Measuring the Environmental Soundness of Public Procurement in Nordic Countries - 2005

The importance of Greener Public Purchasing, GPP, has increasingly been recognised by those who work to promote sustainable development. In the communication on Integrated Product Policy, IPP, the EU Commission encourages Member States to draw up publicly available action plans to green their public procurement. The Nordic Council of Ministers has stressed the importance of GPP in the strategy for sustainable development and has initiated co-ordination efforts so that public buyers in all the Nordic countries can benefit from each other's experience. The aim of this study was to develop a method to measure the environmental soundness of public procurement and to produce information on the kind of environmental criteria that are used for different product groups. The study also focused on the situation of greener public procurement in Denmark, Finland, Norway and Sweden, more specifically, on the larger public purchases, which are governed by directives. The results showed that public purchasers seek to consider environmental aspects quite often. However, attention needs to be paid to how relevant product-specific environmental aspects are defined and the criteria formulated.

Review of Civil Litigation Costs - Great Britain. Ministry of Justice 2010

Lord Justice Jackson was required: to review the rules and principles governing the costs of civil litigation and to make recommendations in order to promote access to justice at proportionate cost; to review case management procedures; to have regard to research into costs and funding; to consult widely; to compare our costs regime with those of other jurisdictions; and to

prepare a report setting out recommendations with supporting evidence by 31st December 2009. A preliminary report was issued in May 2009 and is also published alongside this final report (ISBN 9780117064034). Major recommendations cover: conditional fee agreements, of which "no win, no fee" agreements are the most common species, and which have been the major contributor to disproportionate costs; success fees and ATE (after-the-event) insurance premiums should cease to be recoverable from unsuccessful opponents in civil litigation; success fees should come out of the damages awarded to the client; awards of general damages should be increased by 10 per cent, and the maximum amount of damages that lawyers may deduct for success fees be capped at 25 per cent of damages; lawyers should not be permitted to pay referral fees in respect of personal injury cases; qualified one way costs shifting, taking away the need for ATE insurance; fixed costs in fast track litigation; establishment of a Costs Council. Other sections of the report deal with: other funding issues; personal injuries litigation; some specific types of litigation; and controlling the costs - including pre-action protocols, greater use of alternative dispute resolution (ADR), disclosure, case and costs management by the judiciary.
