**Rabdology** - John Napier 1990

This first English translation of Napier's Rabdologia provides a clear and readable introduction to a group of physical calculating devices, which, long overshadowed by Napier's logarithms, have their own intrinsic interest and charm. "The tasks which fill'd beginners with dismay  
This little book has banish'd clear away."  
John Napier had already discovered and published an epochmaking treatise

on logarithms when in 1617 he turned to "rabdology" or rod-reckoning as yet another means by which to confront the problem of simplifying the huge calculations involved in multiplication, division, and the extraction of roots. This first English translation of Napier's Rabdologia provides a clear and readable introduction to a group of physical calculating devices, which, long overshadowed by Napier's logarithms, have their own intrinsic interest and charm. Book I describes the first device, a set of rods known as "Napier's Bones," which were inscribed with numbers forming multiplication tables and used in conjunction with pencil and paper. Book II presents a series of simple calculations that readers can solve by using the rods, and a series of

tables of ratios useful for division. Napier then describes the second mechanical device for calculation, a forerunner of the modern calculator that he named promptuary or "place where things are stored ready for use." The third device, similar to a chessboard, allowed calculations to be performed by moving counters around the squares. Observing that the numbers had to be represented in what would now be called binary form, Napier provides instructions for changing from ordinary to binary numbers and back again, a method that worked equally well for multiplication and division and that had a particularly elegant symmetry when applied to the extraction of square roots.

Dark Psychology - Steven Turner  
2019-12-15

If want to discover how people with dark personalities work and what it really takes to persuade someone, then keep reading... Two manuscripts in one book: Dark Psychology: What

Machiavellian People of Power Know about Persuasion, Mind Control, Manipulation, Negotiation, Deception, Human Behavior, and Psychological Warfare that You Don't Persuasion: Highly Effective Manipulation Techniques to Influence People to Willingly Do What You Want Them to Do Using NLP, Mind Control and a Deep Understanding of Human Behavior and Dark Psychology Have you ever been subjected to the painful and damaging behaviors of people who seem to lack morals? Have you ever been the victim of negative humor designed to poke at your weaknesses and disempower you? Would you like to know how to protect yourself against these dark strategies so you can avoid being manipulated or get sucked into their false reality at the expense of your own sanity? You see, the art of dark

psychology has long been researched by scientists to attempt to understand what it is that allows people to ruthlessly chase their dreams at the expense of everyone around them. You are going to discover exactly how these manipulative people suck others into their deceptive ways and win at everything they do - no matter what the cost may be. This book will also show you how to protect yourself against these dark strategies so you can avoid being manipulated or sucked into their false reality at the expense of your own sanity. In part 1 of this book, you will learn about: The eight laws of human behavior and how manipulative people use these behaviors to their advantage The six scientific principles of persuasion and how a manipulator will use these

to persuade anyone to agree with them, seemingly on their own terms Mind control techniques that Machiavellian leaders and manipulators use to try and bend your reality and keep you at their mercy Manipulative negotiation tactics people use to get you to take their deal while making it seem like it was your idea 19 manipulation strategies predators use to lure people into their deceptive games The art of deceptive winning and how manipulators will use deception as a carefully selected tool so that they can easily win at anything they do And much, much more! Some of the topics covered in part 2 of this book include: Ego: friend or foe? A look at how ego management is an asset in negotiation Don't say that: what to avoid saying in conversation Nice and

effective ways to exert influence How  
Bruce Lee inspired persuasion  
concepts Scientifically proven  
principles of persuasion Seduction as  
manipulation: don't be a victim but  
use the techniques to influence  
others What you need to understand  
about human behavior and dark  
psychology Powerful NLP techniques  
that can be used for manipulation  
purposes Highly effective mind  
control techniques And much, much  
more So if you want to learn more

**Complete English for Cambridge  
Secondary** - Alan Jenkins 2015

*Life* - William K. Purves 2001  
Authoritative, thorough, and  
engaging, *Life: The Science of  
Biology* achieves an optimal balance

of scholarship and teachability,  
never losing sight of either the  
science or the student. The first  
introductory text to present  
biological concepts through the  
research that revealed them, *Life*  
covers the full range of topics with  
an integrated experimental focus that  
flows naturally from the narrative.  
This approach helps to bring the  
drama of classic and cutting-edge  
research to the classroom - but  
always in the context of reinforcing  
core ideas and the innovative  
scientific thinking behind them.  
Students will experience biology not  
just as a litany of facts or a  
highlight reel of experiments, but as  
a rich, coherent discipline.
