Never Let Me Go - Kazuo Ishiguro

2012-05-21

In one of the most acclaimed and original novels of recent years, Kazuo Ishiguro imagines the lives of a group of students growing up in a darkly skewed version of contemporary England. Narrated by Kathy, now thirty-one, *Never let me go* hauntingly dramatises her attempts to come to terms with her childhood at the seemingly idyllic Hailsham School, and with the fate that has always awaited her and her closest friends in the wider world. A story of love, friendship and memory, *Never let me go* is charged throughout with a sense of the fragility of life.

**Deaf Education and Challenges for Bilingual/Multilingual Students** -

Musyoka, Millicent Malinda 2022-01-07

Biliteracy, or the development of reading, writing, speaking, listening, and thinking competencies in more than one language, is a complex and dynamic process. The process is even more challenging when the languages used in the literacy process differ in modality. Biliteracy development among deaf students involves the use of visual languages (i.e., sign languages) and auditory languages (spoken languages). Deaf students' sign language proficiency is strongly related to their literacy abilities. The distinction between bilingualism and multilingualism is critical to our understanding of the underserved, the linguistic deficit, and the underachievement of deaf and hard of hearing (D/HH) immigrant students, thus bringing the multilingual and immigrant aspect into the research on deaf education. Multilingual and immigrant students may face unique

challenges in the course of their education. Hence, in the education of D/HH students, the intersection of issues such as biculturalism/multiculturalism, bilingualism/multilingualism, and immigration can create a dilemma for teachers and other stakeholders working with them. *Deaf Education and Challenges for Bilingual/Multilingual Students* is an essential reference book that provides knowledge, skills, and dispositions for teaching multicultural, multilingual, and immigrant deaf and hard of hearing students globally and identifies the challenges facing the inclusion needs of this population. This book fills a current gap in educational resources for teaching immigrant, multilingual, and multicultural deaf students in learning institutions all over the world. Covering topics such as universal design for learning, inclusion, literacy, and language acquisition, this text is crucial for

classroom teachers of deaf or hard of hearing students, faculty in deaf education programs, language instructors, students, pre-service teachers, researchers, and academicians.

**Instructional Design: International Perspectives I** - Sanne Dijkstra 2013-05-13  
Instructional design theory and practice has evolved over the past 30 years from an initial narrow focus on programmed instruction to a multidimensional field of study integrating psychology, technology, evaluation, measurement, and management. The growth of instructional design (ID) has occurred because of direct needs, problems, and goals from society. Its application in planning instruction first developed in the United States with the Department of Defense during World War II with the purpose of meeting immediate concerns for effective training of larger numbers of military personnel. From the beginning, ID has rapidly expanded into

applications in industrial and executive training, vocational training, classroom learning, and professional education. Although ID has its roots in the U.S., applications and theoretical growth is an international activity. However, literature at the international level is still limited to either individual author contributions or collections primarily represented by single countries. As a result, there is no standard reference source that contains the rich variety of theories and applications to form the international foundation for the field. The goal of this two-volume set is to establish international foundations for ID theory, research, and practice within the framework of the two following objectives: \* to identify and define the theoretical, research, and model foundations for ID, and \* to bridge the gap between ID foundations and application. Volume I includes chapters on philosophical and theoretical issues on

learning theory and ID models. Volume II provides an overview of the state of the art of solving ID problems. The contributors offer contrasting points of view which provide a rare opportunity to see the diversity and complexity in the field. The editorial committee has selected a wide range of internationally known authors to make presentations in the topic areas of the field.

Evolution Education Re-considered - Ute Harms 2019-07-16

This collection presents research-based interventions using existing knowledge to produce new pedagogies to teach evolution to learners more successfully, whether in schools or elsewhere. 'Success' here is measured as cognitive gains, as acceptance of evolution or an increased desire to continue to learn about it. Aside from introductory and concluding chapters by the editors, each chapter consists of a research-

based intervention intended to enable evolution to be taught successfully; all these interventions have been researched and evaluated by the chapters' authors and the findings are presented along with discussions of the implications. The result is an important compendium of studies from around the world conducted both inside and outside of school. The volume is unique and provides an essential reference point and platform for future work for the foreseeable future.

**Business Start-Up 2 Student's Book Klett Edition** - Mark Ibbotson 2006-05-01  
Business Start-up is a two-level (CEF level A1/A2) Business English course for adults who need English for their work. This new Business English course takes beginners and false beginners from basic English up to the point where they can start preparing for the BEC Preliminary examination. Business Start-up brings reality to the most basic

levels of language learning through the use of authentic material, real companies and credible communication scenarios, ensuring that adult learners remain interested and motivated. Communication skills are carefully prioritized, allowing learners to start working in English at the earliest opportunity. To complement the professional English syllabus, the final lesson in each unit deals with a 'Time Out' topic, focusing on essential language for travel and socializing, allowing learners to build important general vocabulary. The Business Start-up Workbooks provide self-study practice of the language from the Student's Books. In addition, the Workbooks come with a free CD-ROM/Audio CD containing extra grammar, listening and vocabulary practice. This version is available in German-speaking markets only.

