Adventures in Stationery - James Ward
2015-04-02

Proving that any subject can be interesting if you delve into it deeply, stationery aficionado James Ward offers a surprisingly entertaining history of office

supplies. Did you know that Henry David Thoreau contributed to pencil manufacture? Or that the Monkees' Mike Nesmith inherited \$25 million earned by his mother's invention, Liquid Paper? Or that Norwegians wore paper clips as a symbol of resistance to the Nazis? Ward, who blogs on I Like Boring Things, unearths the

magic in the mundane, relating the often-convoluted stories behind the creation of paper, pens, pencils, paper clips, staples and tape. Don't expect business case studies of 3M or the Parker Pen Company; Ward is a cultural connoisseur who tempers his enthusiasm for the stationery cabinet with full awareness of its absurdity. getAbstract recommends his informative, memorable and fun essays to anyone who ever borrowed a Sharpie from the office or made a necklace of paper clips.

Suicide and Social Justice - Mark E.

Button 2019-12-04

Suicide and Social Justice unites diverse scholarly and social justice perspectives on the international problem of suicide and suicidal behavior. With a focus on social justice, the book seeks to understand the complex interactions between individual and group experiences with suicidality and various social pathologies, including inequality, intergenerational poverty, racism, sexism, and homophobia. Chapters investigate the underlying and often overlooked connections that link rising rates and disproportionate concentrations of suicide within specific populations to wider social, political, and economic conditions. This edited volume brings diverse scholarly and social justice perspectives to bear on the problem of suicide and suicidal behavior, equipping researchers and practitioners with the knowledge they need to fundamentally rethink suicide

and suicide prevention.

This basic source for identification of U.S. manufacturers is arranged by product in a large multi-volume set.

Includes: Products & services, Company profiles and Catalog file.

Handbook of Glass in Construction - Joseph S. Amstock 1997

Here is the first comprehensive guide to the specification, installation, manufacture, and testing of glass units and windows for construction.

Packed with data, descriptions, applications, and illustrations, the book examines all types of glass and insulating glass, including single and dual sealed systems, heat mirror materials, sealant compounds, and swiggle strip and metal edge compounds. You'll also find complete details on safety glass for hurricane-prone regions and for

security purposes. Plus a glossary of terms and listings of trade organizations, suppliers, and manufacturers.

Textiles in Automotive Engineering - W Fung 2000-11-28

This book presents a comprehensive treatment of both functional and decorative textiles used in the automotive industry including seat covers, headliners, airbags, seat belts and tyres. Written in a clear, concise style it explains material properties and the way in which they influence manufacturing processes as well as providing practical production details. The subject treatment cuts across the disciplines of textile chemistry, fabric and plastics technology and production engineering. Environmental effects and recycling are also covered. It is aimed at the design and process engineer in industry as well as

researchers in universities and colleges. Quality engineers will also benefit from the book's sections on identifying problems and material limitations.

Structural Adhesives - S.R. Hartshorn 2012-12-06

Adhesives in general and structural adhesives in particular are the subjects of much academic interest as well as commercial importance.

Structural bonding, as a method of joining, offers a number of advantages over mechanical fastening. However, in order to achieve satisfactory results, the proper adhesive must be selected and the appropriate bonding procedures followed. The purpose of *Structural Adhesives: Chemistry and Technology* is to review the major classes of structural adhesives and the principles of adhesion and bonding as these relate to structural joints. Each chapter provides an overview of the topic under discussion with a list of references to the relevant literature. In addition to describing the chemistry involved, other aspects of structural adhesive technology are covered, such as formula tion, testing, and end uses. Some structural adhesives, especially epoxies and phenolics, have a long history of successful use and are now widely employed. Others, such as the structural acrylics and

cianoacrylates, are beginning to gain industrial acceptance. Urethanes and anaerobics have limited but important uses, while high-temperature adhesives are still largely in the research and development stage.

