Natural Language Understanding is one of the most clear examples. Traditional ways of visualizing complex information, namely linear text, web pages and hyperlink-based applications, have serious productivity problems. Mind mapping is probably the only way of reducing the problems inherent in these traditional ways of visualizing complex information. The goal of Mind Mapping and Artificial Intelligence is to provide readers with an introduction to mind mapping and artificial intelligence, to the problems of using traditional ways of visualizing complex information and as an introduction to mind mapping automation and its integration into Artificial Intelligence applications such as NLU and others. As more applications of Artificial Intelligence are developed in the near future, the need for the improvement of the visualization of the information generated will increase exponentially. Our process-oriented industries need more creativity... so it is definitely worth investing some time to evaluate this book and its thesis for yourself!" -Manas Fuloria, Co-founder and CEO, Nagarro "Project management is typically associated with linear thinking with a beginning, a middle and an end. Mind Maps are associated with Creativity and non-linear thinking. When an expert in both areas - PMP, Scrum Master and a Thinkbuzan tutor- brings this expertise together in one book, it tickles the left and right side of the brain simultaneously. Maneesh has written a compelling thesis and is a must read for CXOs and project managers alike, to get the most out of projects!" -Sameer Garde, President, South Asia, Philips India "While solving complex problems we may have a difficulty in looking at all perspectives of the eventual solution. Mind Maps help in documenting our thoughts in a more structured way by aligning the creative thinking process with the analytical decision process. This expertise was so far not available in India and the initiative by Maneesh is a welcome and valuable contribution. This is especially useful for mid-level and senior people but can be used by all age groups." -Tushar Bhatia, Founder & CEO, EmpXtrack "Just as the LEAN movement transformed the Manufacturing industry, Mind Maps can do the same to the field of Project Management. A Mind Map helps cuts across the noise in multiple situations, brings into focus the core issue and ignites creativity through whole brain thinking. Through this book Maneesh has provided a framework and examples to apply Mind Mapping to the practice of Project Management - a bold move that will encourage creative thinking and problem solving. A must read for organizational heads and all project managers." - Nitin Kulkarni, Founder & Principal Consultant, Elevo Consulting "The book is a Project management and Mind Maps toolkit coming from a practicing professional and trainer Maneesh Dutt. Grass Roots Leaders - Tony Buzan 2016-04-22

Grass Roots Leaders galvanizes the emotional enthusiasm of the workforce and taps the wealth of their brain power to create an engine of innovation that ripples through the organization from the bottom up and powers it forward. Tony Buzan, Tony Dottino and Richard Israel pick up a theme they first introduced nearly a decade ago in The Brain Smart Leader and document a way of fundamentally changing the perspective and behaviour of leaders and employees in your organization. Their approach shows how to: * use the brain's capacity for solving problems and implementing innovative plans to make the organization's vision a reality; * adopt a three-speed technique - first gear to slow down and allow new learning or support for difficult transition periods. Second gear shifts up to a productive work outcome, and then third gear revs up to champion innovation and change; * apply a series of proven models for dealing with information overload, making the best use of scarce resources, such as time, and keeping sight of successful outcomes as they are developed. The book accurately captures the current state of thinking in organizations, as well as the latest research on how our brains work, to deliver a radical blueprint for how organizations need to change to survive and what this means to their managers and to their employees. If you are a leader who longs to use the grass roots intellectual capital in your organization but, given the quantity of meetings, e-mail, crises and reorganizations, you simply haven't had the time, this book is for you. And if you are an

employee who is sick and tired of daily stress, bad planning and poorly thought-through changes and implementations, customer complaints but no improvements, this book is for you, too. A Brain Smart Revolution in Business starts with one person. You.

This book is an essential handbook on teaching primary history, combining subject knowledge with practical teaching ideas to ensure your teaching of history is both imaginative and creative. Emphasizing the importance of history and its wider skillset, the book explores the concepts and skills that are the fundamental building blocks of history teaching such as: • Chronological understanding • Concepts and skills • Interpretation and evidence Each chapter offers a structured approach and provides a range of activities that both address specific elements of the history curriculum and help develop this wider skillset. It includes practical ideas for lessons

through an essential toolkit of ideas, teaching strategies and activities, with each activity designed to focus on a key skill or attribute associated with teaching primary history. The practical insights accompanied by a grounded rationale for each aspect of history will help you learn the best methods for approaching the teaching of history in the primary school, as well as plan and deliver effective history lessons. This book is ideal if you are training to teach as it will help you with your assignments and your teaching placements. It is also recommended if you are a more experienced practitioner or history coordinator and want to provide the very best experiences in primary history to children in your school. "An essential and inspirational guidebook for the successful teaching of history within the primary classroom! If you are in any way involved with the teaching of history, you owe it to yourself to read this book. A 'must have' for all history coordinators and teachers within the primary sector, from trainees to the experienced, who wish to raise the profile of history within their school. Closely tied to the new primary curriculum, it is enriched with excellent ideas to make history in the classroom a fun

and memorable experience." Julia Wilson, Primary Teacher, Hensingham Primary School, UK "This book is easy to read and will enable all teachers (whatever their stage of career development) to become even better at teaching History. The chapter about the history of the curriculum is particularly interesting because it helps us all to understand what has influenced curriculums and pedagogies over time, whereas the Planning, Assessment and Toolkit chapters are useful on a more practical level. What is particularly ideal for trainee teachers is the Theory into Practice chapter that blends the pedagogy of History with learning theory. I will certainly be recommending this text to all my student teachers." Maggie Webster, Senior Lecturer and RE Subject Coordinator, Edge Hill University, UK "Chris Russell has provided a gem of a guide with lots of practical advice for the student and practising teacher of history in the primary classroom, as well as a good book to read in its own right." Marian Hodgson, Head Teacher, St Philips CE Primary School, Litherland, UK
