Sight Reading Mastery - 2016-12-01

Sight reading is the single largest barrier for most guitarists in the ability to engage with countless compositions and arrangements. This book is the culmination of over a decade of experimenting with getting people to sight read fluently on the guitar. The biggest challenge to any sight reading endeavor is to have immediate access to where the note is on the guitar at any given position. The exercises presented in this volume are a direct outgrowth of this problem in trying to systematically organize a solution. There are 130

practice sheets for sight reading. These practice sheets begin in open position and continue through twelfth position. Taking into account practicing all twelve keys, this amounts to 1,560 possible exercises based on key. If you did one a day it would take over 4 years to play them all. That's a lot of sight reading and a lot of getting to know your fretboard! You will not find any information on beginning to read notes on the guitar. This book takes for granted that you can find where basic notes exist on the instrument and locate them with the corresponding position on the musical staff. You will also find that there

are no time signatures, key signatures, or rhythms given. This will be discussed further in the book with the explanation of how to approach practicing these exercises. These exercises have been tested with a variety of different students who play many different genres over the past decade. Even my oldest "guinea pig" who is almost 90 has attested to their benefit. My hope is that you find this as a lifelong aid in the quest to become as proficient a guitarist as possible and run out of excuses for being a poor sight reader. This book seeks to fill the note reading gap for classical, jazz, rock, and any other

guitarist looking to hone their sight reading skills.

300 Progressive Sight Reading Exercises for Bass Guitar - Robert Anthony 2015-01-02

First and foremost: THIS IS NOT A METHOD BOOK. It is precisely what it says it is: 300 Progressive Sight Reading Exercises! Volume One is comprised of 300 progressive eight-bar exercises that cover the keys of C Major, F Major,

G Major, A Minor, D Minor and E Minor. Time signatures include 4/4 (Common Time), 3/4, 2/4, 6/8, and 2/2 (Cut Time). The remaining key signatures, additional time signatures, tempo markings and dynamics markings will be covered in future volumes. All of the exercises are eight measures long. If one has done any study of formal analysis, they will find that eight measures is a typical 'period' of music and usually contains two, four-bar phrases (also typical in length). For example, many sonatinas, jazz standards, and pop songs use "32 Bar Form" (A A B A), "Binary Form" (A B), and "Ternary Form" (A B A), with

each section often being eight bars. Thus, eight measures (one period of music) makes the perfect length for sight-reading studies in my opinion. How to use this book: Start where the exercises begin and work across the book - from exercise 1, 5, 9, 13 and so on until you get to a point where the music challenges you and then mark your ending point. The next practice, play exercises 2, 6, 10, 14, and so on... The next: 3, 7, 11, 15 and so on, and finally 4, 8, 12, 16, and so on. If you want to work at your "break point" (the point in the book where you can no longer play musically), work DOWN the page instead of

across the pages. Note: This book is also available in a LARGE PRINT version that for printing purposes had to be divided into two books. If you have poor vision or want this book to be easy to SEE on an electronic device, you might prefer the Large Print Version. "These books differ from conventional 'methods' in that technical and theoretical instructions have been omitted, in the belief that these are more appropriately left for the teacher to explain to the student." - Bela Bartok, Mikrokosmos. I wholeheartedly agree with Bartok's sentiment and if music teachers would ask their students what

they like least (or hate the most) about typical lessons, it is the method books that win this contest EVERY TIME. I have completely eliminated method books from my own teaching practice and have much happier and more productive students than ever. While this book is intended to train sight-reading skills, it may also be used by beginners or those new to reading to acquire basic reading skills, but it assumes one either has a teacher or can at least find C on their instrument. It starts at a very basic level (only three notes) and adds a new note, rhythm, or concept every four exercises and thoroughly

reinforces them throughout the rest of the book. Next, the music's composition is a slave to its function: The purpose of the books is to train reading skill, and the exercises keep challenging the range that has been established by previous exercises as well as less-than-convenient intervalic skips. They are composed from a 'music-first' perspective, as opposed to an 'instrument-first' perspective, and are purposely composed to be difficult to memorize. For example, the first exercises begin on C because they are in the key of C, and then go on to sometimes start and end on different scale

degrees of the same key. Those familiar with the Fundamental Modes will likely recognize what they are hearing, but those unfamiliar with these modes will likely be hearing something that sounds a bit different, or odd, until their ears acclimate to these sounds. I see many students go through this process with altered dominants and augmented triads as well. Additionally, a 20th-century composition technique (Bartok, Stravinsky) - Serial Composition - has also been used on several of the pieces, so if your ears are unfamiliar with this type of music, you might at first be uncomfortable with what you are hearing.
