Translating Irony between English and Arabic

- Raymond

Chakhachiro 2019-01-14

This book challenges entrenched literary views that promote the impracticality of linguistic, stylistic and functional approaches to the analysis and translation of irony. It considers these scientific fields of enquiry as the building blocks on which ironic devices in English and Arabic are grounded, and according to which the appropriateness of the methods of translation in the literature is assessed in a quest to pin down an interactive model for the interpretation and translation of irony. The book ventures into contrastive linguistic and stylistic analyses of irony in Arabic and English from literary, linguistic and discourse

perspectives. It sheds light on the interpretation and the linguistic realisation of irony in Arabic and English through an interdisciplinary approach, and, consequently, identifies similarities and discrepancies in the form and function of ironic devices between these languages. As such, it will appeal to professional translators, instructors and students of translation, as well as language learners, language teachers and researchers in cross-cultural and inter-pragmatic disciplines.

ABSTRACT One of the increasing linguistic practices in writing economic newspaper articles and reports is the use of metaphors from the source domain of war. In fact, there is no clear-cut answer

as to why this is practiced, but apparently the two domains have some elements in common even though they are different realms of knowledge. This paper is based on data collected from economic newspaper articles which are remarkably abundant in war metaphors that describe the economic situation in general and the last economic crisis in specific and its consequences. Various reasons have been detected for mapping the domain of war onto the domain of economics. Among them is the intention to impress and attract the audience to read the article, to raise awareness of a certain economic event or phenomenon, or for prosodic purposes. Also, this paper investigates the techniques according to which war metaphors are rendered into

Idioms and Their Slovene Translations in the Works of Roald Dahl - Ana Matjaž 2014

The focus of this BA thesis is to research how idioms are translated from English to Slovene and what difficulties translators encounter when translating idiomatic expressions. In the theoretical part of the thesis, the theoretical aspects of phraseology, phraseological units, proverbs, collocations and idioms are discussed. Greater stress is given to idioms and their properties, like idiomaticity, frozenness and compositionality. Different syntactic

transformations idioms can or cannot undergo are presented. Examples are given throughout the thesis. Furthermore, two major categorizations of idioms are presented and the comparison between idioms and other phraseological units is made. The translation process is defined, difficulties regarding translating idioms are listed and four most common strategies of translating idiomatic expressions are shortly described. In the empirical part of the dissertation, the analyses of English idioms and their Slovene equivalents are provided. The examples that are the basis of the empirical part are taken from two children's books and their translations. The original books, *Matilda* (2001) and *Charlie and the Chocolate Factory* (2001), were written by

Roald Dahl. The Slovene versions of these books were translated by different translators % Matilda (1997) was translated by Bogdan Gradišnik, Charlie in tovarna čokolade (1992) by Mate Dolenc. The number of idioms found is quite significant for such short books. Furthermore, both translations are very good, since the number of idioms omitted is negligible and only one major translation mistake occurs in each translation. There are also many examples of translating non-idiomatic expressions in the original versions with idioms in Slovene, mainly to provide an idiomatic effect.

A Model for Translation Quality Assessment - Juliane House 1977

How Proverbs Mean - Neal R. Norrick 1985-01-01
TRENDS IN LINGUISTICS is

a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science.

TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN

LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes, which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing. Translation Quality Assessment - Juliane House 2014-10-24 Translation Quality Assessment has become one of the key issues in translation studies. This comprehensive and up-to-date treatment of translation evaluation makes explicit the grounds of judging the worth of a translation and emphasizes that translation is, at its core, a linguistic art. Written by the author of the world's best known model of translation quality assessment, Juliane House provides

an overview of relevant contemporary interdisciplinary research on intercultural communication and globalization research, corpus and psycho- and neurolinguistic studies. House also acknowledges the importance of socio-cultural and situational context in which texts are embedded, and which need to be analysed when they are transferred through space and time in acts of translation but also highlights the linguistic art form of translation. The text includes a newly revised and presented model of translation quality assessment which, like its predecessor, relies on detailed textual and culturally informed contextual analysis and comparison. The test cases also show that there are two steps in translation evaluation: firstly analysis,

description and explanation; secondly, judgements of value, socio-cultural relevance and appropriateness. The second is futile without the first: to judge is easy, to understand less so. Translation Quality Assessment is an invaluable resource for students and researchers of Translation Studies and Intercultural Communication, as well as for professional translators.

