Davidson's Principles and Practice of Medicine E-Book - Stuart H. Ralston 2018-02-02
More than two million medical students, doctors and other health professionals around the globe have owned a copy of Davidson's Principles and Practice of Medicine since it was first published. Now in its 23rd Edition, this textbook describes the pathophysiology and clinical

features of the most frequently encountered conditions in the major specialties of adult medicine and explains how to recognise, investigate, diagnose and manage them. Taking its origins from Sir Stanley Davidson's much-admired lecture notes, Davidson's has endured because it keeps pace with how modern medicine is taught and provides a wealth of information in an easy-to-read, concise and beautifully illustrated format. This book will serve readers everywhere as a core text that integrates medical science with clinical medicine, conveying key knowledge and practical advice in a highly accessible and readable format. The opening section describes the fundamentals of genetics, immunology, infectious diseases and population health, and discusses the core principles of clinical decision-making and good prescribing. A new second section on emergency and critical

care medicine encompasses poisoning, envenomation and environmental medicine, and introduces a new chapter on acute medicine and critical illness. The third section covers the major medical specialties, each thoroughly revised and brought fully up to date. Two new chapters on maternal and adolescent/transition medicine complement the one on ageing and disease. A new chapter on medical ophthalmology has been included. Clinical Examination overviews summarise the main elements for each system and now feature in the biochemistry, nutrition and dermatology chapters. Presenting Problems sections provide a clear pathway for the assessment of and approach to the most common complaints in each specialty. Practice Point summaries detail the practical skills that medical students and junior doctors must acquire. Emergency boxes emphasise the core knowledge

needed to manage acutely ill patients. In Old Age, In Pregnancy and In Adolescence boxes highlight differences in the practice of medicine in these patient groups, and illustrate the interfaces between medical, obstetric and paediatric services. The text is extensively illustrated, with over 1000 diagrams, clinical photographs, and radiology and pathology images. The global perspective is enhanced by an International Advisory Board of experts from 17 countries, and by authors from around the world.

Community Medicine: Prep Manual for Undergraduates - E-Book - Bhalwar Rajvir
2015-11-16

Authored by an eminent, highly qualified and greatly experienced teacher and examiner in the discipline, this book is to empower UG students to prepare for examination (as a revision book). With retained comprehensiveness of the

content and interesting presentation, the aim is to strengthen both the aspects - (i) undergo the examination successfully and (ii) understand the basics of the subject. - Covers complete MBBS syllabus of the subject through 29 chapters, dividing each chapter into 4 sections: o 3-6 Long Questions, duly solved in a simple and lucid manner. o 7-10 Short Notes, duly answered. o 10-20 MCQs, with answers. o 7-10 Viva Questions with answers. - Addresses various aspects of practical examination, in the form of epidemiological exercises, biostatistical exercises, medico-social case taking procedure, and entomology. - Presents chapters on Epidemiology and Biostatistics in a very elaborate and simplified manner to enable students to understand the concepts well.

IAPSM's Textbook of Community Medicine - AM

Public Health in Developing

Countries - Edlyne Eze

Anugwom 2020-09-09

Public health entails the use of models, technologies, experience and evidence derived through consumer participation, translational research and population sciences to protect and improve the health of the population. Enhancing public health is of significant importance to the development of a nation, particularly for developing countries where the health care system is underdeveloped, fragile or vulnerable. This book examines progress and challenges with regards to public health in developing countries in two parts: Part 1 “General and Crosscutting Issues in Public Health and Case Studies” and Part 2 “Country-Specific Issues in Public Health.” For example, assuring equity for marginalized indigenous groups and other key populations entails the application of transdisciplinary interventions

including legislation, advocacy, financing, empowerment and destigmatization. The diverse structural, political, economic, technological, geographical and social landscape of developing countries translates to unique public health challenges, infrastructure and implementation trajectories in addressing issues such as vector-borne diseases and intimate partner violence. This volume will be of interest to researchers, health ministry policy makers, public health professionals and non-governmental organizations whose work entails collaborations with public health systems of developing nations and regions.

Exam Preparatory Manual for Undergraduates: Medicine -

Archith Bloor 2018-09-30

Oxford Textbook of Sleep

Disorders - Sudhansu

Chokroverty 2017

There has been a rapid global increase in the number of individuals making sleep medicine their career, resulting in an explosive growth in the number of sleep centres and programmes, as well as an increasing number of sleep societies and journals. Part of the Oxford Textbooks in Clinical Neurology series, the Oxford Textbook of Sleep Disorders covers the rapid advances in scientific, technical, clinical, and therapeutic aspects of sleep medicine which have captivated sleep scientists and clinicians.

This text aims to introduce sleep disorders within the context of classical neurological diseases, giving an in-depth coverage of the topic in a logical and orderly way, while emphasizing the practical aspects in a succinct and lucid manner. Divided into 12 sections, this book begins by

discussing the basic science (Section 1), before moving onto the laboratory evaluation (Section 2) and the clinical science (Section 3). The remainder of the book focuses on specific sleep disorders (Sections 4-12), from insomnias and parasomnias to sleep neurology and sleep and psychiatric disorders. Chapters are supplemented by tables, case reports, and illustrations intended to succinctly provide relevant information in a practical manner for diagnosis and treatment of sleep disorders, while always emphasizing clinical-behavioural-laboratory correlations.

Medicine: Prep Manual for Undergraduates E-book -

Aggarwal Praveen 2019-07-15

With ever-expanding knowledge and advances in medicine, the sixth edition of this book is significantly revised and presented in new full-colour format. Structured in question-answer format, this book is a must-have for all undergraduate

medical students as it prepares them for both theory and viva-voce examinations. It is also useful for dentistry and nursing students. • Thorough revision of all the chapters without changing basic framework to keep up with the latest changes in the field of medicine. • Revision of topics especially respiratory system, immunological factors in disease, diseases of the cardiovascular system, diseases of the gastrointestinal system, acute poisoning and environmental emergencies, oncology, diseases of the kidneys and genitourinary system, diseases due to infections, endocrine and metabolic diseases. • Presentation of text pointwise with suitable boxes and tables, which helps the student in quick learning and revision. • Addition of newer innovations and treatments modalities. • Inclusion of clinical decision pathways for some of the commonly encountered critical and non-emergent disease conditions •

Expansion of normal values of investigations and understanding the evolution of disease. • Management of acute medical emergencies like acute myocardial infarction, acute pulmonary oedema, acute anaphylactic and hypovolumic shock, status asthmaticus, tension pneumothorax, status epilepticus, haemoptysis, gastrointestinal bleeding, diabetic coma, snake bites, common poisoning, etc. • Emphasis has been laid on clinical presentation with description of the drugs.