**New York Magazine** - 1993-03-01

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

**Biotechnology** - Jeffery M. Becker  
2012-12-02

Biotechnology: A Laboratory Course is a series of laboratory exercises demonstrating the in-depth experience and understanding of selected methods, techniques, and instrumentation used in biotechnology. This manual is an outgrowth of an introductory laboratory course for senior undergraduate

and first year graduate students in the biological sciences at The University of Tennessee. This book is composed of 19 chapters and begins with some introductory notes on record keeping and safety rules. The first exercises include pH measurement, the use of micropipettors and spectrophotometers, the concept of aseptic technique, and preparation of culture media. The subsequent exercises involve the application of the growth curve, the isolation, purification, and concentration of plasmid DNA from Escherichia coli, and the process of agarose gel electrophoresis. Other exercises include the preparation, purification, and hybridization of probe, the transformation of Saccharomyces cerevisiae, the transformation of E. coli by plasmid DNA, and the principles and applications of protein assays. The final exercises explore the  $\beta$ -galactosidase assay and the purification and determination of  $\beta$ -

galactosidase in permeabilized yeast cells. This book is of great value to undergraduate biotechnology and molecular biology students.

**Excellence** - Kurt Heller 2011

Applied Construction Grammar - Sabine De  
Knop 2016-04-25

Current research within the framework of  
Construction Grammar (CxG) has mainly  
adopted a theoretical or descriptive  
approach, neglecting the more applied  
perspective and especially the question of  
how language acquisition and pedagogy can  
benefit from a CxG-based approach. The  
present volume explores various aspects of  
“Applied Construction Grammar” through a  
collection of studies that apply CxG and  
CxG-inspired approaches to relevant issues  
in L2 acquisition and teaching. Relying on  
empirical data and covering a wide range of  
constructions and languages, the chapters  
show how the cross-fertilization of CxG and  
L2 acquisition/teaching can improve the  
description of learners’ use of constructions,

provide theoretical insights into the  
processes underlying their acquisition (e.g.  
with reference to inheritance links or  
transfer from the L1), or lead to novel  
teaching practices and resources aimed to  
help learners make the generalizations that  
native speakers make naturally from the  
input they receive.

**First Steps in Psychotherapy** - H.H. Wolff  
2012-12-06

The contributors to this volume, like many  
others concerned with medical education  
have for a long while been conscious of the  
fact that in the training of medical students  
and in the practice of medicine too little  
attention is being paid to the psychological  
aspects of illness and to the use of  
psychotherapy in patient care. In an attempt  
to fill this gap medical students at University  
College Hospital, London, have since 1958  
been given the opportunity on a voluntary  
basis to treat a patient with weekly

analytically-orientated psychotherapy under supervision for a year or longer. In 1977 a similar scheme was started at the Psychosomatic Clinic of Heidelberg University. We were fortunate in obtaining generous financial support from the European Community which has enabled teachers and students from our two universities in Great Britain and the Federal Republic of Germany to collaborate in this student-psychotherapy teaching project and to compare our experiences. In this book we present an account of this joint educational endeavour, including our successes and our failures, as well as our attempts to solve some of the problems we have encountered. We decided to let individual supervisors and teachers who inevitably differed in their approach write their own contributions rather than try to present a unified picture which would not have given a fair impression of our work and

experience. If this has led to some repetition in the text we hope readers will appreciate the reason for it.

### **Methods in Premodern Economic History** - Ulla Kypta 2019-10-15

This edited collection demonstrates how economic history can be analysed using both quantitative and qualitative methods, connecting statistical research with the social, cultural and psychological aspects of history. With their focus on the time between the end of the commercial revolution and the Black Death (c. 1300), and the Thirty Years' War (c. 1600), Kypta et al. redress a significant lack of published work regarding economic history methodology in the premodern period. Case studies stem from the Holy Roman Empire, one of the most important economic regions in premodern times, and reconnect the German premodern economic history approach with the grand narratives that

have been developed mainly for Western European regions. Methodological approaches stemming from economics as well as from sociology and cultural studies show how multifaceted research in economic history can be, and how it might accordingly offer us new insights into premodern economies.

The Educated Woman - Katharina Rowold  
2011-02-09

The Educated Woman is a comparative study of the ideas on female nature that informed debates on women's higher education in the late nineteenth and early twentieth centuries in three western European countries. Exploring the multi-layered roles of science and medicine in constructions of sexual difference in these debates, the book also pays attention to the

variety of ways in which contemporary feminists negotiated and reconstituted conceptions of the female mind and its relationship to the body. While recognising similarities, Rowold shows how in each country the higher education debates and the underlying conceptions of women's nature were shaped by distinct historical contexts.