Jews and Jewishness in British Children's Literature - Madelyn Travis 2013-09-02

In a period of ongoing debate about faith, identity, migration and culture, this timely study explores the often politicised nature of constructions of one of Britain's longest standing minority communities. Representations in children's literature influenced by the impact of the Enlightenment, the Empire, the Holocaust and 9/11 reveal an ongoing concern with establishing, maintaining or problematising the boundaries between Jews and Gentiles. Chapters on gender, refugees, multiculturalism and historical fiction argue that literature for young people demonstrates that the

position of Jews in Britain has been ambivalent, and that this ambivalence has persisted to a surprising degree in view of the dramatic socio-cultural changes that have taken place over two centuries. Wide-ranging in scope and interdisciplinary in approach, *Jews and Jewishness in British Children's Literature* discusses over one hundred texts ranging from picture books to young adult fiction and realism to fantasy. Madelyn Travis examines rare eighteenth- and nineteenth-century material plus works by authors including Maria Edgeworth, E. Nesbit, Rudyard Kipling, Richmal Crompton, Lynne Reid Banks, Michael Rosen and others. The study also draws on Travis's previously unpublished interviews with authors including Adele Geras, Eva Ibbotson, Ann Jungman and Judith Kerr.

A Comprehensive Guide to Toxicology in Nonclinical Drug Development - Ali S. Faqi 2016-11-03

A Comprehensive Guide to Toxicology in Nonclinical Drug Development, Second Edition, is a valuable reference designed to provide a complete understanding of all aspects of nonclinical toxicology in the development of small molecules and biologics. This updated edition has been reorganized and expanded to include important topics such as stem cells in nonclinical toxicology, inhalation and dermal toxicology, pitfalls in drug development, biomarkers in toxicology, and more. Thoroughly updated to reflect the latest scientific advances and with increased coverage of international regulatory guidelines, this second

edition is an essential and practical resource for all toxicologists involved in nonclinical testing in industry, academic, and regulatory settings. Provides unique content that is not always covered together in one comprehensive resource, including chapters on stem cells, abuse liability, biomarkers, inhalation toxicology, biostatistics, and more Updated with the latest international guidelines for nonclinical toxicology in both small and large molecules Incorporates practical examples in order to illustrate day-to-day activities and the expectations associated with working in nonclinical toxicology

Handbook of Industrial Chemistry and Biotechnology - James A. Kent 2013-01-13

Substantially revising and updating the classic reference in the field, this handbook offers a valuable

overview and myriad details on current chemical processes, products, and practices. No other source offers as much data on the chemistry, engineering, economics, and infrastructure of the industry. The Handbook serves a spectrum of individuals, from those who are directly involved in the chemical industry to others in related industries and activities. It provides not only the underlying science and technology for important industry sectors, but also broad coverage of critical supporting topics. Industrial processes and products can be much enhanced through observing the tenets and applying the methodologies found in chapters on Green Engineering and Chemistry (specifically, biomass conversion), Practical Catalysis, and Environmental Measurements; as well as expanded treatment of Safety, chemistry plant security, and Emergency Preparedness. Understanding

these factors allows them to be part of the total process and helps achieve optimum results in, for example, process development, review, and modification. Important topics in the energy field, namely nuclear, coal, natural gas, and petroleum, are covered in individual chapters. Other new chapters include energy conversion, energy storage, emerging nanoscience and technology. Updated sections include more material on biomass conversion, as well as three chapters covering biotechnology topics, namely, Industrial Biotechnology, Industrial Enzymes, and Industrial Production of Therapeutic Proteins.

Handbook of Adhesives and Sealants, Third Edition - Edward M. Petrie
2020-12-31

A single, up-to-date source for essential adhesive and sealant information This thoroughly revised handbook presents the what, how, and why behind selecting, formulating,

and using adhesive and sealant materials of all types. Written by a recognized expert in the field, Handbook of Adhesives and Sealants, Third Edition is the ideal desk-top reference for end-users, formulators, and marketers. The book covers all adhesives and sealants that are used for joining or bonding a wide range of materials, including metals, plastics, composites, and elastomers. You will get real-life examples that illustrate hands-on applications and practices. Coverage includes:

- Properties of adhesives and sealants
- Types of adhesives and sealants
- Formulation and chemistry
- Methods of setting Adhesive or sealant preparation, selection, and use
- Stress, joint design, and testing
- Bonding and sealing specific substrates
- Environmental durability
- Quality control, non-destructive tests, and failure analysis
- Troubleshooting
- Health, safety, and environmental issues
- Major trends in

technology and market New to this edition: Sections on sustainability such as biopolymers, biodegradable adhesives, lightweighting, and reduction in VOCs. Other extras include information on formulation optimization, nanotechnology, composite binders, interpenetrating polymers, removable adhesives, and multi-tasking materials.

