, practitioners, clients and representatives from design organisations - to provide you with information, suggestions, guidelines and thought-provoking opinions. Whether you're experienced or just starting out, *How to Run a Successful Design Business: The New Professional Practice* covers everything owners and managers of design firms need to know.

Running a Successful Law Firm - Lisa Newton 2014-05-09

Corelegal is an organised group of business professionals who all specialise in the legal sector in the UK. We have various skills and expertise between us and the reason for this book, was to share this collective knowledge with a wider audience. Corelegal first launched in 2009 and has ran various seminars for legal professionals (namely solicitors) in different cities in the UK as well as webinars with the purpose of imparting knowledge on each members key specialist subject. With new developments in the economy underway, there has been an increasing trend for more firms to start up, and existing ones to consolidate, so we decided to create a book which would help those who are already practising law, and perhaps who are thinking of starting their own law firm business, or who have been running a law firm for some time, and need to stay ahead and on top of their game. Between the writers there is collectively over 100 years experience in working with solicitors / lawyers. Using our first hand client experience (in case studies when mentioned - names have been changed to protect the innocent!), we have a valuable understanding of the legal industry, the changes that are underway and ideas that can help the savvy solicitor to come out on top. Different members have contributed a chapter or two. The book aims to bring fresh ideas and perspective, no matter if you are UK-based, or in the field of law in another part of the world. Note that we tend to use the term 'solicitors' a lot in the book, but for our purpose, we mean lawyers, attorneys, briefs, notaries and barristers too! The book is divided into four units – Finance, Operations, Marketing and Future thinking. You can skip to the part that interests you the most, or just read it from cover to cover. You may also be interested in visiting or subscribing to our YouTube channel, as snippets from previous seminars have been uploaded on there, as have webinar interviews with various members. We post articles regularly on our blog at www.Corelegal.net.