*Language Acquisition in CLIL and Non-CLIL Settings* - Verena Möller 2017-12-15

Language Acquisition in CLIL and Non-CLIL Settings builds a bridge between Second Language Acquisition and Learner Corpus Research (LCR) methodologies to take the evaluation of Content and Language Integrated Learning (CLIL) to a new level. The study innovates in two main ways. First, it is based on a highly diversified L2 database which includes learner corpus data as well as experimental data from the same learners. These linguistic components of the

database are complemented with extensive information on learner variables, including cognitive and affective factors, which are rarely studied in LCR. Second, the study relies on multifactorial statistical analyses to assess the effectiveness of CLIL itself as well as the impact of the selectivity inherent in the CLIL system, which has frequently been ignored. The linguistic focus of the study is the English passive, which is investigated in CLIL and non-CLIL teaching materials, and subsequently related to learner output.

Censoring History: Perspectives on Nationalism and War in the Twentieth Century - Laura E. Hein 2016-09-16

Considering the great influence textbooks have as interpreters of history, politics and culture to future generations of citizens, it is

no surprise that they generate considerable controversy. Focusing largely on textbook treatment of lingering - and sometimes explosive - tensions originating in World War II, "Censoring History" addresses issues of textbook nationalism in historical and comparative perspective. Discussions include Japan's Comfort Women and the Nanjing Massacre; Nazi genocide against the Jews, Gypsies, Catholics and others; Hiroshima and Nagasaki, and the Indochina wars. The essays address controversies over textbook content around the globe: How and why do specific representations of war evolve? What are the international and national forces affecting how textbook writers, publishers and state censors depict the past? How do these forces differ from country to country? Other comparative essays analyze nationalist and war controversies in German, US and Chinese textbook debates.

**Teaching and Learning English in the Primary School** - Gila A. Schauer

2019-10-11

This book is the first comprehensive investigation of interlanguage pragmatic issues in a primary school context that is based on both primary school teachers' statements on their own teaching realities, views and preferences, and a thorough investigation of materials used by teachers and recommended by teacher educators in the state the primary schools are located in. It offers a contrastive analysis of primary school learners acquiring English in a typical English as a foreign language school context and their age peers in the same state that are exposed to English in a school immersion context. This book will be of interest to scholars, researchers, educators in higher education that focus on English language teaching, second language acquisition and applied linguistics. It is also

intended for students who are planning to become primary school teachers of English as a foreign language.

*Research in Science Education — Past, Present, and Future* - Helga Behrendt  
2001-01-31

This truly international volume includes a selection of contributions to the Second Conference of the European Science Education Research Association (Kiel, Sept. 1999). It provides a state-of-the-art examination of science education research in Europe, discusses views and visions of science education research, deals with research on scientific literacy, on students' and teachers' conceptions, on conceptual change, and on instructional media and lab work.

**International Handbook of Mathematics Education** - Alan Bishop 2012-12-06  
ALAN J. BISHOP Monash University, Clayton, Victoria, Australia RATIONALE Mathematics

Education is becoming a well-documented field with many books, journals and international conferences focusing on a variety of aspects relating to theory, research and practice. That documentation also reflects the fact that the field has expanded enormously in the last twenty years. At the 8th International Congress on Mathematics Education (ICME) in Seville, Spain, for example, there were 26 specialist Working Groups and 26 special ist Topic Groups, as well as a host of other group activities. In 1950 the 'Commission Internationale pour l'Etude et l'Amelioration de l'Enseignement des Mathematiques' (CIEAEM) was formed and twenty years ago another active group, the 'International Group for the Psychology of Mathematics Education' (PME), began at the third ICME at Karlsruhe in 1976. Since then several other specialist groups have been formed, and are also active through regular

conferences and publications, as documented in Edward Jacobsen's Chapter 34 in this volume.

**The Handbook of Mathematics Teacher Education: Volume 2** - 2008-01-01

The Handbook of Mathematics Teacher Education, the first of its kind, addresses the learning of mathematics teachers at all levels of schooling to teach mathematics, and the provision of activity and programmes in which this learning can take place. It consists of four volumes. Volume 2, Tools and Processes in Mathematics Teacher Education, focuses on the “how” of mathematics teacher education.

The New Cambridge English Course is a course teachers and students can rely on to cover the complete range and depth of language and skills needed from beginner to upper-intermediate level. Each level is designed to provide at least 72 hours of class work using the Student's Book, with additional self-study material provided in the Practice Book. The course has a proven multi-syllabus approach which integrates work on all the vital aspects of language

study: grammar, vocabulary, pronunciation, skills, notions and functions.

**What Is History For?** - Arthur Alfaix Assis  
2014-01-30

A scholar of Hellenistic and Prussian history, Droysen developed a historical theory that at the time was unprecedented in range and depth, and which remains to the present day a valuable key for understanding history as both an idea and a professional practice. Arthur Alfaix Assis interprets Droysen's theoretical project as an attempt to redefine the function of historiography within the context of a rising criticism of exemplar theories of history, and focuses on Droysen's claim that the goal underlying historical writing and reading should be the development of the subjective capacity to think historically. In addition, Assis examines the connections and disconnections between Droysen's theory of historical thinking, his practice of historical

thought, and his political activism. Ultimately, Assis not only shows how Droysen helped reinvent the relationship between historical knowledge and human agency, but also traces some of the contradictions and limitations inherent to that project.
