Our Lady of Alice Bhatti - Mohammed Hanif 2012-05-29

From the author of the universally acclaimed debut novel *A Case of Exploding Mangoes*: a subversive, often shockingly funny new novel set in steaming Karachi, about second chances, thwarted ambitions, and love in the most unlikely places. The patients of the Sacred Heart Hospital for All Ailments need a miracle, and Alice Bhatti may be just what they're looking for. She's the new junior nurse, but that's the only thing ordinary about her. Her father is a

part-time healer in the French Colony, Karachi's Christian slum--and it seems she has inherited his part-time gift. With a bit of begrudging but inspired improvisation, Alice brings succour to the patients lining the hospital's corridors. Yet, a Christian in an Islamic world, she is ensnared in the red tape of hospital bureaucracy, trapped by the caste system, and torn between her duty to her patients, her father, and her husband--an apprentice to the nefarious "Gentlemen's Squad" of the police, and about to plunge them both into a situation so dangerous that perhaps not even a miracle can save them. But, of course, Alice Bhatti is no ordinary nurse...

Red Birds - Mohammed Hanif 2019-05-14
This "splendidly satirical novel" by the award-winning Pakistani author

“beautifully captures the absurdity and folly of war and its ineluctable impact” (Booklist, starred review). An American pilot crash lands in the desert and finds himself on the outskirts of the very camp he was supposed to bomb. After days spent wandering and hallucinating from dehydration, Major Ellie is rescued by one of the camp’s residents, a teenager named Momo, whose money-making schemes are failing while his family falls apart. His older brother left for his first day of work at an American base and never returned; his parents are at each other’s throats; his dog is having a very bad day; and a well-meaning aid worker has shown up wanting to research him for her book on the Teenage Muslim Mind. To escape the madness, Momo sets out to search for his brother, and hopes his

new Western acquaintances might be able to help find him. But as the truth of Ali’s whereabouts begin to unfold, the effects of American “aid” on this war-torn country are revealed to be increasingly pernicious. In *Red Birds*, acclaimed author Mohammed Hanif reveals critical truths about the state of the world with his trademark wit and keen eye for absurdity.

Hemicellulose Biorefinery: A Sustainable Solution for Value Addition to Bio-Based Products and Bioenergy - Michel Brienzo 2022-01-03

This edited book provides knowledge about hemicelluloses biorefinery approaching production life cycle, circular economy, and valorization by obtaining value-added bioproducts and bioenergy. A special focus is dedicated to chemical and biochemical compounds produced from the hemicelluloses derivatives platform. Hemicelluloses are polysaccharides located into plant cell wall, with diverse chemical structures and properties. It is the second most spread organic polymer on nature and found in vast lignocellulosic materials from agro and industrial wastes, therefore, hemicelluloses are considered as abundant and renewable

raw material/feedstock. Biorefinery concept contributes to hemicelluloses production associated with biomass industrial processes. Hemicelluloses are alternative sources of sugars for renewable fuels and as platform for chemicals production. This book reviews chemical processes for sugar production and degradation, obtaining of intermediate and final products, and challenges for pentose fermentation. Aspects of hemicelluloses chain chemical and enzymatic modifications are presented with focus on physicochemical properties improvement for bioplastic and biomaterial approaches. Hemicelluloses are presented as sources for advanced materials in biomedical and pharmaceutical uses, and as hydrogel for chemical and medicine deliveries. An

interdisciplinary approach is needed to cover all the processes involving hemicelluloses, its conversion into final and intermediate value-added compounds, and bioenergy production. Covering this context, this book is of interest to teachers, students, researchers, and scientists dedicated to biomass valorization. This book is a knowledge source of basic aspects to advanced processing and application for graduate students, particularly. Besides, the book serves as additional reading material for undergraduate students (from different courses) with a deep interest in biomass and waste conversion, valorization, and chemical products from hemicelluloses
