## Implementation Guide for IBM Elastic Storage System 3000 - Brian Herr 2020-04-08

This IBM® Redbooks publication introduces and describes the IBM Elastic Storage® Server 3000 (ESS 3000) as a scalable, high-performance data and file management solution. The solution is built on proven IBM Spectrum® Scale technology, formerly IBM General Parallel File System (IBM GPFS). IBM Elastic Storage System 3000 is an all-Flash array platform. This storage platform uses NVMe-attached drives in ESS 3000 to provide significant performance improvements as compared to SAS-attached flash drives. This book provides a technical overview of the ESS 3000 solution and helps you to plan the installation of the environment. We also explain the use cases where we believe it fits best. Our goal is to position this book as the starting point document for customers that would use ESS 3000 as part of their IBM Spectrum Scale setups. This book is targeted toward technical professionals (consultants, technical support staff, IT Architects, and IT Specialists) who are responsible for delivering cost-effective storage solutions with ESS 3000. *SAP Implementation Unleashed* - George Anderson 2009-05-21

*Personas - User Focused Design* - Lene Nielsen 2012-08-10

People relate to other people, not to simplified types or segments. This is the concept that underpins this book. Personas, a user centered design methodology covers topics from interaction design within IT, through to issues surrounding product design, communication, and marketing. Project developers need to understand how users approach their products

from the product's infancy, and regardless of what the product might be. Developers should be able to describe the user of the product via vivid depictions, as if they - with their different attitudes, desires and habits - were already using the product. In doing so they can more clearly formulate how to turn the product's potential into reality. With contributions from professionals from Australia, Brazil, Finland, Japan, Russia, and the UK presenting real-world examples of persona method, this book will provide readers with valuable insights into this exciting research area. The inspiration to create user descriptions includes character-driven narratives, and the film *Thelma & Louise* is analyzed in order to understand how the development process can also be an engaging story in various professional contexts. With a solid foundation in her own research at the IT University of Copenhagen and more than five years of experience in solving problems for businesses, Lene Nielsen is Denmark's leading expert in the persona method. She has a PhD in personas and scenarios, and through her research and practical experiences she has developed her own approach to the method - 10 Steps to Personas. *Personas - User Focused Design* presents a step-by-step methodology of personas which will be of interest to developers of IT, communications solutions and innovative products.

*Web Portals* - Arthur Tatnall 2005-01-01

A Web portal is a special web site designed to act as a gateway giving convenient access to other related sites. This book investigates the various types of portals and describes how they can be used in business applications. After considering the nature of portals, the book describes the first general portals like Yahoo, and how they came into being. Portals are used in businesses of all types and sizes and this book discusses how portals can be used in large business corporations as well as small to medium enterprises. Web portals have increasing importance to marketers as, by their nature, they retain their users who must return to them frequently. They also provide a useful means of making information and knowledge readily available in a convenient form to authorised users. This book covers a wide range of issues relating to the use of portals in

business.

### **SAP HANA and ESS: A Winning**

**Combination** - Olaf Weiser 2018-08-16

SAP HANA on IBM® POWER® is an established HANA solution with which customers can run HANA-based analytic and business applications on a flexible IBM Power based infrastructure. IT assets, such as servers, storage, and skills and operation procedures, can easily be used and reused instead of enforcing more investment into dedicated SAP HANA only appliances. In this scenario, IBM Spectrum™ Scale as the underlying block storage and files system adds further benefits to this solution stack to take advantage of scale effects, higher availability, simplification, and performance. With the IBM Elastic Storage™ Server (ESS) based on IBM Spectrum Scale™, RAID capabilities are added to the file system. By using the intelligent internal logic of the IBM Spectrum Scale RAID code, reasonable performance and significant disk failure recovery improvements are achieved. This IBM Redpaper™ publication focuses on the benefits and advantages of implementing a HANA solution on top of IBM Spectrum Scale storage file system. This paper is intended to help experienced administrators and IT specialists to plan and set up an IBM Spectrum Scale cluster and configure an ESS for SAP HANA workloads. It provides important tips and bestpreferred practices about how to manage IBM Spectrum Scale's availability and performance. If you are familiar with ESS, IBM Spectrum Scale, and IBM Spectrum Scale RAID, and you need only the pertinent documentation about how to configure a IBM Spectrum Scale cluster with an ESS for SAP HANA, see Chapter 5, "IBM Spectrum Scale customization for

HANA" on page 25. Before reading this IBM Redpaper publication, you should be familiar with the basic concepts of IBM Spectrum Scale and IBM Spectrum Scale RAID. This IBM Redpaper publication can be helpful for architects and specialists who are planning an SAP HANA on POWER deployment with the IBM Spectrum Scale file system. **Space in Tense** - Kyung-Sook Chung 2012-07-18

This monograph explores the tense, aspect, mood, and evidentiality of Korean, which has a rich verbal inflectional system, and proposes novel treatments within the framework of compositional semantics. One of the major contributions is the demonstration that Korean has two types of deictic tense—simple deictic and spatial deictic tense. Spatial deictic tense refers to the notion of the speaker's 'perceptual field' (or deictic range), as well as to temporality, functioning to set up a condition for a systematic evidential distinction. The research in this volume shows that the basic paradigm of evidentiality of Korean derives from the standard TMA system combined with the notion of space. This volume also shows that perfect and past tense utilize different primitives. The intended readership of this volume extends beyond Koreanists to scholars interested specifically in tense, mood, aspect, and evidentiality as well as in general theories of grammar and semantics-pragmatics.