Introduction to Construction

Management - Fred Sherratt 2022-09-30

Introduction to Construction Management, Second Edition, is the beginner's guide to key concepts, terms, processes and practices associated with modern construction management. The new edition has been fully updated with new data, case studies and enhancements and remains the most practical and accessible book on the subject available. Significant new topics have been added including construction ethics,

coverage of mental health and wellbeing in the industry, project delivery and Construction 4.0, to make this the most cutting-edge book available for students on construction and engineering management courses. Supported by diagrams, illustrations and case studies, the book starts with a general introduction to the industry and covers the relevant management theory before providing applied coverage of: Production management Commercial management Quality management Health and Safety management Environmental management This is the most approachable text available for anyone starting to learn about construction management at any level.

Substitutes for Hazardous Chemicals in the Workplace - Gitte Goldschmidt

the material. How and when should dangerous chemical products be replaced with safer products? Substitutes for Hazardous Chemicals in the Workplace answers this question and others.

The TBE Book - 2020-05-01

While the number of vector-borne diseases and their incidence in Europe is much less than in tropical and/or developing countries, there are nevertheless a substantial number of such infections in Europe. The most important one is the zoonotic arbovirus infection Tick-Borne Encephalitis (TBE), a virus transmitted to humans by ticks or by consumption of unpasteurized dairy products from infected cows, goats, or sheep. TBE is endemic in the non-tropical Eurasian forest belt with most cases occurring in Russia and in central and eastern parts of Europe. In endemic areas, TBE is one of the most important causes of viral meningitis/encephalitis and a major

public health concern. Moreover, TBE is becoming more and more frequent in Europe due to the appearance of new endemic areas and increasing awareness. However, it might be difficult to diagnose TBE, because clinical manifestations tend to be relatively nonspecific. Although a standardized case definition across the European Union has existed now for a few years, national implementation of TBE programs, including regular screening and diagnosis, are done in only very few countries. Therefore, wide differences in the intensity and quality of national surveillance of TBE cases still exist, and the true burden of disease and the areas with circulation of the TBE viral subtypes in Europe and Asia are not fully known. Moreover, although safe and effective vaccines are available, vaccination uptake in most endemic countries is too low to reduce the TBE burden significantly. The authors

of "The TBE Book" therefore have tried to compile in this "working book" the most recent and relevant aspects of TBE.

Epidemiology and Prevention of Vaccine-Preventable Diseases, 13th Edition E-Book - Jennifer Hamborsky, MPH, MCHES 2015-10-19

The Public Health Foundation (PHF) in partnership with the Centers for Disease Control and Prevention (CDC) is pleased to announce the availability of Epidemiology and Prevention of Vaccine-Preventable Diseases, 13th Edition or "The Pink Book" E-Book. This resource provides the most current, comprehensive, and credible information on vaccine-preventable diseases, and contains updated content on immunization and vaccine information for public health

practitioners, healthcare providers, health educators, pharmacists, nurses, and others involved in administering vaccines. "The Pink Book E-Book" allows you, your staff, and others to have quick access to features such as keyword search and chapter links. Online schedules and sources can also be accessed directly through e-readers with internet access. Current, credible, and comprehensive, "The Pink Book E-Book" contains information on each vaccine-preventable disease and delivers immunization providers with the latest information on: Principles of vaccination General recommendations on immunization Vaccine safety Child/adult immunization schedules International vaccines/Foreign language terms Vaccination data and

statistics The E-Book format contains all of the information and updates that are in the print version, including:

- New vaccine administration chapter
- New recommendations regarding selection of storage units and temperature monitoring tools
- New recommendations for vaccine transport
- Updated information on available influenza vaccine products
- Use of Tdap in pregnancy
- Use of Tdap in persons 65 years of age or older
- Use of PCV13 and PPSV23 in adults with immunocompromising conditions
- New licensure information for varicella-zoster immune globulin

Contact bookstore@phf.org for more information. For more news and specials on immunization and vaccines visit the Pink Book's Facebook fan page
