Performing Communities - Robert H. Leonard

2006-04

Performing Communities is an inquiry into ensemble theater of inner-city Los Angeles, small-town northern California, African-American South, multicultural southern Texas, low-income central Appalachia, economically struggling South Bronx New York and cross-continental Native America. This compendium of critical writing about the role these theaters play in building community shows how these artist groups are not only affected by but forged by working in and with their communities over time. Grassroot ensemble theater is discovered to be neither alternative nor

marginalized, but vanguard, a natural evolution of the movement that propelled regional theater "away from the commercial restraints of New York and toward a theater expressive of the rich diversity of American culture." Robert H. Leonard is Professor of Theatre Arts at Virginia Tech and former artistic director of the Road Company, an acclaimed ensemble theater that produced two dozen original plays reflecting the issues of Central Appalachia. Ann Kilkelly is Professor of Theater Arts and Women's Studies at Virginia Tech and a nationally recognized scholar and performer who created the Diversity Training

Laboratory that uses performance techniques to examine diversity issues. Linda Frye Burnham is co-director of Art in the Public Interest and the Community Arts Network. She founded High Performance magazine and is editor, with Steven Durland, of *The Citizen Artist: 20 Years of Art in the Public Arena*. Jan Cohen-Cruz is Director of Theatre Studies in the NYU Tisch School of the Arts. She is author of *Local Acts: Community-based Performance In The United States* (Rutgers University Press 2005).

Twentieth-Century Multiplicity - Daniel H. Borus
2008-12-16

Twentieth-Century Multiplicity explores the effect of the culture-wide sense that prevailing syntheses failed to account fully for the

complexities of modern life. As Daniel H. Borus documents the belief that there were many truths, many beauties, and many values—a condition that the historian Henry Adams labeled multiplicity—rather than singular ones prompted new departures in a myriad of discourses and practices ranging from comic strips to politics to sociology. The new emphasis on contingency and context prompted Americans to rethink what counted as truth and beauty, how the self was constituted and societies cohered and functioned. The challenge to absolutes and universals, Borus shows, gave rise to a culture in which standards

were not always firm and fixed and previously accepted hierarchies were not always valid. Although itself strenuously challenged, especially during the First World War, early twentieth-century multiplicity bequeathed to American cultural life an abiding sense of the complexity and diversity of things.

Balancing Green - Yossi Sheffi 2018-03-30

An expert on business strategy offers a pragmatic take on how businesses of all sizes balance the competing demands of profitability and employment with sustainability. The demands and stresses on companies only grow as executives face a multitude of competing business goals.

Their stakeholders are interested in corporate profits, jobs, business growth, and environmental

sustainability. In this book, business strategy expert Yossi Sheffi offers a pragmatic take on how businesses of all sizes—from Coca Cola and Siemens to Dr. Bronner's Magical Soaps and Patagonia—navigate these competing goals. Drawing on extensive interviews with more than 250 executives, Sheffi examines the challenges, solutions, and implications of balancing traditional business goals with sustainability. Sheffi, author of the widely read *The Resilient Enterprise*, argues that business executives' personal opinions on environmental sustainability are irrelevant. The business merits of environmental

sustainability are based on the fact that even the most ardent climate change skeptics in the C-suite face natural resource costs, public relations problems, regulatory burdens, and a green consumer segment. Sheffi presents three basic business rationales for corporate sustainability efforts: cutting costs, reducing risk, and achieving growth. For companies, sustainability is not a simple case of “profits versus planet” but is instead a more subtle issue of (some) people versus (other) people—those looking for jobs and inexpensive goods versus others who seek a pristine environment. This book aims to help

companies satisfy these conflicting motivations for both economic growth and environmental sustainability.

