Return Of the Fallen - Rita Vetere 2011-10-17

When a fiery Nephilim goes rogue, there's only one thing to do: Take cover. Israfel, the only member of the fallen race in existence, is on a mission: kill Jared Crow, head of a secret organization known as The Order, and the man who murdered her friends. She's highly trained in the martial arts, skilled in weaponry and won't allow anything to stand in her way, not even her mortal lover, Edmond. Unable to dissuade Israfel from hunting down Crow, Edmond joins her. He's only along for the ride, but it's one he'll wish he'd never taken. Raziel, the last Watcher on earth, has taken refuge in the desert, far from the mortals he is duty-bound to protect. Though tired of the task after thousands of years of lonely servitude, when he detects a threat to the Symphony--the universal flow of all living things--he has no choice but to track the dissonance. Knowing sooner or later Israfel must die, he joins in the chase. Jared Crow has an agenda none of them could have foreseen—and he's got some powerful help in the form of the Dark One. Nephilim, mortal and Watcher--it will take all three to reverse what Crow has set in motion. 27,000 Words

Medieval Monasticism in Northern Europe - Steinunn Kristjánsdóttir 2021

While the Christian monastic tradition and its development on the mainland of Europe has been extensively studied by scholars, medieval monasticism in Northern Europe has gained considerably less attention. However, interest in the topic has grown steadily, as can be observed from the varied research that has taken place during the last decades. This growing interest can partly be explained by the current multidisciplinary approaches in academic research as well as the emergence of studies on material culture and its entwinement with archival material during the last decades of the twentieth century. It may also be further explained by an increased awareness of how North-European historiography, including medieval monastic studies, has since the nineteenth century been shaped by Protestant views, albeit in combination with longstanding nationalistic political perspectives. Therefore, the topic needs to be revisited, as is done here, not least due to the growing multinational and religious tolerance apparent in present academic studies of humanities. By highlighting Northern Europe specifically, the issue aims also to place medieval monasticism in a broader geographical and cultural context as being one of the active agents that formed the Christian worldview of the Middle Ages. The overall ambition of this Special Issue is, at the same time, to emphasize and introduce novel approaches to the reciprocal formation of the pan-European monasticism through its shifting localities and temporality.

Servers of the Divine Plan - Anonymous 2004
MANKIND AND PLANET EARTH HAVE TODAY
ARRIVED at a critical juncture in their
evolutionary journey. At the close of this 75,000
year major cycle, a New World is about to be
born. The memories and higher faculties of
certain individuals are just today returning to
them, and they are beginning to recall the
purpose of their incarnation, their duty to
humanity and to planet Earth. They are
becoming aware of the close attendance of
legions of incorporeal divine Emissaries, the
exalted ranks to which they inherently belong.
They are remembering that they are an essential
part of a vast collective effort and tremendously
important task, the scope of which stretches
back across millions of years and a myriad of
past lifetimes upon Earth and elsewhere, all
geared toward the forthcoming and conclusive
glory. In their remembrance, they are perceiving
that they are about to realise the grand
consummation of a vital phase of the Divine Plan
for Earth, the solar system and beyond. The
Servers are awakening, and they are taking up
their positions as agents of the New Spirit in

order to play an active role within today's
expanding world-consciousness around the
planet.

Sexual Chemistry - Lara Marks 2010-01-01
BIRTH CONTROL, CONTRACEPTION, FAMILY
PLANNING. Heralded as the catalyst of the
sexual revolution and the solution to global
overpopulation, the contraceptive pill was one of
the twentieth century's most important
inventions. It has not only transformed the lives
of millions of women but has also pushed the
limits of drug monitoring and regulation across
the world. This deeply-researched new history of
the oral contraceptive shows how its
development and use have raised crucial
questions about the relationship between
science, medicine, technology, and society. Lara
Marks explores the reasons why the pill took so
long to be developed and explains why it did not
prove to be the social panacea envisioned by its
inventors. Unacceptable to the Catholic Church,
rejected by countries such as India and Japan,
too expensive for women in poor countries, it
has, more recently, been linked to
cardiovascular problems.

Public Sector Enterprise Risk Management - Kenneth C. Fletcher 2019-05-27

Through a series of case studies and selected special topics, Public Sector Enterprise Risk Management presents examples from leading Enterprise Risk Management (ERM) programs on overcoming bureaucratic obstacles, developing a positive risk culture, and making ERM a valuable part of day-to-day management. Specifically designed to help government risk managers, with concepts and approaches to help them advance risk management beyond the basics, the book: Provides a balanced mix of concepts, instruction and examples; Addresses topics that go beyond the basics of Enterprise Risk Management (ERM) program design and implementation; Includes insights from leading practitioners and other senior officials. Many government organizations can refer to the growing body of materials that provide examples of ERM processes and procedures. Far fewer reference materials and examples exist to help organizations develop a risk-mature organizational culture that is critical to the long-term success and strategic value that ERM represents to government organizations. Public Sector Enterprise Risk Management begins to fill that void and is intended to help public sector risk managers overcome barriers that inhibit ERM from becoming an active contributor to major decisions that top officials must make.