The Translator's Invisibility - Lawrence Venuti 2012-06-25 Since publication over ten years ago, The Translator's Invisibility has provoked debate and controversy within the field of translation and become a classic text. Providing a fascinating account of the history of translation from the seventeenth century to the present day, Venuti shows how fluency prevailed over other translation strategies to shape the canon of foreign literatures in English and investigates the cultural consequences of the receptor values which were simultaneously inscribed and masked in foreign texts during this period. The author locates alternative

translation theories and practices in British, American and European cultures which aim to communicate linguistic and cultural differences instead of removing them. In this second edition of his work, Venuti: clarifies and further develops key terms and arguments responds to critical commentary on his argument incorporates new case studies that include: an eighteenth century translation of a French novel by a working class woman; Richard Burton's controversial translation of the Arabian Nights; modernist poetry translation; translations of Dostoevsky by the bestselling translators Richard Pevear and Larissa Volokhonsky; and translated crime fiction updates data on the current state of

translation, including publishing statistics and translators' rates. The Translator's Invisibility will be essential reading for students of translation studies at all levels. Descriptive Translation Studies and Beyond -

Gideon Toury 1995
A replacement of the author's well-known book on Translation Theory, *In Search of a Theory of Translation* (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a

branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature. Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with emphasis on the need to contextualize whatever one sets out to focus on. Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour □ in the

appropriate cultural setup; textual components □ in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice? This is an excellent book for higher-level translation courses.

A Dictionary of American Proverbs - Wolfgang Mieder 1992

Americans have a gift for coining proverbs. "A picture is worth a thousand words" was not, as you might imagine, the product of ancient Chinese wisdom -- it was actually minted by advertising executive Fred Barnard in a 1921 advertisement for Printer's Ink magazine. After all, Americans are

first and foremost a practical people and proverbs can be loosely defined as pithy statements that are generally accepted as true and useful. The next logical step would be to gather all of this wisdom together for a truly American celebration of shrewd advice. *A Dictionary of American Proverbs* is the first major collection of proverbs in the English language based on oral sources rather than written ones. Listed alphabetically according to their most significant key word, it features over 15,000 entries including uniquely American proverbs that have never before been recorded, as well as thousands of traditional proverbs that have found their way into American speech from classical, biblical, British, continental European,

and American literature. Based on the fieldwork conducted over thirty years by the American Dialect Society, this volume is complete with historical references to the earliest written sources, and supplies variants and recorded geographical distribution after each proverb. Many surprised await the reader in this vast treasure trove of wit and wisdom. Collected here are nuggets of popular wisdom on all aspects of American life: weather, agriculture, travel, money, business, food, neighbors, friends, manners, government, politics, law, health, education, religion, music, song, and dance. And, to further enhance browsing pleasure, the editors have provided a detailed guide to the use of the work. While it's true that many of our best known proverbs

have been supplied by the ever-present "Anonymous," many more can be attributed to some very famous Americans, like Ernest Hemingway, Abraham Lincoln, Benjamin Franklin, Mark Twain, J. Pierpont Morgan, Thomas Alva Edison, Abigail Adams, and Ralph Waldo Emerson, to name but a few offered in this fascinating collection. Who wouldn't want to know the origin of "the opera ain't over till the fat lady sings?" This uniquely American proverb and many more are gathered together in *A Dictionary of American Proverbs*. A great resource for students and scholars of literature, psychology, folklore, linguistics, anthropology, and cultural history, this endlessly intriguing volume is also a delightful companion for anyone with an interest

in American culture.

Meaning-based

Translation - Mildred L. Larson 1998

This textbook has been designed to emphasize the differences between languages and how this affects the translation of a text from one language into another. It is based upon the principle that the translator must first know the meaning of the source text before he can translate it into the receptor language. Meaning is presented as a structure which stands behind any text.

Meaning-based, rather than form-based, translation is the goal of the textbook.

There's a Double Tongue

- Dirk Delabastita 1993

The pun is as old as Babel, and inveterate punsters like Shakespeare clearly never lacked translators. This book critically examines the

evergreen cliché that wordplay defies translation, replacing it by a theory and a case study that aim to come to grips with the reality of wordplay and its translation. What are the possible modes of wordplay translation? What are the various, sometimes conflicting constraints prompting translators in certain situations to go for one strategy rather than another? Ample illustration is provided from Hamlet and other Shakespearean texts and several Dutch, French, and German renderings. The study exemplifies how theory can usefully be integrated into a description-oriented approach to translation. Much of the argument also rests on the definition of wordplay as an open-ended and historically variable category. The book's concerns range from the

linguistic and textual properties of Shakespeare's punning and its translation to matters of historical poetics and ideology. Its straightforward approach shows that discourse about wordplay doesn't need to rely on stylistic bravura or abstract speculation. The book is concluded by an anthology of the puns in Hamlet, including a brief semantic analysis of each and a generous selection of diverse translations.