The Schuman Plan and the British Abdication of Leadership in Europe - Edmund Dell 1995

This book provides the first detailed examination of the Attlee government's rejection of British participation in the Schuman Plan in 1950, which

proposed the establishment of a common market for steel and coal as a way of avoiding future Franco-German conflict. This also represented Britain's rejection of a leading role in fashioning European political and economic intergration. Many received myths are contested: the Schuman Plan was not a bolt from the blue; domestic political circumstances did not make it impossible for Britain to join; participation would not have been incompatible with Britain's global and Commonwealth roles. Edmund Dell assesses Ernest Bevin's conduct as Foreign Secretary during this last year of his life: in declining health

but still believing himself indispensable, he was arrogantly mistaken about the Schuman plan and lacked colleagues of comparable stature able to tell him he was wrong. The only hope was Stafford Cripps, the Chancellor of the Exchequer, but he was on the point of resignation due to ill-health and lacked the energy to press his doubts. Ministerial inadequacy was compounded by the Foreign Office, the leading officials in which were no less arrogant and quite as blind to the implications of the proposal. The consequence was a major policy failure which has influenced Britain's relations with its European partners right

up to the present. Edmund Dell works with archival evidence, and the memoirs of participants, to place these events in the context of the 'big questions' dominating British policy formation: security, the dollar shortage, and the difficult relationship with an American administration intent both on attacking the sterling area and pressing for European federation. The result is an incisive reevaluation of a key episode in post-war European history.

Sites of Southern Memory - Darlene O'Dell 2001

In southern graveyards through the first decades of the twentieth century, the Confederate South

was commemorated by tombstones and memorials, in Confederate flags, and in Memorial Day speeches and burial rituals. Cemeteries spoke the language of southern memory, and identity was displayed in ritualistic form -- inscribed on tombs, in texts, and in bodily memories and messages. Katharine DuPre Lumpkin, Lillian Smith, and Pauli Murray wove sites of regional memory, particularly Confederate burial sites, into their autobiographies as a way of emphasizing how segregation divided more than just southern landscapes and people. Darlene O'Dell here considers the southern graveyard as

one of three sites of memory -- the other two being the southern body and southern memoir -- upon which the region's catastrophic race relations are inscribed. O'Dell shows how Lumpkin, Smith, and Murray, all witnesses to commemorations of the Confederacy and efforts to maintain the social order of the New South, contended through their autobiographies against Lost Cause versions of southern identity. Sites of Southern Memory elucidates the ways in which these three writers joined in the dialogue on regional memory by placing the dead southern body as a site of memory within their texts. In this

unique study of three women whose literary and personal lives were vitally concerned with southern race relations and the struggle for social justice, O'Dell provides a telling portrait of the troubled intellectual, literary, cultural, and social history of the American South.

Another City - Dell Upton 2008

An exploration of the beliefs, perceptions, and theories that shaped the architecture and organization of America's earliest cities In the late 18th and early 19th centuries, burgeoning American cities like New Orleans and Philadelphia seemed increasingly chaotic. Noise, odors, and a feverish level of activity on the streets threatened to overwhelm the senses. Growing populations placed new demands on every aspect of the urban landscape--streets,

parks, schools, asylums, cemeteries, markets, waterfronts, and more. In this unique exploration of the early history of urban architecture and design, leading architectural historian Dell Upton reveals the fascinating confluence of sociological, cultural, and psychological factors that shaped American cities in the antebellum years. Through contemporary travel accounts, diaries, and correspondence, as well as maps, architectural drawings, paintings, and prints--many previously unpublished--Upton investigates not only how buildings were designed, streets were laid out, and urban space was put to use, but also why.

Play Nice But Win - Michael Dell 2021-10-05

WALL STREET JOURNAL BESTSELLER From Michael Dell, renowned founder and chief executive of one of America's largest technology

companies, the inside story of the battles that defined him as a leader In 1984, soon-to-be college dropout Michael Dell hid signs of his fledgling PC business in the bathroom of his University of Texas dorm room. Almost 30 years later, at the pinnacle of his success as founder and leader of Dell Technologies, he found himself embroiled in a battle for his company's survival. What he'd do next could ensure its legacy—or destroy it completely. Play Nice But Win is a riveting account of the three battles waged for Dell Technologies: one to launch it, one to keep it, and one to transform it. For the first time, Dell

reveals the highs and lows of the company's evolution amidst a rapidly changing industry—and his own, as he matured into the CEO it needed. With humor and humility, he recalls the mentors who showed him how to turn his passion into a business; the competitors who became friends, foes, or both; and the sharks that circled, looking for weakness. What emerges is the long-term vision underpinning his success: that technology is ultimately about people and their potential.

More than an honest portrait of a leader at a crossroads, *Play Nice But Win* is a survival story proving that while anyone with technological insight and entrepreneurial zeal might build something great—it takes a leader to build something that lasts.