Idioms and Idiomaticity
- Chitra Fernando 1996
The series will provide much-needed descriptions of modern English which take the revelations of recent research into account. This book provides a comprehensive treatment of idioms and idiomaticity from a functional perspective. It examines the use of idioms in discourse to combine the novel and

the conventional, to convey representations of the world, evaluate people and situations, signal conviviality or conflict, and create coherent, cohesive texts. The book goes on to consider implications for language learning and development.

The Translation of Mus'id and Mus'ida's "The Gat" as an Arabic Source Text into English

- Hisham Yahya

2019-04-09

Submitted Assignment from the year 2019 in the subject Interpreting / Translating , grade: 93.33, , course: Critical Discourse Analysis, language: English, abstract: Translating cultures is one of the most difficult tasks for translators. Due to numerous differences of cultures that's caused by language, differences may occur at the level of the word and above

the level of the word as well. It is not surprising if a word may connote a different thing in one context, and the same time it connotes another thing in another context. Culturally speaking, the same word may connote a certain meaning in one culture while has different connotations in another culture. All that is due to certain reasons ascribed to ideology, attitude, association, pragmatics, or otherwise expressed. To illustrate, the source text is from the Middle East Culture, especially from the traditionally Yemeni culture (Mus'id and Mus'ida Broadcasting), needs to be transferred into totally different culture (Western Culture). The translator has to bridge the gap by using strategies like Foreignization and Demostication, to reach

the main purpose of the ST.

AMERICAN LITERATURE: A STUDY IN TRANSLATION STRATEGIES - DR. SACHIN SAMPATRAO SALUNKHE 2021-08-02

Things Fall Apart - Chinua Achebe 2009-06-05

THINGS FALL APART tells two overlapping,

intertwining stories, both of which center around Okonkwo, a "strong man" of an Ibo village in Nigeria. The first of these stories traces Okonkwo's fall from grace with the tribal world in which he lives, and in its classical purity of line and economical beauty it provides us with a powerful fable about the immemorial conflict between the individual and society. The second story, which is as modern as the first is ancient, and which elevates the book to a tragic plane, concerns the clash of cultures and the destruction of Okonkwo's world through the arrival of aggressive, proselytizing European missionaries. These twin dramas are perfectly harmonized, and they are modulated by an awareness capable of encompassing at once the

life of nature, human history, and the mysterious compulsions of the soul. THINGS FALL APART is the most illuminating and permanent monument we have to the modern African experience as seen from within. *Arabic-English-Arabic-English Translation* - Ronak Husni 2015-07-16 *Arabic-English-Arabic-English Translation: Issues and Strategies* is an accessible coursebook for students and practitioners of Arabic-English-Arabic translation. 1200 Kimeru Proverbs - Edward Steven Mwiti 2004

Topics in Audiovisual Translation - Pilar Orero 2004-10-20

The late twentieth-century transition from a paper-oriented to a media-oriented society has triggered the emergence of Audiovisual Translation as the most dynamic and fastest developing trend within Translation Studies. The growing interest in this area is a clear indication that this discipline is going to set the agenda for the theory, research, training and practice of translation in the twenty-first century. Even so, this remains a largely underdeveloped field and much needs to be done to put Screen Translation, Multimedia Translation or the wider implications of Audiovisual Translation on a par with other fields within Translation Studies. In this light, this collection of essays reflects not only the "state of the art" in

the research and teaching of Audiovisual Translation, but also the professionals' experiences. The different contributions cover issues ranging from reflections on professional activities, to theory, the impact of ideology on Audiovisual Translation, and the practices of teaching and researching this new and challenging discipline. In expanding further the ground covered by the John Benjamins' book (Multi)Media Translation (2001), this book seeks to provide readers with a deeper insight into some of the specific concepts, problems, aims and terminology of Audiovisual Translation, and, by this token, to make these specificities emerge from within the wider nexus of Translation Studies, Film Studies and Media Studies. In a quickly

developing technical audiovisual world, Audiovisual Translation Studies is set to become the academic field that will address the complex cultural issues of a pervasively media-oriented society.
